

# Tricks turn videos into wallpapers for smartphones to come alive

TipsMake - The following article will guide you how to turn a video into a wallpaper for smartphones, making your mobile device screen more vivid and unique.

Normally, users often choose beautiful and satisfactory images as a wallpaper for their smartphone. Over time, however, you find animations that make smartphone screens familiar and boring.

So why not try turning a video into a wallpaper, making smartphone screens more vivid and unique?

**Video Wallpaper** is a free application that allows users to choose a favorite video to turn into a wallpaper and lock screen on a smartphone. In particular, the sound of the video is retained when used as a wallpaper.

Besides selecting the videos available on the smartphone as a wallpaper, Video Wallpaper also provides users with a diverse and beautiful video collection to be able to select and use as a wallpaper for smartphones.

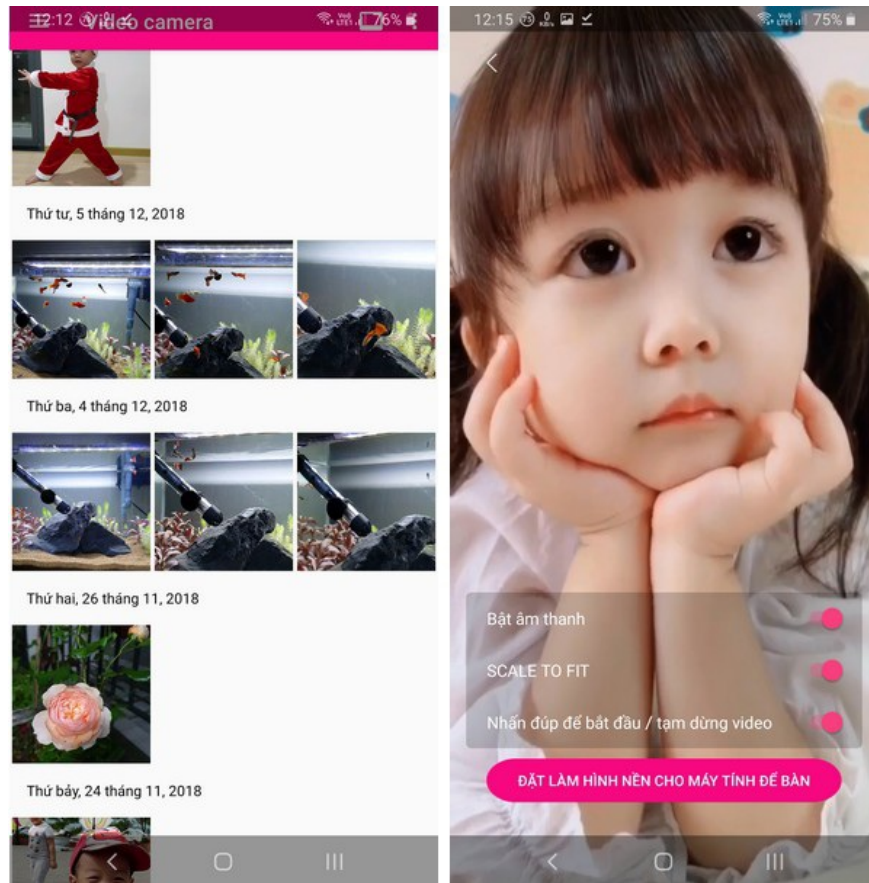

*Note: when using video as a wallpaper similar to live wallpapers, only displayed when the user accesses the main screen of the smartphone, so when using video as a wallpaper is not really costly. Too much battery as many people worry.*

Currently the app is only available for Android. Readers can find and install from the Google Play app store for Android.

