

Turn off Windows 10, 11 updates completely - Turn off Windows 10, 11 Update

Turning off Windows 10 and 11 updates helps your computer operate stably and without errors while updating. Here's how to completely turn off Windows 10, 11 updates - Turn off Windows 10, 11 Update.

Turning off Windows 10 and 11 updates helps your computer operate more stably and not encounter silly errors in new Updates. In this article, TipsMake shares with you the most detailed way to turn off Windows 10 and Win 11 updates.

1. Turn off Windows 10/11 updates in Settings

The Settings tool on Windows allows users to 'pause' Windows 10 and 11 updates for up to 5 weeks. After 5 weeks, you can continue to pause updates if you want. In case you just want to turn off updates temporarily and still want to receive the next update later, this is the most effective way.

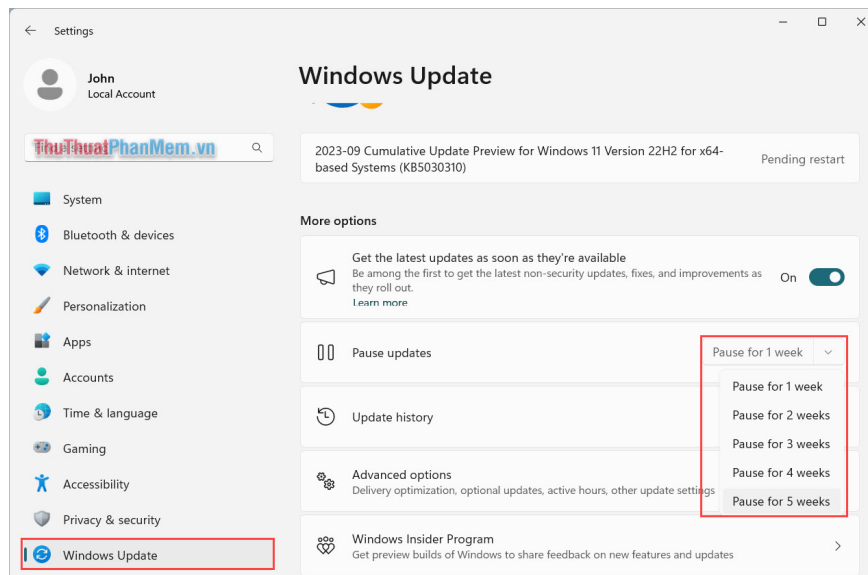

Step 1 : Open **Start** , select **Settings** to open settings on Windows (*or press Windows + I*) .

Step 2 : In **Settings** , select **Windows Update** to set up Windows updates.

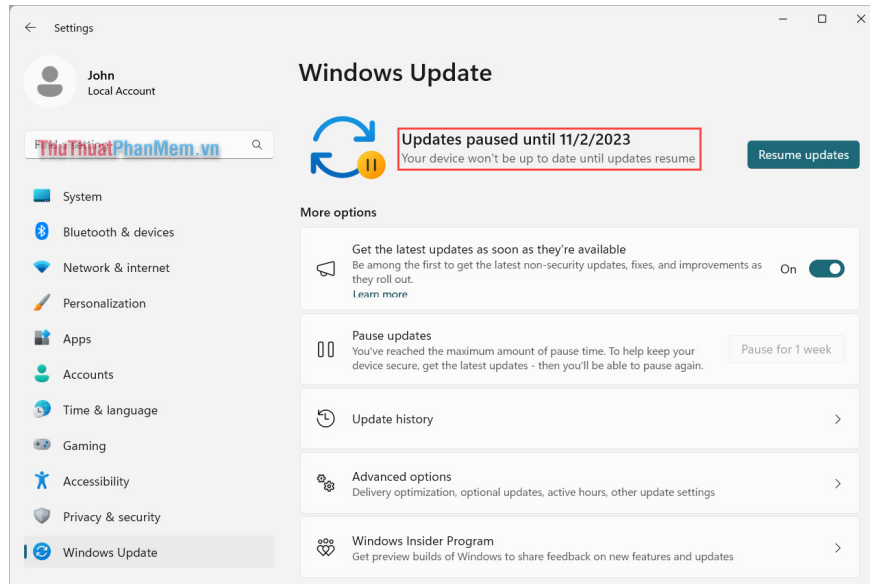

Here, you will see the Pause **Updates** section , select the time you want to pause Windows updates.

