

TOP unit mods to install in Totally Accurate Battle Simulator

Totally Accurate Battle Simulator (TABS) is a simulation, strategy game, with unique, funny mechanics and gameplay.

While the original game is still fascinating with its own weird abilities, the content created by the modder community is where the weirdness really kicks in.

With a huge number of mods, there are many amazing maps, battles and units in the Workshop that are designed to be fun for gamers to enjoy. In this article, let's explore the TOP of the most interesting unit mods to install for Totally Accurate Battle Simulator to have a new experience in this already quirky game.

Halberd Black Knight

Although TABS had knights, they sometimes looked a bit plain. Their armor and swords were very effective but lacked something special. Fortunately, there is an alternative that is Halberd Black Knight - a knight wielding a halberd.

Not only do these knights have extended reach thanks to their new weapons, but they also have some stylish armor that stands out from the chaos of fighting against an entire army.

Godzilla

Godzilla has faced off against a large number of monsters in the movies and with this free mod for TABS it's fun filled custom battles.

Although the design makes Godzilla stand a bit unsteady on his feet, with his main attack, massive lightning bolts spewing from his mouth and hitting the target with a massive explosion, it's totally worth the inclusion. game.

If the ranged attack doesn't damage anyone, enemies will also be hit as Godzilla whips his massive head and tail around the battlefield.

Minigun Raptor

Dinosaurs and shotguns are both cool, so it would be great to combine the two together. That's why the Minigun Raptor was created for TABS. There's not much strategy involved in using this particular unit, but to put it simply, it's a Velociraptor equipped with shotguns.

The shotgun's high rate of fire and the movement speed these predators have will make a deadly combination, no matter what the enemy. So players just need to relax and watch these masters of destruction do their job.

Zombies

TABS has some great locations to perfectly recreate a location against a horde of invading undead. Unfortunately, until the developers add this feature to the game, the Zombies unit mod in the Workshop is the best that gamers can experience.

This free mod brings the iconic creepy horror feel to the game, and while not powerful by itself, they are extremely aggressive when in a crowd. A good tactic to use this mod is to keep them spread out to be able to overwhelm with overwhelming numbers.
