

Toshiba introduced a new ultraportable laptop

Toshiba's compact T1135D laptop uses AMD Turion Neo X2 processor and ATI Radeon 3200 graphic card.

Toshiba's compact T1135D laptop uses AMD Turion Neo X2 processor and ATI Radeon 3200 graphic card.

The T1135D has a 13.3-inch LED backlight display with TruBrite technology (Toshiba's anti-glare screen technology). The heart of this laptop is an AMD Turion Neo X2 or Athlon Neo MV-40 processor. The T1135D has 4GB of DDR2 memory and a hard drive capacity of up to 320 GB (5400 rpm). Especially Toshiba's new product is equipped with ATI Radeon 3200 graphic graphics card.

In terms of connectivity, the T1135D is equipped with Wi-Fi 802.11 b / g / n and Bluetooth 2.1 + EDR. It has two USB 2.0 ports, a USB / eSATA (shared) port, HDMI port and a 5-type memory card reader. In addition, the T1135D is also equipped with a webcam with Toshiba's face recognition technology.

The Toshiba T1135D, which is available for sale, will come preinstalled with Windows 7 Home Premium (64bit). Machine weighs about 1.76 kg with 6 cell battery included. The continuous battery life of the manufacturer can be up to 6 hours continuously.

In particular, Toshiba T1135D also owns touch-pad to support multi-touch, which is very convenient for laptops running Windows 7. This machine will be sold to the market at about 600 USD.

In addition to T1135D, Toshiba also introduced the T115D with an 11.6-inch screen, a more refined configuration with 2GB Ram and a price of about \$ 500 when marketed.

T1135D and T115D will begin to be marketed by the manufacturer from January 17, 2010.
