

# Trick to speed up Start Menu on Windows 10

The Start Menu is one of the highlights of the Windows 10 operating system. In particular, the Start Menu on Windows 10 has higher customization capabilities than other operating systems. However, many Windows 10 users feel uncomfortable with this feature because of the slow boot speed like slugs.

The Start Menu is one of the highlights of the Windows 10 operating system. In particular, the Start Menu on Windows 10 has higher customization capabilities than other operating systems.

However, many Windows 10 users feel uncomfortable with this feature because of the "slow slug" boot speed.

## 1. Why is Start Menu starting so slow?

The reason for slow Start Menu is because Microsoft has saved so many visual effects and animations from earlier to customize Start Menu less boring.

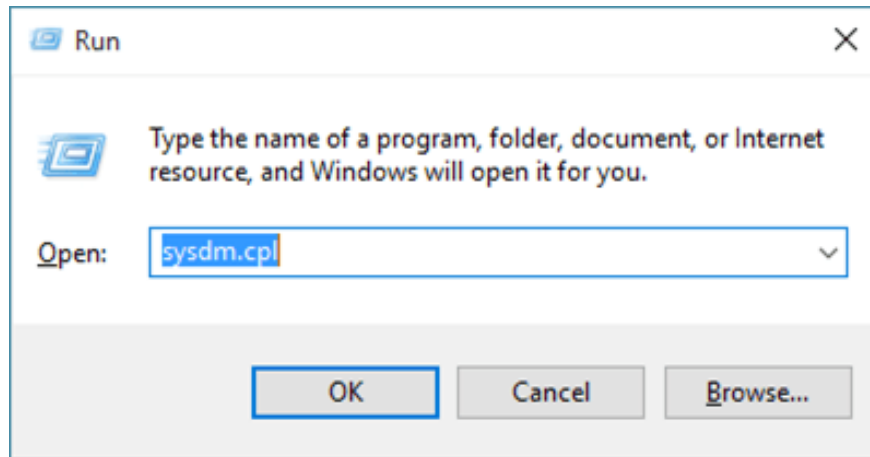

For Start Menu to start faster, you only need to maximize and minimize the entire effect available in Windows 10.

