

Toshiba unveiled 3D laptop without glasses

Toshiba has introduced the Qosmio F750 laptop, the world's first 3D laptop model without glasses when watching movies or playing 3D games.

Toshiba has introduced the Qosmio F750 laptop, the world's first 3D laptop model without glasses when watching movies or playing 3D games.

As with the **Toshiba Qosmio T851 / D8CR** model, announced in April 2011, the **Qosmio F750** can display non-glass 2D or 3D content on its 15.6- inch screen.

Toshiba's glasses-free 3D technology in turn provides separate images slightly different between the left eye and the right eye to create an effect. Requesting this live view means that you can't watch 3D movies with other people, because then the camera's HD webcam will track your eye activity, but at least you don't need to "stick" with your glasses. inconvenient when watching movies.

The Qosmio F750 is designed for multimedia entertainment. It features a Full HD (1920 x 1080 pixel) display, Nvidia GeForce GT 540M graphics card (up to 2GB), Blu-ray recorder and Harman Kardon speaker system. It has 6GB of RAM and uses the second generation Intel Core i7 processor.

Toshiba said that the Qosmio F750 laptop is aimed at business users, professionals and designers who need to demonstrate 3D content. With a glossy glossy red sport cover and 3D entertainment without glasses, this laptop model is also suitable for individual users. The machine is expected to be sold in August 2011.
