

Toshiba 'cyclone in autumn' laptop

Electronics company Toshiba will bring to market a new series of high-end laptops of the Dynabook line for over \$ 1,500 at the end of this August.

Electronics company Toshiba will bring to market a new series of high-end laptops of the Dynabook line for over \$ 1,500 at the end of this August.

Dynabook CX

The two CX / 48G and 47G laptops in this series all have a 13.3-inch display and use Intel Core 2 Duo P8400 dual-core processors. As for the CX / 45G model, it integrates the Celeron 575 processor for a speed of 2 GHz.

47G & 48G has a hard drive capacity of up to 250 GB, 2 GB of memory and entertainment with a Super DVD multi-disc reader.

The two models also allow users to connect to WiFi, supporting 3 USB 2.0 connection ports, fingerprint recognition capabilities. The built-in HDMI connector allows users to connect to other audio-visual devices to view high-quality images.

The integrated screen of 48G laptop model is applied LED lighting technology to make beautiful images appear better.

Dynabook CX / 47G is estimated to cost about 2,052 USD and CX / 48G is priced at 2,200 USD. Lower-profile versions of this line will cost about 1,870 USD.

Dynabook PX

Two laptop models released in this series include the PX / 51G in the lower class and the PX / 62G with a strong configuration of high level.

These laptops have 15.4-inch display screens. The PX / 51G uses the 560 Celeron processor with 1 GB of RAM while the PX / 62G has twice the capacity of PX / 51G.

Both models include a 160GB hard drive, Super DVD multi-reader, 3 USB 2.0 ports, WiFi b / g and a multi-format memory card reader.

Dynabook AX

Both models AX / 53G and AX / 54G have 15.4-inch LCD display and Intel Celeron 560 CPU processor for 2.13 GHz, 2GB memory capacity, 250 GB hard drive, head DVD. These models will meet the needs of high quality audio enjoyment by users with stereo speakers from Harman or Kardon.

It supports WiFi and HDMI connections, making it convenient for users.

It is produced in white, black and pink colors for users' choice at a price of about 1,600 USD.

Dynabook TX

This model includes 3 models TX / 67G, TX / 66G and TX / 65G.

The TX / 67G and TX / 66G models are similar in configuration to the Intel Core 2 Duo P8400 processor for 2.26 GHz speed and 15.4-inch LCD screen with 1280 x 800 WXGA resolution, capacitance 2GB memory, 320GB hard drive and Wifi, HDMI and 4 USB 2.0 ports.

The eSATA and FeliCa plug ports are all built into these two laptops. Both models will cost about \$ 1,979.

TX / 65G laptop models integrate the same specifications as the two models above but only have a hard drive capacity of 250 GB with an estimated price of \$ 1,876. The models of this series are running on Windows Vista Home Premium operating system.