1. **Pause for 1 week** : Pause updates for 1 week
2. **Pause for 2 weeks** : Pause updates for 2 weeks
3. **Pause for 3 weeks** : Pause updates for 3 weeks
4. **Pause for 4 weeks** : Pause updates for 4 weeks
5. **Pause for 5 weeks** : Pause updates for 5 weeks

Step 3 : Immediately, you will see the system display the message **Updates Paused Until** . completed. So you have successfully turned off Windows updates.

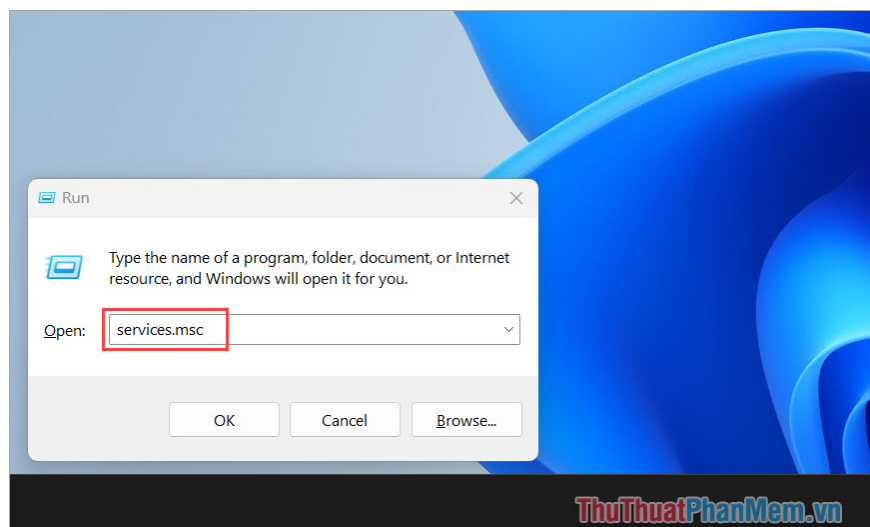

When you need to re-enable update mode on Windows 10, 11, select **Resume updates** .

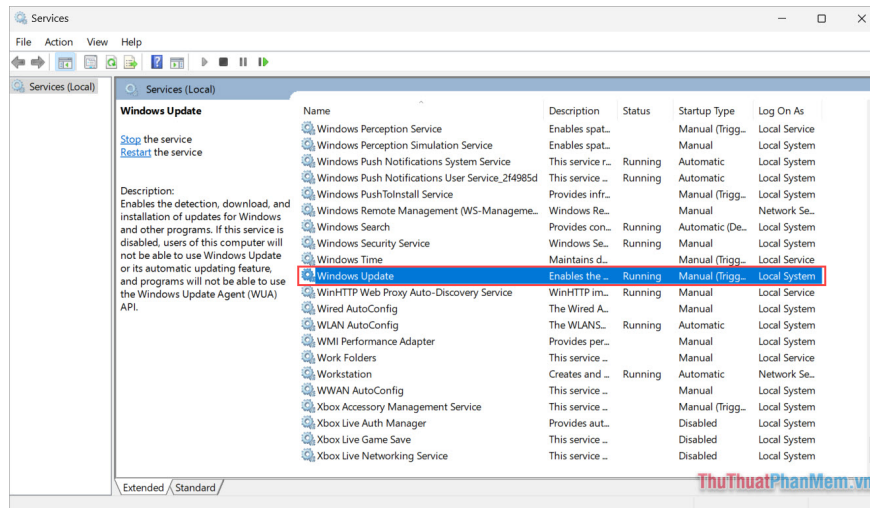

2. How to completely turn off Windows 10 and 11 updates using Services

Services is a service management tool on Windows 10 and 11 and allows users to quickly turn on and off the automatic Windows update feature. Based on the Services tool, you can completely turn off the update feature permanently so that your computer becomes stable and does not encounter minor errors during the update process.