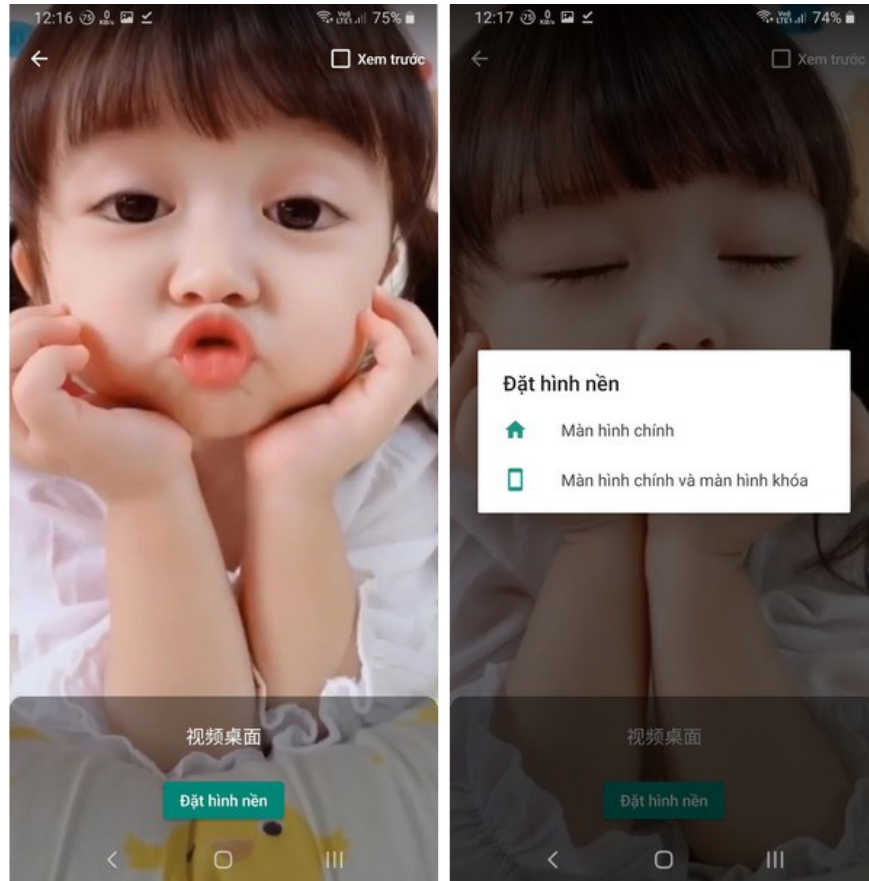

The first time you use the application, you must press the 'Allow' button from the dialog box that appears to grant permission, allowing the application to access and use the videos on your smartphone as a smartphone wallpaper.

The main interface of the application will list all the videos available on the smartphone for users to choose and make wallpaper. You should only choose videos that are shot vertically as wallpapers because they fit the size of your smartphone screen.

