

# Top way of HOT circuit board in December

These are the most powerful graphics boards in December. XFX proves its superiority when it comes to 3/5 products.

These are the most powerful graphics boards in December. XFX proves its superiority when it comes to 3/5 products.

## 1. Asus EAH2900XT

**Chip Set :** ATI Radeon HD 2900 XT

**Bus :** PCI Express

**Installation RAM (MB) :** 512

**Processing speed :** Very good

**Price :** \$ 419

The EAH2900XT balances the price and performance, including the HDMI output port, and the perfect package.

## 2. Gigabyte Radeon HD2900XT (GA-RX29T512VH-B)

**Chip Set :** ATI Radeon HD 2900 XT

**Bus :** PCI Express

**Installation RAM (MB) :** 512

**Processing speed :** Very good

**Price :** \$ 429

Soft price, HDMI output port, 5.1 channel sound and a voucher for a Half-Life version of Valve.

### 3. XFX GeForce 8800Ultra XXX

**Chip Set** : nVidia GeForce 8800 Ultra

**Bus** : PCI Express

**Installation RAM (MB)** : 768

**Processing speed** : extremely good.

**Price** : \$ 740

High prices have affected the ratings of this extremely high performance circuit board. Sold with Tom Clancy's Ghost Recon game.

#### 4. XFX GeForce 8800GTS 640MB XXX

**Chip Set** : nVidia GeForce 8800 GTS

**Bus** : PCI Express

**RAM settings (MB)** : 640

**Processing speed** : extremely good.

**Price** : \$ 420

Players who want to enjoy high resolution will definitely be satisfied with this 640MB version of this XFX's 8800GTS card.

#### 5. XFX GeForce 8800GTS 320MB XXX

**Chip Set :** nVidia GeForce 8800 GTS

**Bus :** PCI Express

**RAM settings (MB) :** 320

**Processing speed :** extremely good.

**Price :** \$ 309

The 320MB version of the XFX's 8800GTS product line works quite well compared to the 640MB version and is more competitively priced. It also comes with the DX10: Lost Planet game.
