

# Turn off sound effects on Facebook

Facebook has just released a new update for users using Android and iOS devices, adding new features. In particular, the ability to create sound effects when commenting is sometimes annoying.

**Facebook has just released a new update for users using Android and iOS devices, adding new features. In particular, the ability to create sound effects when commenting is sometimes annoying.**

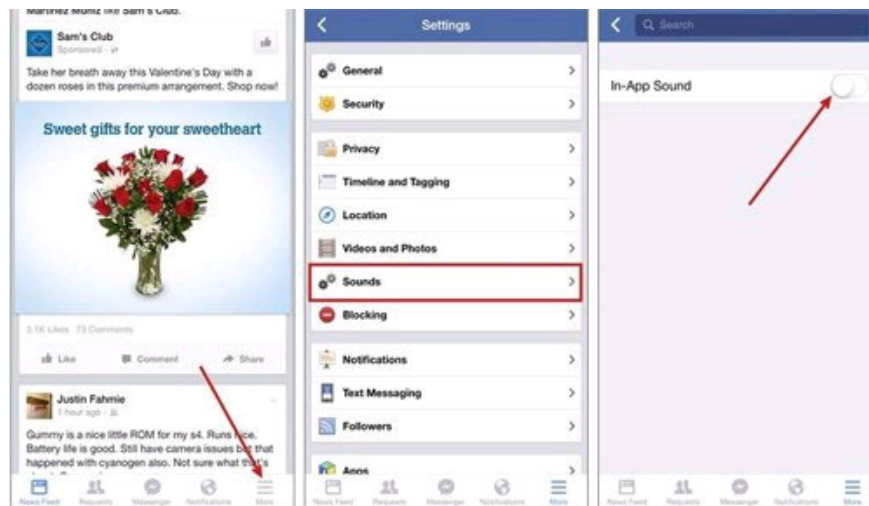

It is possible to turn off sound effects on Facebook simply

If you want to disable this sound effect, users can follow the following tips:

## On iOS devices

1. Activate the Facebook app on the device, then click the **More** option located in the lower right corner of the app.

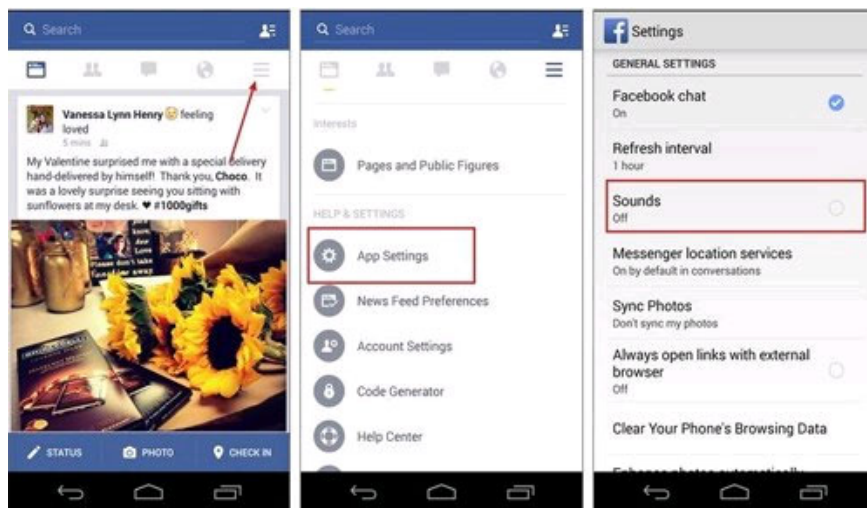

Operation performed on iOS

1. In the interface that appears, click the **Setting / Sound option**.
2. In the **In-App Sounds section** , slide the slider to **Off mode**.

## On Android device

1. Activate the Facebook application on the device, then click the More option ( *3 dash icon* ) located in the upper right corner of the application interface.

Operation done on Android

1. In the interface that appears, click the **App Setting** option .
2. In the **Sounds** section, switch to **Off mode** .
