

## Toshiba Qosmio X305-Q706 is flaming

This is the 'top' laptop for gamers because it is equipped with 3 graphics cards. In addition, X305-Q706 can replace any 'desktop' multimedia entertainment system.

**This is the "top" laptop for gamers because it is equipped with 3 graphics cards. Besides, X305-Q706 can replace any "desktop" multimedia entertainment system.**

The Qosmio X305-Q706 version debuted in the world at CES 2009 and was immediately honored as a laptop to play the "top" game at the fair. At \$ 2,000, the device is equipped with an Intel Core 2 Duo P8400 2.26 GHz chip, 4 GB DDR3 RAM and a 320 GB hard drive at 7,200 revolutions per minute, especially with up to 3 graphics cards, including graphics card. Integrated GeForce 9400M and 512 MB Nvidia GeForce 9800M GTS cards with SLI interface. The audio system consists of 4 stereo speakers and a Harman Kardon subwoofer, 17-inch LCD mirror screen and full of the most modern connectors ensure X305-Q706 "overtakes" most entertainment laptops. top current.

Toshiba Qosmio X305-Q706 has a 17-inch screen. *Photo: Toshiba* .

Powerful performance is demonstrated by Toshiba right from the outside of the case with a blazing red fire, burning flames. Appearing in the middle of the case is normally the silver "Qosmio" logo.

When opening the lid, the red color continues to be the dominant color tone in the design with the border around the edges, around the screen, and the plastic ring protecting the speaker. Even multimedia touch keys are also

equipped with red LEDs. Compact in those red borders is a full-sized black and glossy keyboard with both individual number keys showing the 'spaciousness' of machine body. However, I don't understand why Toshiba left the Space key shorter than usual.

Toshiba Qosmio X305-Q706 uses touchpad (touchpad) surface of the Alps, smaller than usual. If the user of the external mouse can turn off, or reactivate the touchpad, thanks to the touch button nearby, it would be better if Toshiba also used this key to simultaneously stop supplying the power as seen in the model. HP Pavilion.

This is the first model in the world equipped with 3 graphics cards, in which, 2 512 MB Nvidia GeForce 9800M GTS cards with SLI interface. *Photo: Techshout* .

Toshiba's 17-inch mirror screen Qosmio X305-Q706 has a lower resolution than the screen of conventional 17-inch laptops (1,680 x 1,050 compared to 1,920 x 1,200 pixels). But it still gives users sharp images with even small text and icons, thanks to a set of 3 graphics cards GeForce 9400M and two Nvidia GeForce 9800M GTS cards. When playing games, there is nothing to discuss, even gamers can clearly see the shadow details of the game's image. Above the screen is a 1.3 Megapixel Webcam and built-in microphone.

Toshiba Qosmio X305-Q706 owns one of the 'spectacular' speakers and has the best sound quality among

gaming laptops, with 4 stereo speakers and a subwoofer.

That is so remarkable, but this speaker system is also very annoying, especially in crowded places, with loud noises emitted when playing games or even the music starting up on Windows. And yet, the noise can also be emitted from the three fan radiators of graphics cards when the CPU and GPU accelerate processing.

Thanks to the larger size, the Toshiba Qosmio X305-Q706 is fully equipped with connectors. The edge is a USB port, an integrated USB e-Sata port. Right side is 2 USB ports, Headphone / Mic headphone jack, volume control knob, and 5-in-1 card reader with dust-proof cover. DVD drive is located on the front. The back is charging port, HDMI, FireWire, VGA and LAN port and Lock.

Comfortable wide keyboard.

Using up to 3 graphics cards, high-capacity speaker systems, 320-speed rotating hard drives of 7,200 rpm and 17-inch screen is easy to understand why Toshiba Qosmio X305-Q706 can only work at maximum. full 1 hour 30 minutes. This is the biggest drawback of the machine.

And yet, with its large size and a thick body, the weight of the X305-Q706 up to nearly 5 kg, including the charger, the mobility of this laptop deserves to be discussed.

**Advantages:**

- 3 graphics cards have powerful processing capabilities.
- Excellent sound system.
- Reasonable price.

**Defect:**

- Machine is big, thick and heavy.
- Low resolution display screen.
- Limited battery life.
