

Toshiba Ultrabook supports touch, voice control

The company's new products are 14 and 15 inches in size, belong to the Satellite E series, which possess a mid-range configuration with many attractive features priced from 800 USD.

The company's new products are 14 and 15 inches in size, belong to the Satellite E series, which possess a mid-range configuration with many attractive features priced from 800 USD.

New Satellite E models run Windows 8. Operating system (*Photo: Electronista*).

Satellite E45t, E55t and E55Dt models use a touch screen that supports up to 10 fingers at once and a resolution of 1,366x768 pixels. Users can choose either Intel or AMD chip version. In particular, Intel microprocessor model is equipped **with Dragon Assistant voice control** and **Intel WiDi wireless slide show** . The other version uses four-core AMD A6 chips and Radeon graphics cards.

The 14-inch model does not have a number key. (Photo: *Electronista*).

In addition, Toshiba also allows users to choose one of two hard drive capacity of 500 GB or 750 GB. Its new Ultrabook supports connections like HDMI, Ethernet, USB 3.0, USB 2.0, Wi-Fi dual-band.

Besides, it also has an integrated SD memory card reader and uses stereo speakers with built-in DTS audio technology. A difference between the 15.6-inch model and the 14-inch model is that the device is equipped with a series of numeric keys.

As expected, Satellite E45t will be sold on Best Buy's website from **August 4** with a starting price of **800 USD** (about 17 million VND). For the 15.6-inch model, which is expected to be released in **September** this year, it is unclear what the price is.
