

Toshiba Satellite and Qosmio are equipped with Ivy Bridge chips

The Satellite C800, L800, P800, S800 and Qosmio X875 are about to be available with Intel Core ix CPU upgrade and GeForce 600M GPU.

The Satellite C800, L800, P800, S800 and Qosmio X875 are about to be available with Intel Core ix CPU upgrade and GeForce 600M GPU.

Toshiba continues to add troops to the Satellite, Qosimo and Excite lineup with a new range of products.

In the low-end segment, the Satellite L800 and C800 screen sizes from 14 inches to 17.3 inches are all equipped with 3rd-generation Core ix CPUs and AMD's accelerated processor options. In terms of design, the L800 series will be Toshiba's Fusion II style, while the C800 remains faithful to the traditional Fusion design. The models of the L800 and C800 series have a starting price of 449 USD and from 399 USD.

Satellite L840.

In the higher segment, the all-new Satellite P800 and S800 series are equipped with better configuration for high performance performance. Both series are equipped with Ivy Bridge CPU chips or use AMD graphics processors. GPUs can upgrade to GeForce 630, but currently only for P800. Features like WiDi, USB 3.0, Blu-ray, HDD impact sensor, SRS speakers are all available.

P800 and S800 prices start at 799 USD and from 699 USD.

Satellite S840.

Toshiba also added the Qosmio gaming laptop line with the latest two models, the Qosmio X875 and X875 3D, with strong configuration. Both models are equipped with Ivy Bridge chips with 3GB Nvidia GTX 670M GDDR5 graphics chip. In particular, X875 is a 3D version, with 17.3-inch screen with the ability to perform 1080p video, SRS 3D sound, equipped with 4 USB 3.0 ports, 4 RAM slots.

Qosmio has a retail price of \$ 1,299 to \$ 2,499 with the highest configuration version.

Qosmio X875.

New products will be officially distributed in the market from the third quarter of 2012. Private Satellite P800 will offer the yard earlier through Best Buy's system. This series will come to users from June 24.