Step 1 : Press **Windows + R** to open the **RUN** window and enter **Services . msc** to open the Windows services panel.

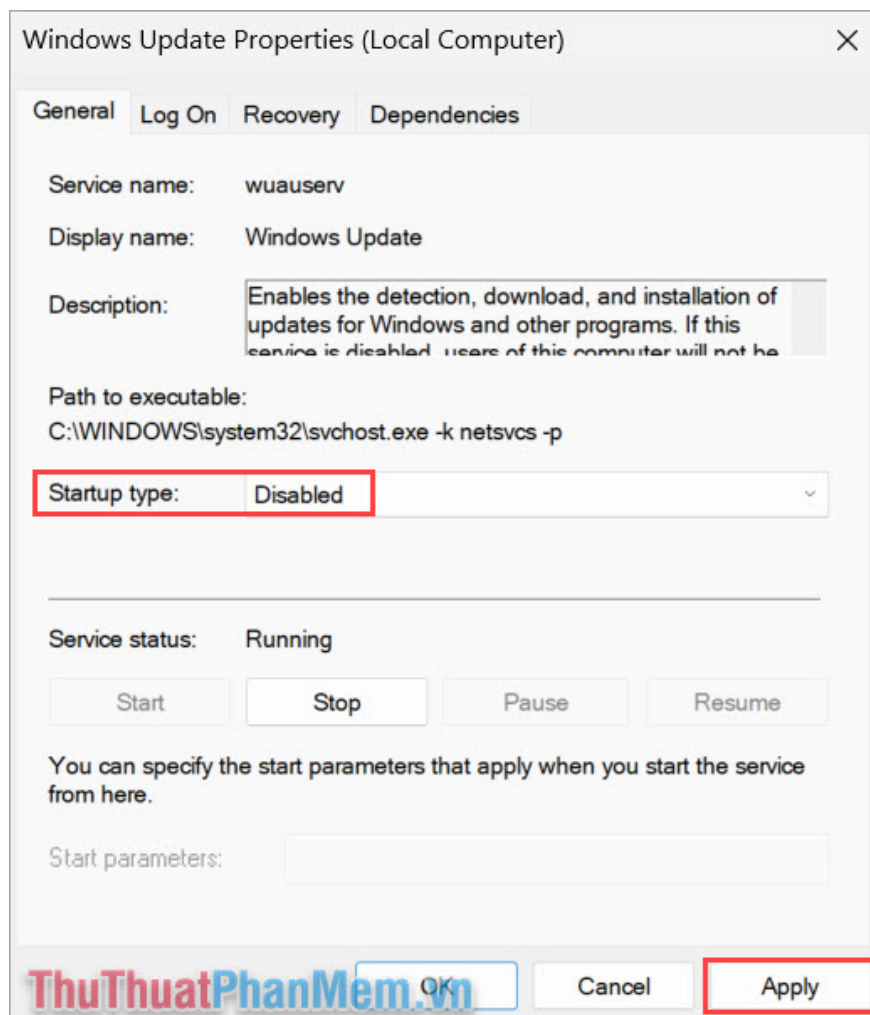

Step 2 : Then, find the **Windows Update** tab and double-click to open it.

Step 3 : In the **Windows Update Properties** setting window , switch **Startup type** to **Disabled** and select **Apply** to apply.

