Toshiba has introduced a new ultrabook called Portege Z830. This is considered an upgrade of the Portege Z830 model with Intel's latest Ivy Bridge processor. The design of this product is almost the same compared to the Portege Z830 model.

Regarding basic configuration, Portege Z930 uses Intel Core i5-3317U chip with speed of 1.7GHz, 6GB RAM and 128GB SSD. Meanwhile, the highest-end model uses a 2GHz chip along with a 256GB SSD. In addition, the Portege Z930 is also equipped with Bluetooth 4.0 connectivity, HDMI, VGA and Ethernet. According to Cnet, the Z930 version for the US market will have a backlighting support keyboard while the Asian version is not.

Toshiba Portege Z930 will have a starting price of 1,699 SGD (US \$ 1,365.10).
