

T-rex dinosaur confronts Titanoboa, the largest giant python in Earth's history

T-rex, tyrannical dinosaurs and giant Titanoboa are all terrifying carnivores with the ability to prey on art. However, what if these two hunting players meet?

T-rex, tyrannical dinosaurs and giant Titanoboa are all terrifying carnivores with the ability to prey on art. However, what if these two "high-profile" hunters meet?

1. Giant pythons devoured goats and were caught
2. 10 most dangerous prehistoric carnivorous dinosaurs

Tyrannosaurus (T-rex), an extremely ferocious and terrifying tyrant dinosaur that lived in the late Cretaceous period. T-rex is not the biggest dinosaur, but with the strongest bite force on the ground, they are the predators of the food chain in their time.

The front limbs of T-rex are very small, disproportionate with a large, strong limb, but T-rex remains the most feared and successful predator that nature has ever created.

If T-rex was dubbed the "tyrant", the lord of the dense forests and ancient needles, Titanoboa was dubbed the "jungle lord" to dominate the swamp in the heat of the forest. zone. With a body length of about 13m, weighing more than 1.3 tons and the thickest point on the body up to 1m wide, Titanoboa is the largest snake in Earth's

history. With the huge and powerful jaws of the "dead" bite, the Titanoboa python can easily enjoy delicious crocodiles, giant turtles .

If someone with a strong bite force doubled the white shark to a giant python with a scary force of 181 kg / 0.0254 m², which one would win?

The hypothetical battle between tyrannical dinosaurs and ancient giant pythons.(Source: Youtube / Smithsonian Channel.)

Between T-rex and Giant Python Titanoboa, their ability to win is equal. The giant python seems to be weak and has to pay dearly because of T-rex's sharp teeth but it possesses a weapon to help it defeat many of its great opponents in its time, which is the force. Terrifying tight.