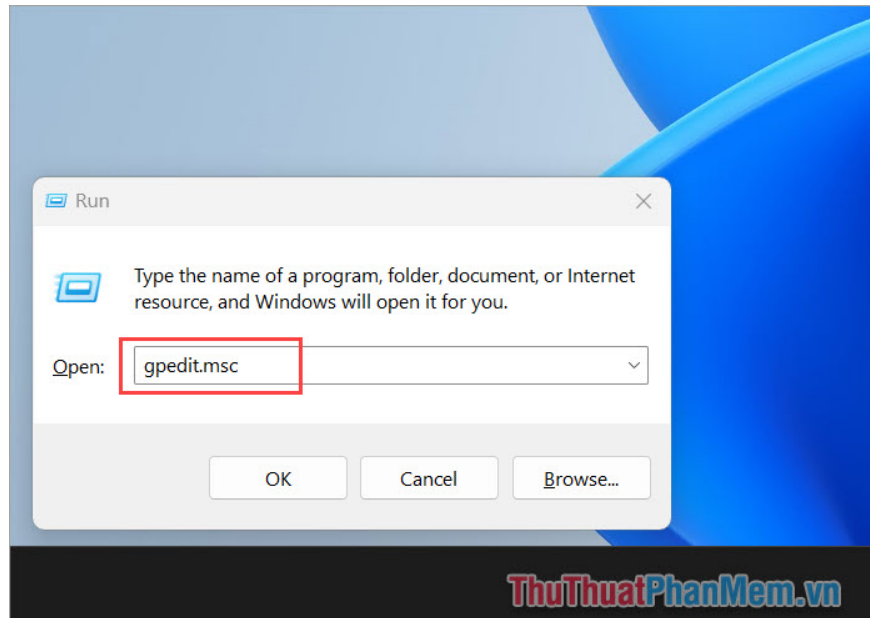

So, you have completed permanently turning off Windows 10 and 11 updates on your computer. Later when you want to open the update again, follow the same steps and change **the Startup type** to **Automatic** .

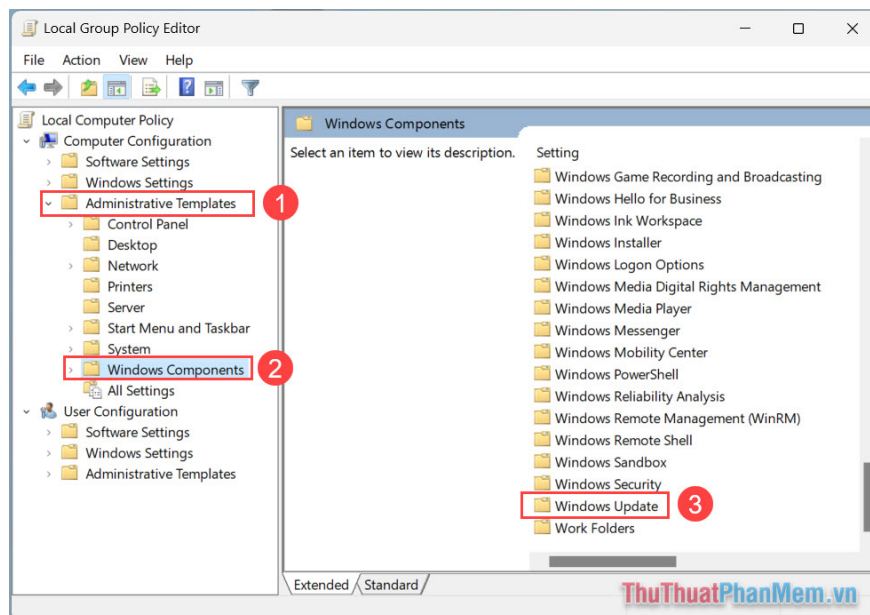

3. Turn off Update Windows 10 and 11 completely using Local Group Policy

Local Group Policy allows you to set up everything on Windows 10, 11, including completely turning off Windows 10, 11 updates. To completely turn off updates on Windows 10 and 11, do the following:

