

Toshiba Mini NB200 battery runs 9 hours

Toshiba has introduced the Mini NB200 notebook that allows users to use 9 hours of continuous price from 465 USD

Toshiba has introduced the Mini NB200 notebook that allows users to use 9 hours of continuous price from 465 USD .

It has a 10.1-inch screen and users can choose the version using 1.6GHz processor Intel Atom Processor N270 or Intel N280 Atom. The Mini NB200 has a weight of 1.1 kg and the compact design enhances the mobility of the machine. The 3G accelerometer test system allows recording of vibration and shock to protect the hard drive of 160 GB built-in capacity.

Toshiba also applies Sleep-and-Charge technology on the Mini NB200 allowing users to charge devices connected by USB standards (such as phones, music players .) even when the device is turned off.

It is produced in black, brown, white and pink colors for your choice and is expected to be distributed in the market by May with the lowest price of about 465 USD.
