

## Toshiba launches Dynabook NX laptop line

At the Expo CEATEC 2008 (Japan), Toshiba introduced the new Dynabook NX laptop with a battery life of up to 11.5 hours with attractive colors.

**At the Expo CEATEC 2008 (Japan), Toshiba introduced the new Dynabook NX laptop with a battery life of up to 11.5 hours with attractive colors.**

Dynabook NX series is designed for women. People who like to bring with them compact, lightweight and colorful laptops. The product measures 286x223x29.9mm, weighs 1.39kg and comes in a variety of colors such as white, pink lotus and black to choose from.

Dynabook NX is equipped with Intel Core 2 Duo ULV SU9300 processor with 1.2GHz clock speed, 2GB RAM and can upgrade to 3GB. Like previous mini laptops (netbooks), the device also gives users two choices of hard drive: 128GB solid state drive (NX / 78GBL) or 160G hard drive (NX / 76G).

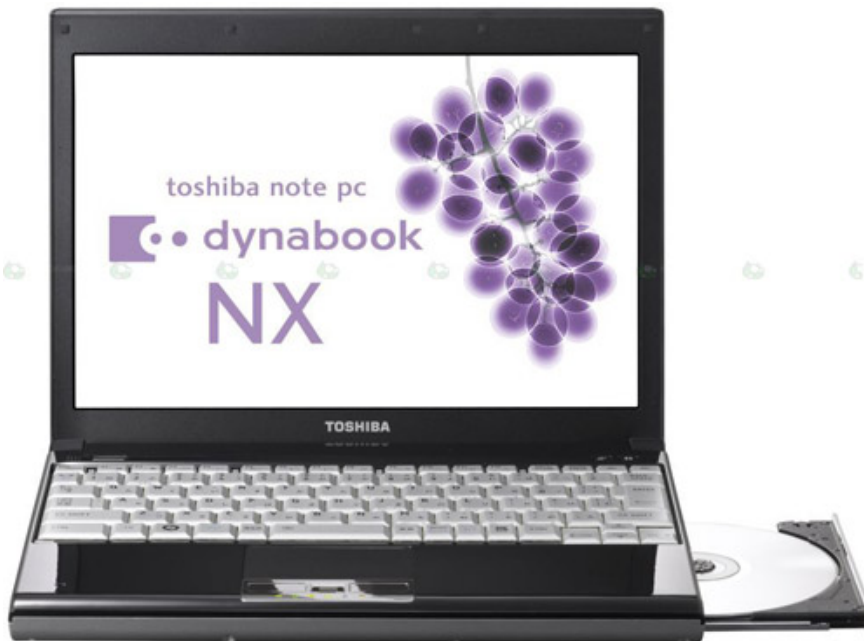

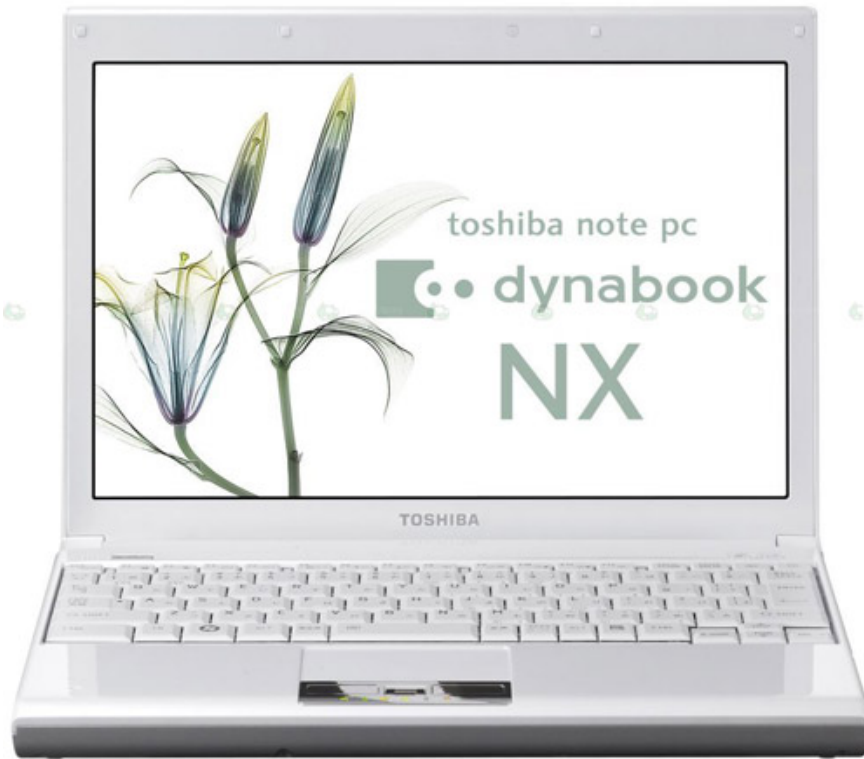

This Dynabook NX series features a 12.1-inch LCD screen that uses LED backlight technology to illuminate

sharper images with WXGA (1280x800) resolution, which is not too bad for a netbook. In addition, the device also integrates DVD SuperMulti burner, Wi-Fi connection, three USB ports, e-Sata port and SD card slot.

The product will go on sale in Japan in October at a price not yet detailed, but as expected, the device will cost about \$ 1660 (NX / 76G) and \$ 2670 (NX / 78GBL).
