Taiwanese manufacturer MSI recently introduced two new entertainment laptops named CR61 and CX61. However, the company did not give any information about the selling price or release date for these two products.

CR61 and CX61 have similar design. Both machines are equipped with Intel HM76 chipset, 15.6 inch LED screen resolution of 1366 x 768 pixels and selected Ivy Bridge processor. In addition, the product also owns 8GB DDR3 RAM, 720GB SATA HDD and DVD burner. These two models have a multitouch touchpad, pre-loaded with a Turbo Battery app that saves power, two external speakers and an HD webcam.

Currently, it is still unclear the selling price and release date of these two products. *(Photo: Notebookcheck).*

MSI's new laptop supports connections like USB 2.0, USB 3.0, HDMI, memory card reader, D-Sub, 802.11 b / g / n and Bluetooth 4.0. Both machines have a thickness of 37.6mm, weighs 2.4kg and are equipped with a 6-cell battery that provides continuous operation for 7.5 hours. The only difference between these two models is that CR61 comes with Nvidia GeForce GT640M graphics card and the CX61 only has Intel integrated graphics.
