Inspiron Duo is Dell's netbook model, but the flip screen can be used as a tablet.

Dell said that the company has not yet priced this model in Vietnam market. **The Inspiron Duo** has a special design, which can be used as a netbook but when you flip the screen back, the device takes the form of a tablet computer.

This model uses 1.5 GHz Atom N550 dual-core processor, 2GB RAM, 250GB hard drive and Broadcom Crystal HD graphics accelerator. The device runs on Windows 7 Home Premium operating system, when operating with tablet mode, Duo uses Dell's "Stage" interface.

The Duo's inconvenience is a long-running device, even when using a tablet-like function. Also, if it is a netbook, the design is quite good, but in tablet form, this model looks quite thick by the keyboard below.