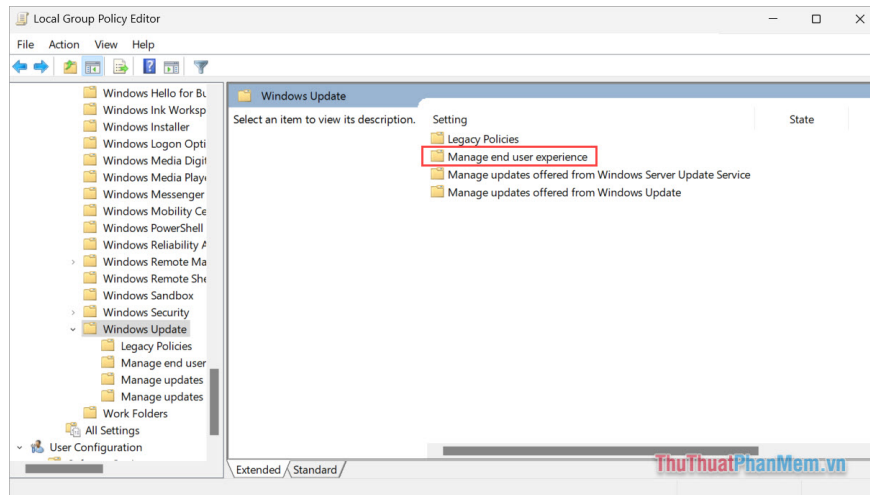

Step 1 : Press **Windows + R** to open **RUN** and enter **gpedit.msc** to open Local Group Policy Editor.

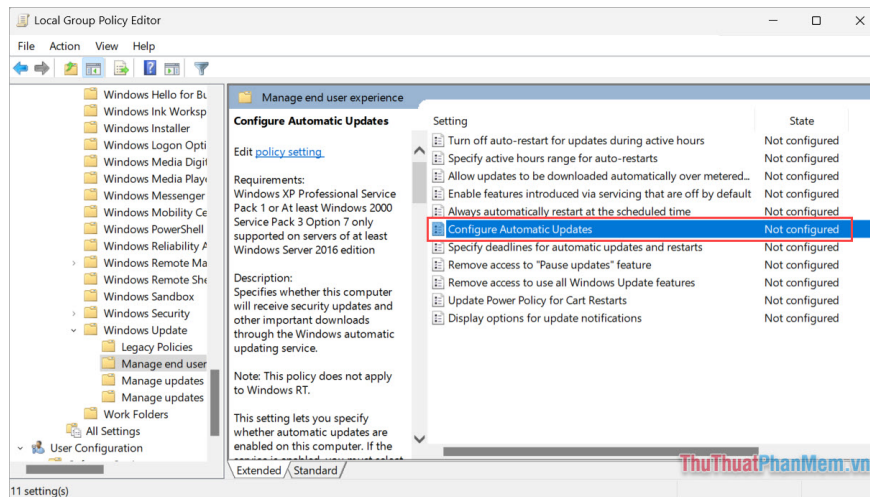

Step 2 : Then, you select **Administrative Templates (1)** => **Windows Components (2)** => **Windows Update (3)** .

