

Top travel camera for women

Slim, lightweight are the deciding factors for the girls 'weak willow silk' choice when buying digital cameras. The following are the most ideal cameras for women but the feature is not 'lightweight' at all.

Slim, lightweight are the deciding factors for the girls 'weak willow silk' choice when buying digital cameras. The following are the most ideal cameras for women but the feature is not 'lightweight' at all.

Top 8 travel cameras for women

1. Sony DSC-W800
2. Fujifilm XF10
3. Nikon COOLPIX A900
4. Panasonic LUMIX DMC-TS30R
5. Canon Powershot G9 X Mark II
6. Canon PowerShot G7 X Mark II
7. Panasonic DC-ZS70K
8. Panasonic LUMIX DMC-ZS100

Sony DSC-W800

Reference price: \$ 88 (VND 2,052,000)

The Sony DSC-W800 is a cheap option, offering users a few outstanding features, while trying to minimize hardware costs. With DSC-W800, Sony strives to maintain the quality and design so as not to affect product performance or reliability. The central part of this camera is the 20.1-megapixel Super HAD CCD sensor, which is quite impressive for the price.

The ability to 5x optical zoom is nothing outstanding. But with an ultra-thin, lightweight design (0.28 pounds / 127g), such a low zoom capability is acceptable. The W800 also has a number of convenient creative control features, 360 ° panoramic shooting mode, vibration reduction, Smile Shutter technology (capturing smiling people) and even HD video recording (720p).

Fujifilm XF10

Reference price: VND 9,769,000

Fujifilm is a popular camera brand. It's no surprise to consider the functionality and versatility of the cameras they make. The XF10 is a great option, if you're looking for a device that produces the same image quality with an alternative lens that costs more than \$ 1,000. First of all, the camera possesses an impressive large 24.2MP APS-C CMOS sensor, convenient for any post-editing work to be done.

The Fujifilm XF10 has a single 18.5mm, f / 2.8 single-lens lens, works great with cams, but is limited by the absence of a zoom function. The 3-inch LCD touchscreen is also quite brilliant, giving you a resolution of over 1040k dot - great for previewing images in detail. Has a standard ISO range of 100-12800, ensuring flexibility even in low-light situations.

The camera allows you to record videos of up to 3840 x 2160 4K in 30 minutes, which is quite impressive for a camera in this category and price. Plus, a number of advanced filter options, easy-to-navigate menus and even Bluetooth connectivity to seamlessly connect to your phone on the go make the Fujifilm XF10 a great little

camera.

Nikon COOLPIX A900

Reference price: \$ 230 (7,460,000 VND)

The Nikon COOLPIX A900 is a high-end camera but not too expensive. Specifications and features that the Nikon COOLPIX A900 possesses are comparable to cameras with mid-to-high-class removable lenses. Nikon COOLPIX A900 has a 1 / 2.3-inch BSI CMOS sensor (a high-sensitivity sensor with a maximum resolution of 1 / 2.3-inch format).

The Nikon COOLPIX A900 also has a 35x optical zoom lens with dynamic zooming up to 70x. The camera has a three-inch tilting LCD screen; Bluetooth, WiFi and NFC connectivity; Remote shooting via smartphone or tablet; ISO sensitivity up to 3200 and continuous shooting speed of 7 frames / sec. The Nikon COOLPIX A900 can record 4K (UHD) videos at 30 frames per second. This is Nikon's attempt to bring new life into the mid-range point and shoot camera world.

Panasonic LUMIX DMC-TS30R

Reference price: \$ 128 (2,985,000)

Panasonic TS30R is a camera that looks a bit special, looks like a gaming controller, but it is an indispensable item for girlfriends who like to travel. The Panasonic LUMIX DMC-TS30R has a slim, light and rugged design, but more importantly it is suitable for all weather conditions. You can use this camera in water depths of up to 26 feet (8m), dropped from a height of 5 feet (1.5m) and in environments as low as 14 ° F.

