Jennifer Montesano, Secaucus school manager confirmed the school's wifi connection was attacked in the past week. He added that they have determined that the two 9th graders of the school may have participated in the incident.

According to law enforcement officials, the boys may have used an application or paid someone online to hack the school's wifi network.

These two students were sent home. Currently, these two boys are facing allegations of computer crime and conspiracy to conduct computer crime. Currently, the school has not announced the discipline for these two boys.