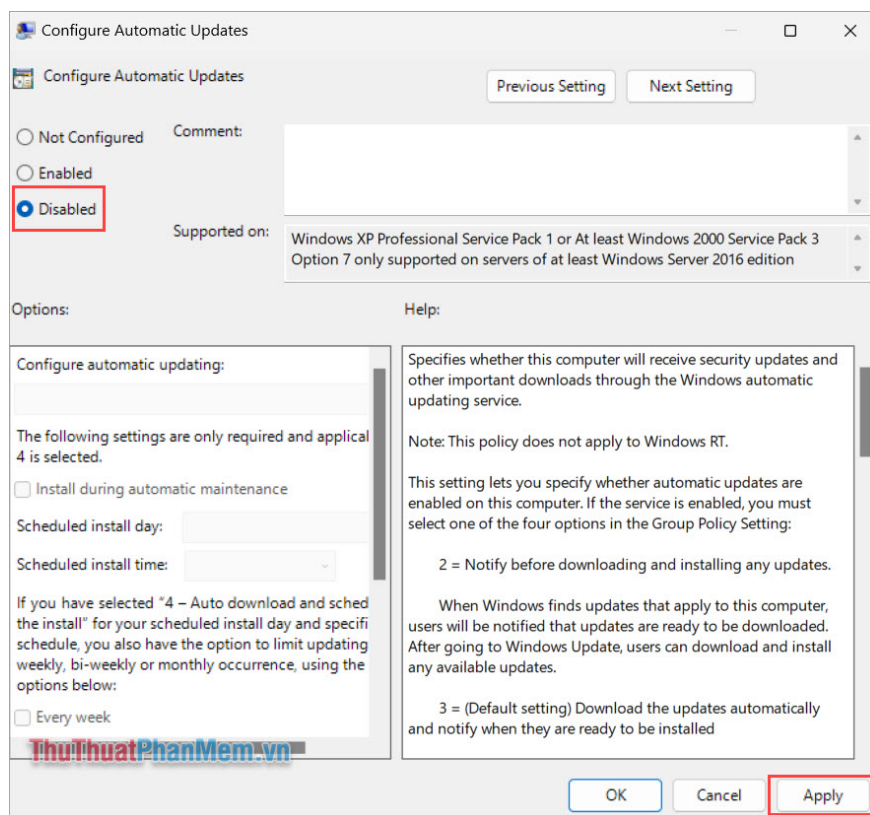

Step 3 : Next, select the **Manager end user experience** folder to view Windows update settings.

Step 4 : Open the **Configure Automatic Updates** section to permanently turn off Windows updates.

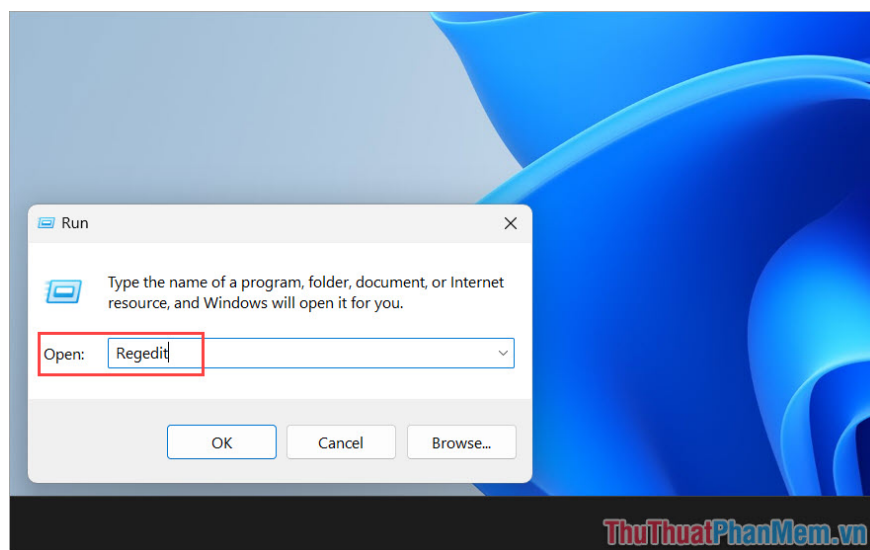

Step 5 : To permanently turn off Windows 10 and 11 Update, select **Disabled** and select **Apply** to apply the changes.

4. How to completely turn off Windows 10 and Windows 11 updates in Regedit

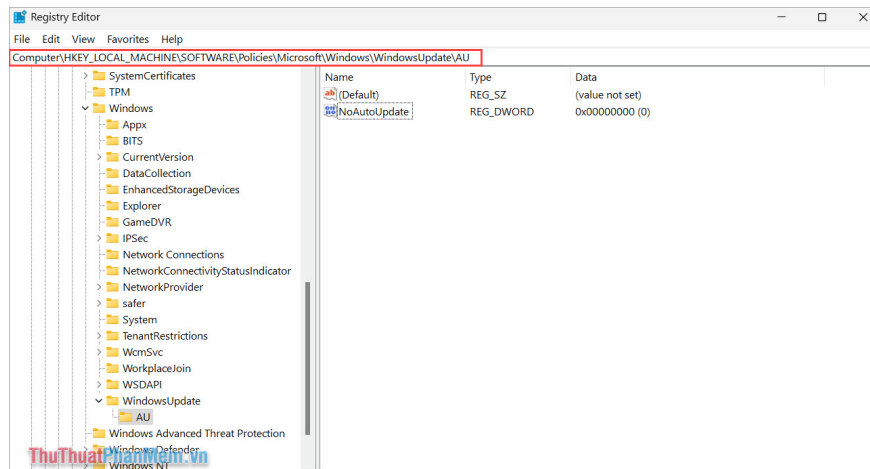

For Windows users, Regedit is a divine tool for interfering with all problems and all features of the operating system. When you need to turn off Windows updates permanently, Regedit is the top choice.