The Panasonic LUMIX DMC-TS30R also has a dust-proof design, helping to maintain the device's lifespan and function. The camera itself has some mid-range specs such as a 16-megapixel CMOS sensor, MP4 HD video recording (720p), 4x optical zoom and integrated memory of 220 MB. The Panasonic LUMIX DMC-TS30R also has a number of shooting modes and creative control functions, including a panoramic shooting feature, which allows you to take and overlay consecutive images horizontally or vertically.

Canon Powershot G9 X Mark II

Reference price: \$ 339 (7,914,000 VND)

With its slim and compact design, you can take the Canon Powershot G9 X Mark II wherever you are, while still enjoying the superb image quality and features. The plus point of the Canon Powershot G9 X Mark II is the 1-inch, 20.1-megapixel CMOS sensor, which uses Canon's DIGIC 7 image processor, has WiFi and Bluetooth connectivity to quickly transfer photos to devices. Compatible.

At only 7.3 ounces (206g), Canon's compact body still has space for f / 2.0 lenses (great for low-light photography) and 3x optical zoom for a focal range of 28-84mm . The super-sensitive three-inch touchscreen LCD monitor and customizable control ring at the top allow you to quickly adjust a myriad of settings including aperture, exposure or shutter speed.

Canon PowerShot G7 X Mark II

Reference price: \$ 599 (VND 13,980,000)

The Canon PowerShot G7 X Mark II is an amazingly powerful point and shoot camera, powerful enough to replace DSLR cameras and will satisfy most users. Canon PowerShot G7 X Mark II measures only 6.3 x 5.7 x 3.2 inches (16 x 14.5 x 8cm) and weighs 1.4 pounds (0.6kg), much smaller than the machine. DSLR photo.

The PowerShot G7 X Mark II produces excellent images thanks to the 20.1-megapixel 1-inch CMOS sensor, meaning the image will be detailed enough to print or edit in RAW format in Photoshop. The Canon PowerShot G7 X Mark II also has a 4.2x optical zoom lens, which, while modest, is still useful for close-ups and the ability to record 1080p HD video at 60 frames per second.

In terms of connectivity, the camera has built-in WiFi and NFC technology, so you can post photos directly to Facebook, Twitter, YouTube, Flickr and Google Drive using the camera or send them to a smartphone or computer. board. The free Canon Camera Connect app works on both iOS and Android devices, so you can share every photo, no matter where you are.

Panasonic DC-ZS70K

Reference price: \$ 298 (6,955,000 VND)

The Panasonic DC-ZS70K is capable of 30x optical zoom (equivalent to 24-720mm lens on 35MM camera), so you can capture the subject at almost expected distance. Long-range zoom capability is enhanced thanks to 5-axis optical image stabilization, in addition to the Level Shot function to detect and balance with any horizontal line for perfect image results.

In addition, the Panasonic DC-ZS70K is capable of outstanding 4K video recording at 3840 x 2160p resolution and 20.3 megapixel MOS sensor for great results when shooting still images. The Panasonic DC-ZS70K also includes a 180-degree tilting LCD screen, which helps capture all the selfies you want in 4K quality.

Panasonic LUMIX DMC-ZS100

Reference price: \$ 498 (VND 11,620,000)

The Panasonic LUMIX ZS100 has the highest price among the options on this list, the equivalent of a new iPhone, so this camera is only suitable for those on a budget. But this price also means you will get some top specs and features. The ZS100 has a huge 20.1-megapixel (1-inch) CMOS sensor that maximizes colors and minimizes the possibility of creating fake images.

The Panasonic LUMIX DMC-ZS100 is capable of 10x optical zoom with wide aperture of f / 2.8-5.9, EVF electronic viewfinder, touch-screen LCD monitor and lens control ring to help adjust exposure bright at DSLR level. The Panasonic LUMIX DMC-ZS100 is also capable of 4K video recording (UHD). Thanks to all these advantages, this is one of the best point and shoot cameras you can find for under \$ 1,000.

Wish you find yourself a suitable choice!