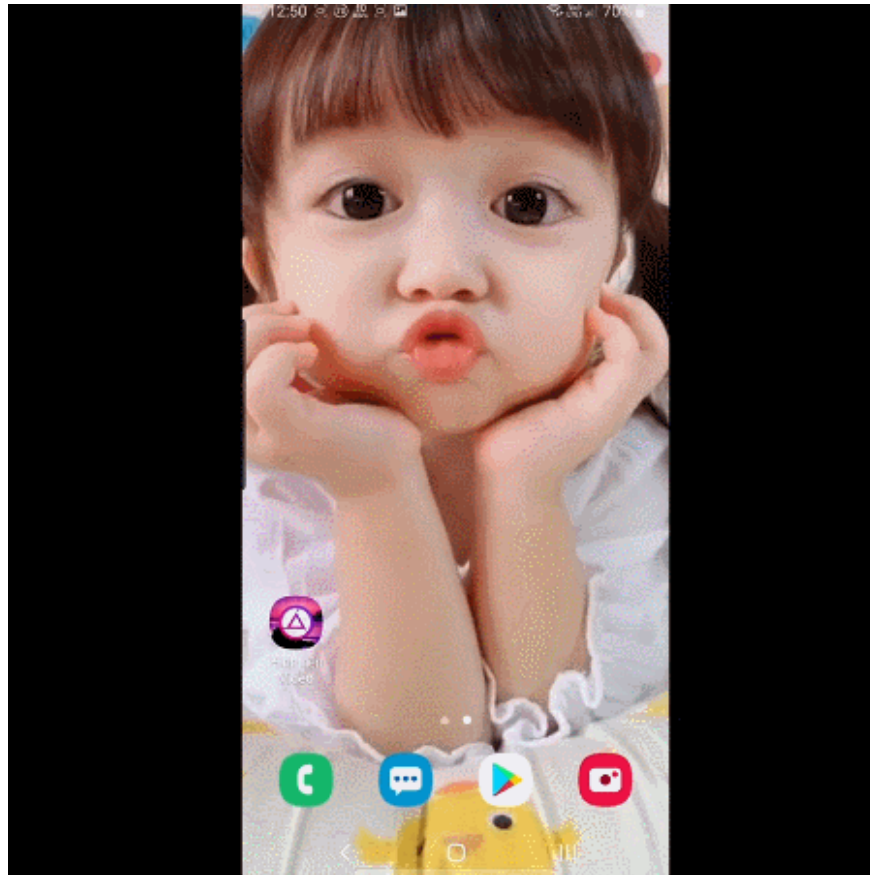

After selecting the video file that you like to use as a wallpaper for your smartphone, from the interface that appears, select the 'Turn on sound' option if you want to keep the sound of the video file as a wallpaper, select 'Scale to fit' to adjust the video file size to fit the smartphone screen. Finally select 'Set as wallpaper for desktop'.

Then press the button 'Set wallpaper' from the interface that appears. The application will allow users to use the video as a wallpaper for both the home screen and the lock screen on smartphones, you have the option to set the video as the wallpaper in the position you want.

Now, the video file you have chosen has been set to be the background for the smartphone, making the smartphone screen more vivid and unique.

