Introduced with the first Blu-ray Blu-ray player from Toshiba, BDX200, at IFA 2009 electronics fair in Berlin (Germany), Toshiba Satellite P5000 is a powerful entertainment laptop with big screen 18.4-inch, using Blu-ray ROM drive, compatible with two BD-R formats, BD-RE and also capable of Blu-ray disc burning, as well as reading and writing DVD of 2 universal classes

In addition to the 18.4-inch widescreen 16:9 aspect ratio, 1,920 x 1,080 pixel resolution, it also has an HDMI port that allows connecting to large HD monitors to enjoy movies from Blu-ray discs. In addition, the device will be equipped with the latest Intel Core 2 Duo processor and 4 GB RAM capacity. Besides the powerful Nvidia graphics card, it has not been disclosed yet, and the high-end Harman Kardon speaker system often appears in Toshiba gaming laptops.

The Satellite P5000 will also inherit the most advanced technologies from Toshiba TV-HD such as Regza-Link

(HDMI-CEC), allowing the use of TV controls to adjust Blu-ray playback on laptops. It also has a USB charging port, which you can plug into devices like music players or phones even when you turn off your laptop. Multi-touch touchpad supports movement of multiple fingers to perform tasks when surfing the web, zooming in and out of photos, text .

The Satellite P5000 will soon be available in October, however, Toshiba has yet to disclose the price for this entertainment laptop.
