

Translate text into other languages ??in Microsoft Word 2007

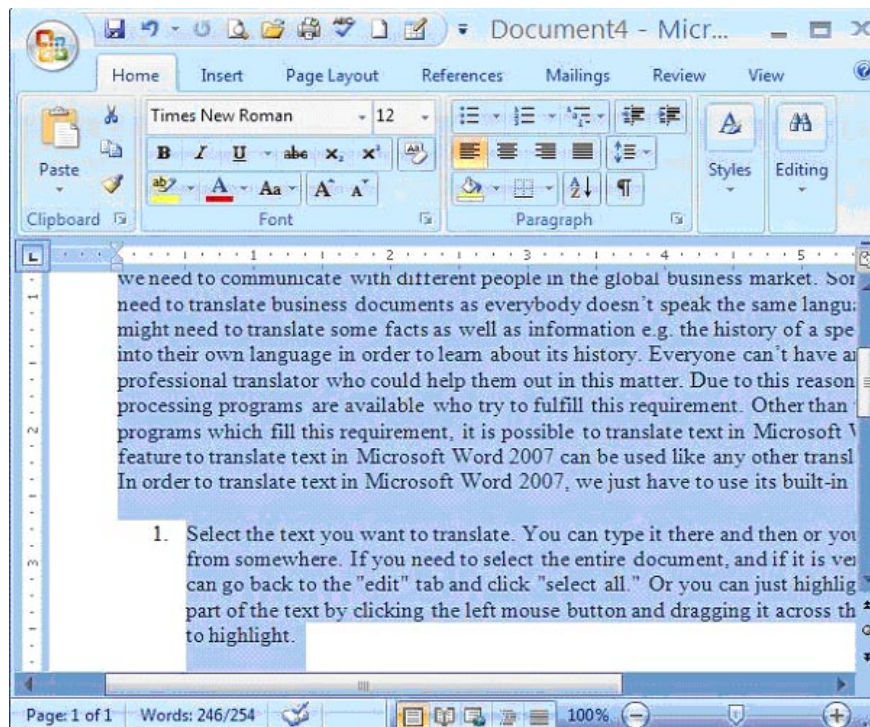

Faced with language problems, word processing programs have been launched. This program can translate text from different languages ??in Word 2007.

TipsMake.com - The world is becoming more and more like a large village where you need to communicate with others culture and language. We get to know other people online or have to deal with foreign businesses. Sometimes, businesses need to translate business documents of foreign businesses. For students, they may have to translate some information related to the history of a country that they study.