## 2. Accelerate Start Menu on Windows 10

### Step 1:

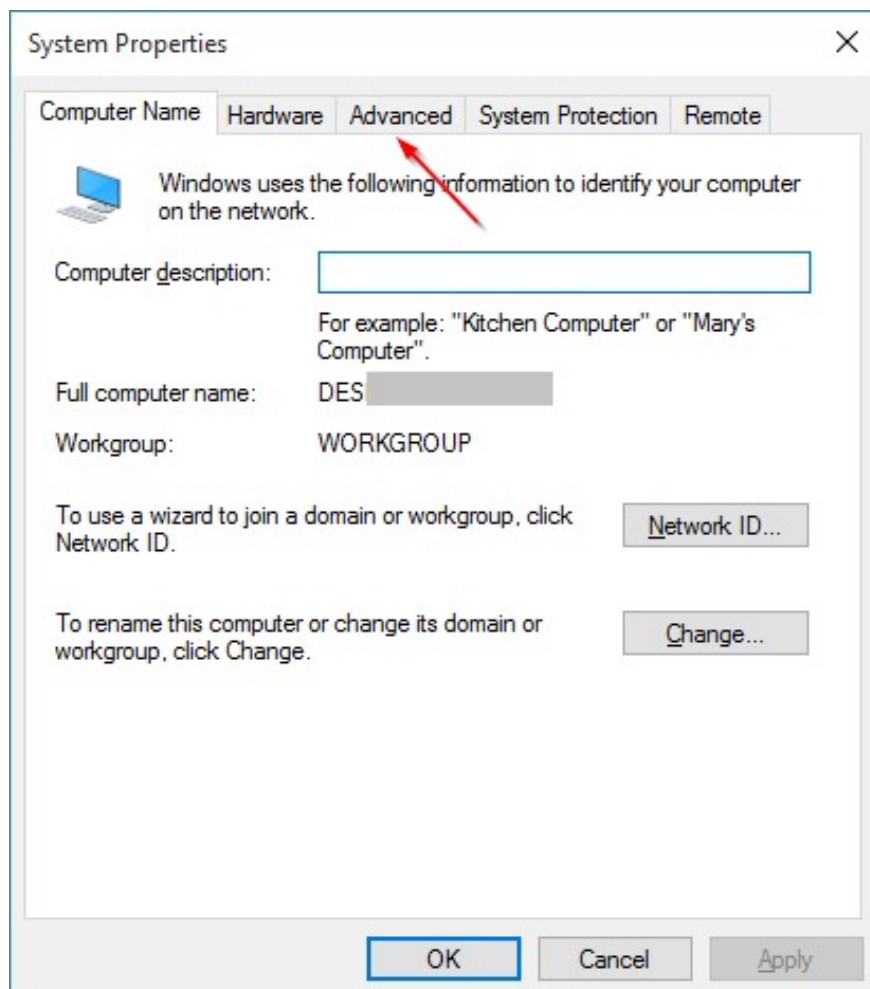

Press **Windows + R** key combination to open the Run dialog window.

## Step 2:

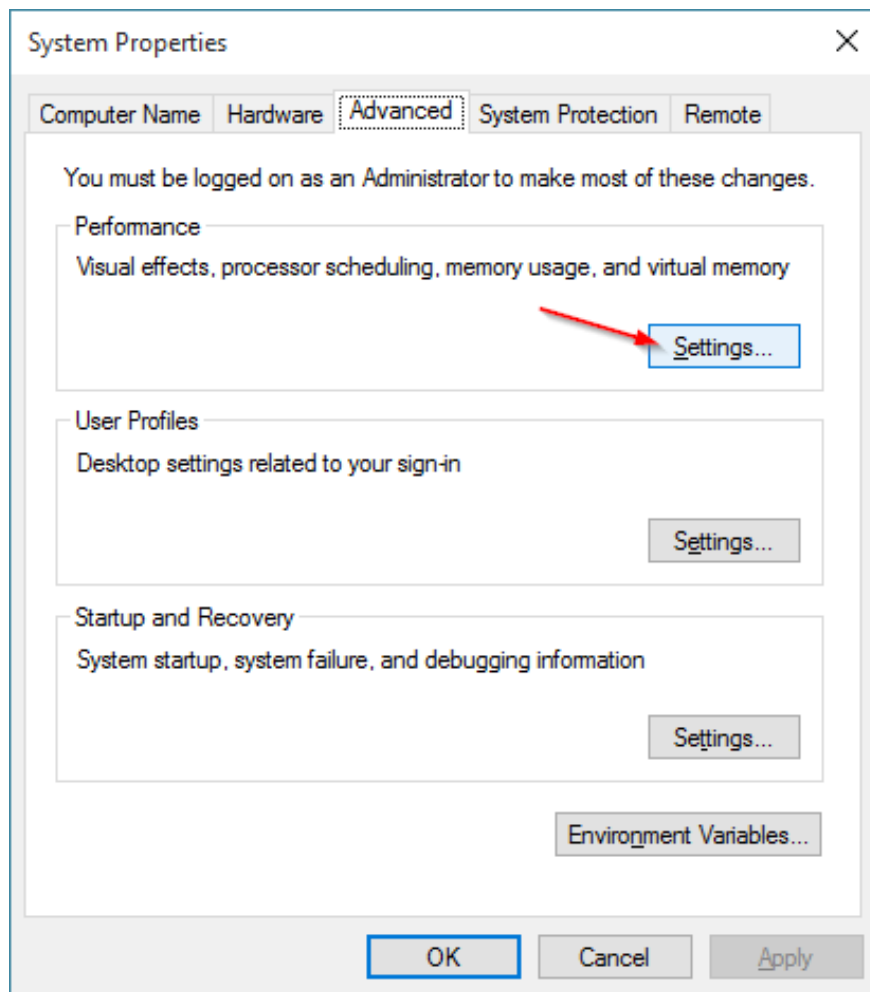

On the Run dialog window, enter **Sysdm.cpl** and press Enter to open the System Properties dialog box.

