

Toshiba Vietnam launches notebook collection for summer 2011

The trio of new Satellite L700 laptops, Satellite E300 and Portégé R830 with many improvements in design and technology have been officially introduced by Toshiba Vietnam for the summer of 2011.

The trio of new Satellite L700 laptops, Satellite E300 and Portégé R830 with many improvements in design and technology have been officially introduced by Toshiba Vietnam for the summer of 2011.

Satellite L700 series versatile

Toshiba Satellite L700 series is equipped with the latest 2nd generation Intel Core processor and HD widescreen display using Clear SuperView technology with LED backlight, integrated Webcam, optical drive read / write DVD, connection High speed N standard cable, Bluetooth 3.0 and USB 3.0 super speed.

L700 has 3 screen size options: Satellite L730 / L735 has a light weight with 13.3-inch screen, versatile Satellite L740 / L745 series, with 14.0-inch screen size, slightly larger than L750 / L755 with 15.6 inch screen is a desktop replacement solution.

The Satellite L700 also includes a flat-panel keyboard and a large touchpad. In addition, the product is also equipped with nVidia dedicated graphics card for improved multimedia performance.

Using Toshiba Fusion Finish with 3D dots, L700 series has 5 color options: black, hazel, red, silver and pearl white.

Satellite E300 supports wireless image display

Satellite E300 features a newly designed Champagne color, accentuated with an ultra-light Aluminum alloy case and a sturdy chicklet keyboard with LED backlighting and a seamless mouse button.

The E300 is equipped with the 2nd generation Intel Core processor that provides improved speed performance as well as image integration for a better entertainment experience.

New generation Intel Wireless Display 2.0 (WIDI 2.0) technology helps users wirelessly connect computers to a large HDTV and enjoy digital content with great definition and sound. In particular, users can connect an MP3 player to your laptop to enjoy music even when your computer is turned off.

The Satellite E300 has a 14-inch wide screen with LED backlight integrated with Windows Home Premium, a large capacity hard drive up to 640GB, DDR3 RAM up to 4GB, Wireless standard N, Bluetooth V3.0, USB 3.0 and HDMI port. Machine weighing 2.24kg.

The Portégé R830 is extremely thin and light

Weighing only 1.40kg, the Portégé R830 has a 13.3" screen (33.782 cm) with 3 different colors: Black metallic, metallic blue and metallic red.

The 'Airflow Cooling' cooling system co-developed by Intel and Toshiba allows Toshiba to integrate into the latest Portégé R830 Intel Core processor while keeping the fan running smoothly, quiet and quiet.

The honeycomb structure of the chassis in some areas of the body of the Portégé R830 makes it extremely durable, resisting vibration, dented, which helps to extend product life. Similarly, electronic and mechanical components are also protected with a durable magnesium frame.

To improve availability and shorten boot times on laptops, the new Portégé R830 series has the new and unique 'Open - Turn on' feature available from Toshiba, allowing users to turn on the device Simply open the screen cover when the computer is still off or in sleep or hibernate mode.

Despite its slim design, the Portégé R830 is still equipped with an optical drive like other popular laptops.