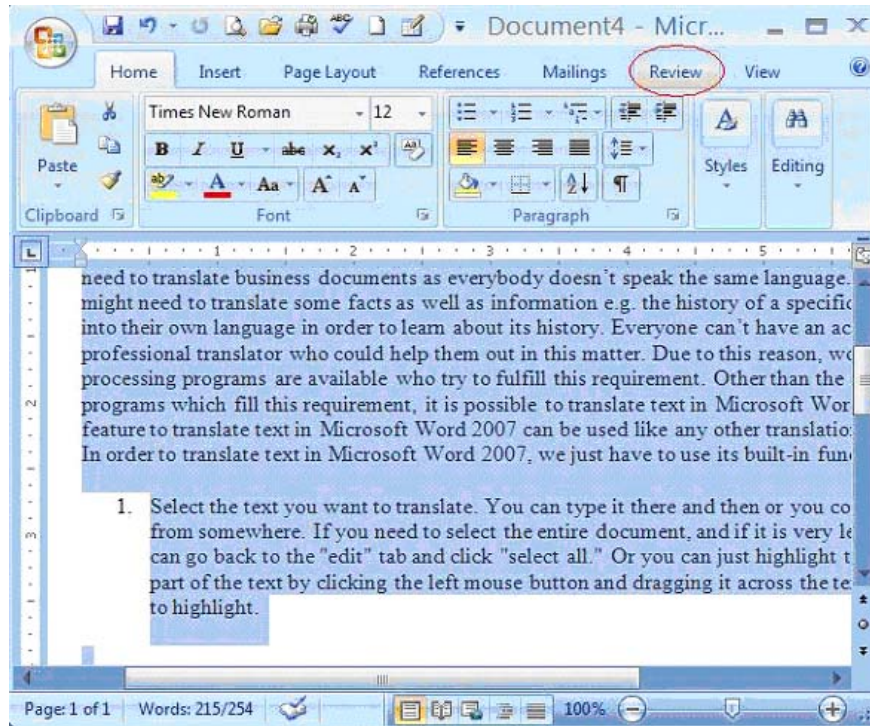

Therefore, people need the help of a professional translator who can help them solve language problems. Faced with these problems, Word processing program was launched. Text translation features in Microsoft Word 2007 are used as other translation programs. To use this feature, we just need to install its built-in function.

Follow these steps to translate text into another language:

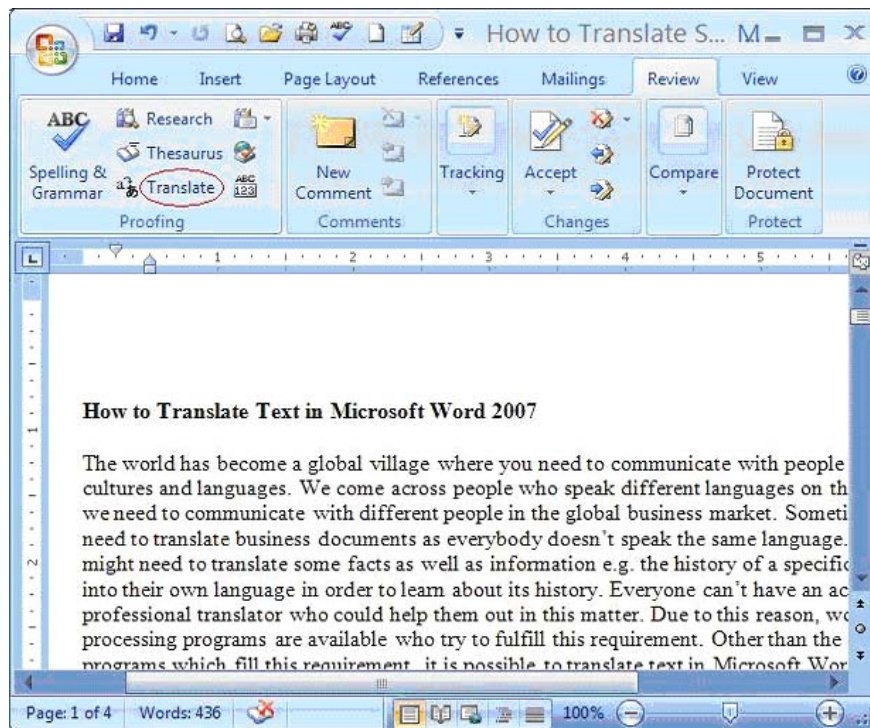

Select the language you want to translate. If you want to select all text to translate but this text is very long, you can return to the card ' **edi** ' select ' **select all** '.

Click **Review** in the Menu bar

Select **Translate** on the *Review* tab

A language table will appear on the right, select the target language you want to translate. This is where you can choose the target language or the source language to translate.

The selected or blackened text will be translated in the lower part of the table. You can get the translation after you select the target language under the 'To' option.

English (U.S.)

To

French (France)

Translate the whole document.

Translation options...

Microsoft® Translator

Le monde est devenu un village planétaire où vous avez besoin pour communiquer avec des personnes de diverses cultures et langues. Nous rencontrons des personnes qui parlent des langues différentes sur internet, ou nous avons besoin de communiquer avec des personnes différentes dans le marché

If the language you need to translate is not in the list of languages that have been added, click on **Translation options** and choose the language you need.

This useful feature in Microsoft Word 2007 is very convenient. However, it cannot replace the position of a professional translator because the translator has the ability to translate softer, more meaningful with their cultural and artistic insights. Therefore, you can translate documents with the translation program in the machine but will lack the depth and meaning.
