

# Tutorial to create a sparkling snow effect using Photoshop Brush

If you want your photos to be more vivid, bold in the winter by adding snowflakes to the photo. However, creating snow in Photoshop is not easy.

You want your photos to be more vivid, winter-oriented by creating more snow effects in your photos. However, creating effects in Photoshop is not as simple as you think. The following article Admin network will introduce and guide you how to create more snow effect is very simple by Photoshop Brush.

## Step 1:

The first step is to choose the snowflake shape you like adding to your photo. If you want, you can change the snowflake color to black and choose the Background color to be white.

Then proceed to the backup for use in the following steps.

## Step 2:

Click on **Edit > Define Brush Preset** . A dialog box appears, your task is to enter the name of the **Brush** into the dialog box and click **OK**.

## **Step 6:**

Continue on the **Brush Panel** (open the Brush panel), open **Transfer** and set the **50% Flow Filter** value.

## Step 7:

On the **Brush Panel** , click on **Brush Tip Shape** at the top of the effect settings section. Adjust the **Spacing** value to **100%** or if you want to manually adjust the snowflake distance, you can turn off the **Spacing** adjustment .

And this is the final result:

**Good luck!**
