

Top free video editing apps without watermarks.

You can edit the video later to remove the logo, but why go through all that trouble when there are so many free video editing apps that don't contain logos?

Video is widely used on video websites, social networks, and news platforms for sharing, entertainment, education, and many other purposes. With the increasing demand for using video to convey information, the need for video editing tools has also increased. For example, you might need to combine video clips into an impressive short film to share, an entertaining video, an educational tutorial video, etc. All of these require a video editor.

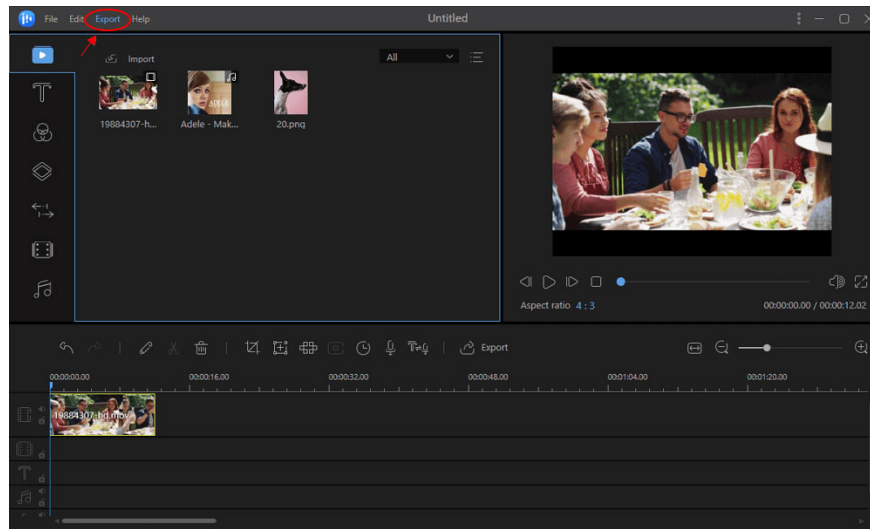

Many people look for a free video editor to use. However, free software often automatically adds the software's name or logo to videos, and those watermarks are undesirable. Therefore, in today's article, TipsMake.com will introduce 11 free video editing apps that don't add watermarks for your reference.

1. EaseUS Video Editor