## Step 3:

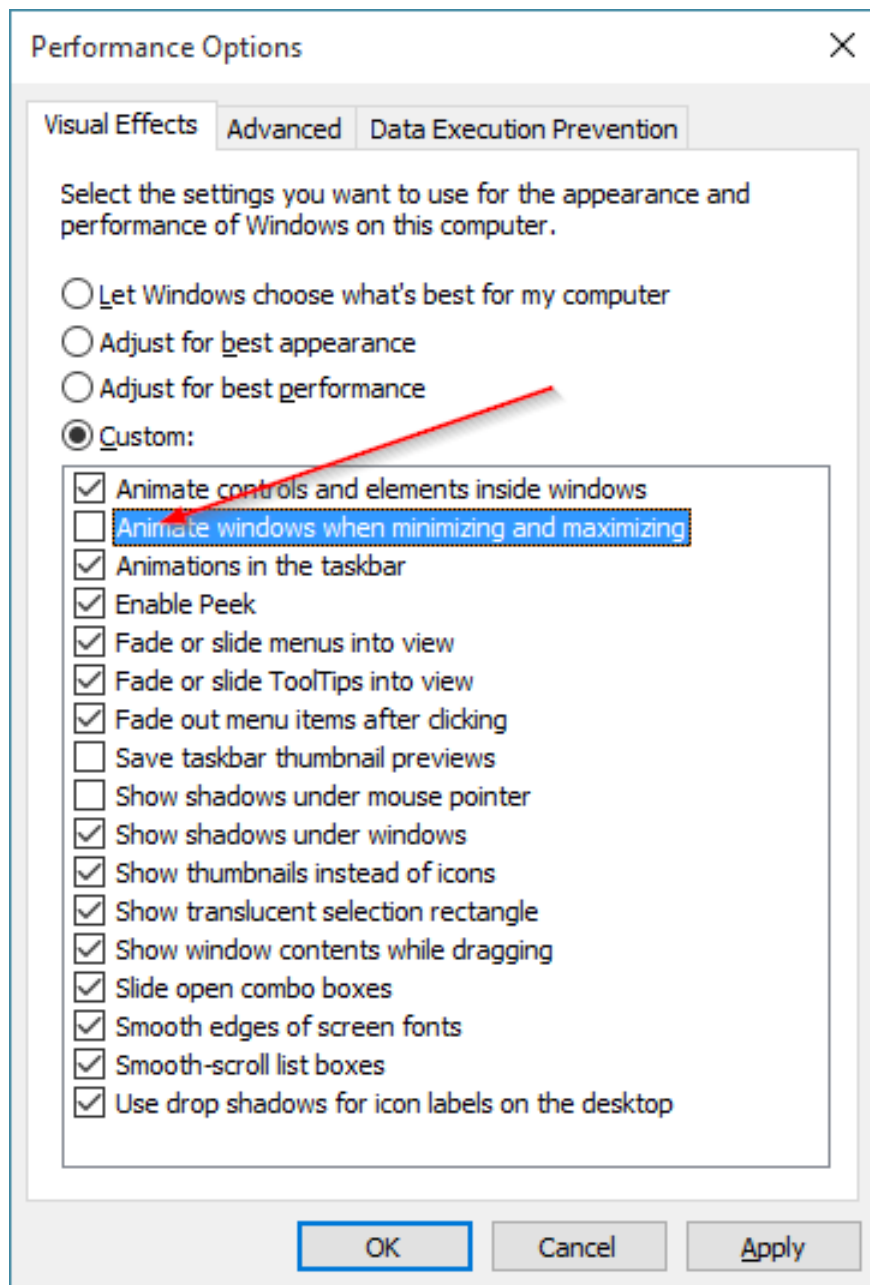

In the System Properties window, click the **Advanced** tab .

**Step 4:**

Under Performance, click **Settings** to open the Performance Options dialog box.

**Step 5:**

At the Performance Options dialog window, in the Visual Effects tab, you will see a list of visual effects displayed for features on Windows 10.

Here you uncheck the **Animate windows when minimizing and maximizing section** then click **Apply** to Start Menu to start up faster.