Step 1 : Press **Windows + R** to open the **RUN** window and enter **Regedit** to open Registry Editor.

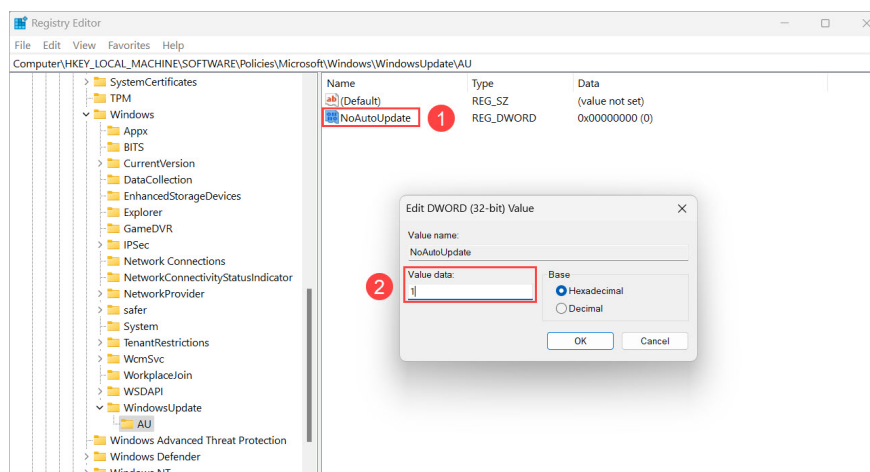

Step 2 : Then, copy the link below and paste it into the navigation bar to open the AU (Auto Updates) folder. Or you can also open each folder in turn.

Computer\HKEY_LOCAL_MACHINE\SOFTWARE\Policies\Microsoft\Windows\WindowsUpdate\AU

Step 3 : To turn off the self-update feature on Windows 10 and 11, select **NoAutoUpdate (1)** , set **Value Data to 1 (2)** and click OK to complete.

So, you have completed turning off updates on Windows 10 and 11 permanently.

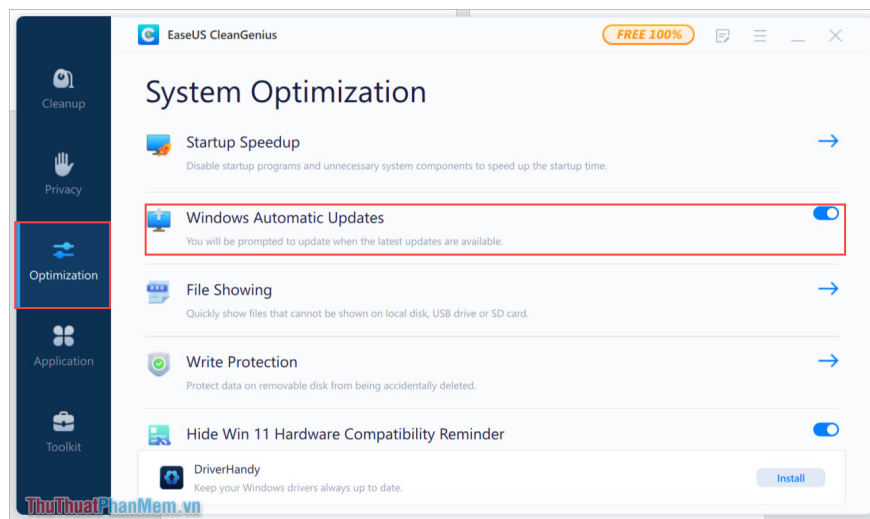

5. How to turn off Windows 10 and 11 updates using EaseUS Clean

EaseUS Clean is known as a tool to clean data on your computer and optimize Windows computers. In the EaseUS Clean tool, there is also a feature to turn off Windows 10 and 11 updates effectively and is worth experiencing.

1. Download EaseUS Clean

Step 1 : Download EaseUS Clean to your computer and start to install.

Step 2 : Open EaseUS Clean, select the **Optimization** tab and turn off **Windows Automatic Updates** .
