

Turn ordinary photos into GIFs with the **PLOTAGRAPH + app on the iPad**

Recently, Plotagraph, Inc. company. announced the Plotagraph + app for iPad. Let's see what's cool in this photo editing app!

On Thursday last week (July 13, 2017), Plotagraph, Inc. announced the Plotagraph + app for iPad. The company also said that the Plotagraph + version for iPhone will soon appear after the program designed for this tablet.

While most GIFs (animated images) are often created from short videos, Plotagraph only requires a still image. The program allows users to turn a still image into an animated image by covering part of the image and adding effect points. For the desktop version, it may take 5 - 30 minutes to create an animation.
