

Toshiba introduced U923t ultrabook slider screen

This model uses Core i5 processor, integrated Intel HD Graphics 4000 graphics, 128 GB SSD and 12.5 inch touch screen.

This model uses Core i5 processor, integrated Intel HD Graphics 4000 graphics, 128 GB SSD and 12.5 inch touch screen.

The price of Toshiba U925t is currently unknown.

Japanese manufacturer Toshiba has introduced a sample ultrabook running Windows 8 named U925t. Currently, the price of this model is unknown.

Toshiba U925t is equipped with 12.5 inch screen with sliding design and Gorilla Glass coated glass. The keyboard of the device is hidden under the screen and is integrated with backlit backlight. The whole body is about 2 cm thick.

In terms of configuration, Toshiba's ultrabook is equipped with Core i5 processor, integrated Intel HD Graphics 4000 graphics and 128 GB SSD drive. It supports Intel WiDi technology to help share content from laptops to TVs via a wireless connection. In addition, this model also has many other connections such as USB 3.0, HDMI, 3.5 mm headphone jack.

Official photos Toshiba U925t ultrabook:

When the keyboard is not revealed, it looks like a tablet.

Users can set up the screen when using the keyboard.