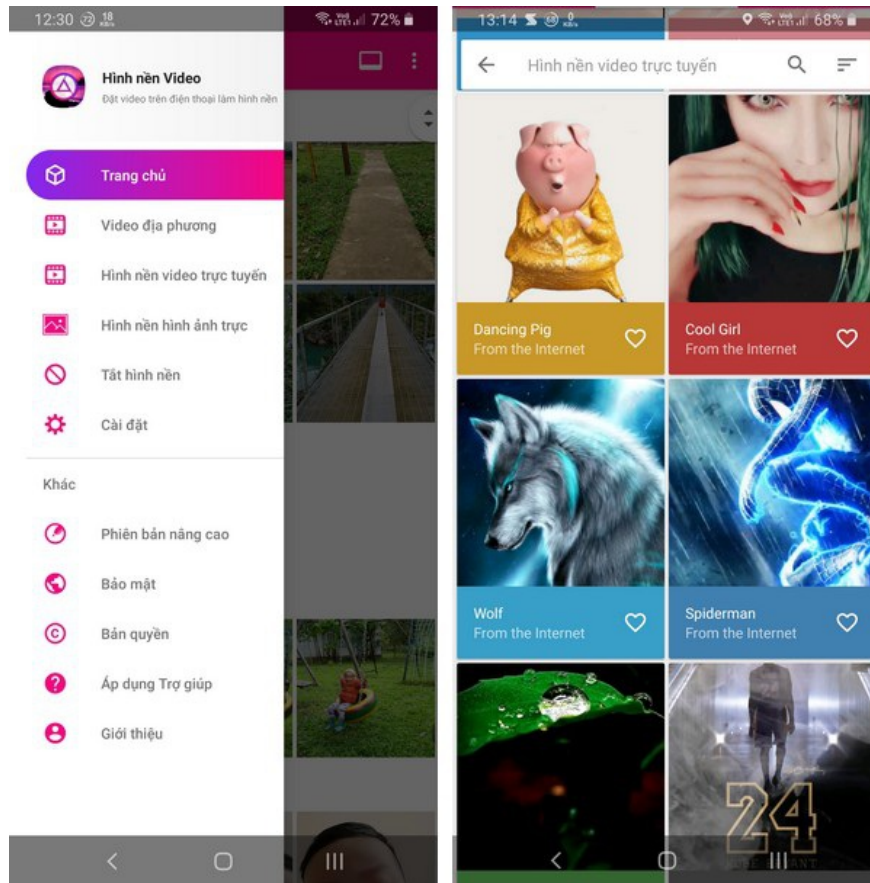

The video has been turned into a smartphone wallpaper

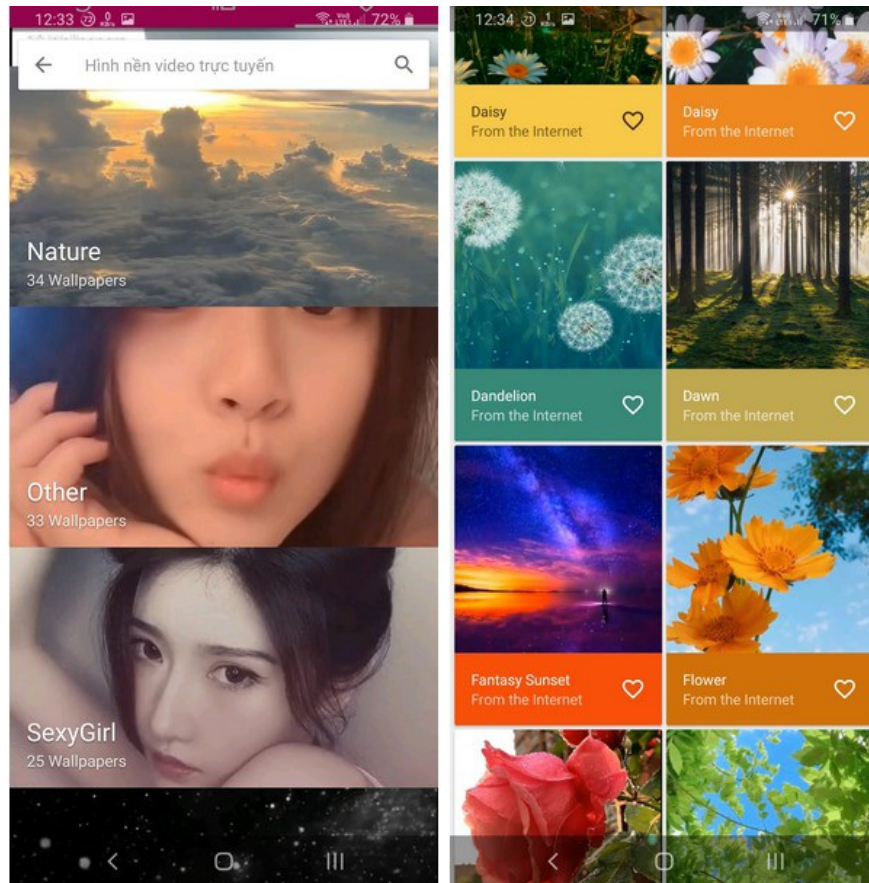

### **Use beautiful video wallpapers provided by the application**

Besides using the videos available on smartphones as wallpapers, the application also provides users with a pretty impressive and beautiful video store to choose and use as a wallpaper for smartphones.

To use this feature, from the main interface of the application, click the Menu button in the upper left corner, then select 'Online video wallpaper'. Here the application will list the videos selected by many app users to serve as wallpapers for their smartphones.

From this interface, you can swipe left to display video wallpapers as themes. The application divides video wallpapers in the form of topics such as abstract backgrounds, animals, landscapes, space . you can access each topic to choose the wallpaper that you like best and then. as shown above to turn a video into a wallpaper for your smartphone.

In case you want to go back to the old wallpaper on your smartphone, just remove the Video Wallpaper application from your device.

Overall, Video Wallpaper is an interesting application that makes your smartphone screen more unique and impressive.
