## What is a wide angle webcam?

Similar to the Webcam for online meetings, it is a webcam device that can capture the user's image signal, connected to the computer, often used in online meetings for the purpose of working remotely, online via computer. The wide-angle webcam is also mainly used in meeting rooms, but with an expandable lens and flexibility in design, it will help capture the whole scene with a wider angle when used.

## 2. Logitech Meetup Webcam

MeetUp Wide-Angle Webcam is Logitech's premium ConferenceCam designed for small conference rooms and huddle rooms. Say goodbye to crowding around a laptop. With an ultra-wide 120-degree field of view and a pan/tilt lens, MeetUp makes everyone around the conference table visible. With integrated audio optimized for huddle room acoustics, everyone can be heard and seen.

**Logitech® MeetUp** brings exceptional video quality to small conference rooms. The 120-degree field of view easily accommodates huddle rooms where everyone is sitting on the other side of the camera. The 4K Ultra High Definition sensor and Logitech lens deliver exceptional clarity, while pan, tilt, and zoom let you keep the presenter and their visuals in focus.

Plus, MeetUp's built-in audio is optimized for huddle room audio, delivering exceptional sound in small rooms. Three beamforming microphones and a custom speaker ensure meetings sound as great as they look. Add Expansion Mics for MeetUp to extend audio range up to 4.2 meters.

Walk into a small room and instantly start a video conference. MeetUp plugs into a USB port and just works. Use any video conferencing software app and cloud service, including the ones you already use.
