

Two ways to update the 280 characters tweet on Twitter

As you know, Twitter only allows writing a tweet of up to 140 characters long. But they are experimenting with double-digit numbers so you can express more.

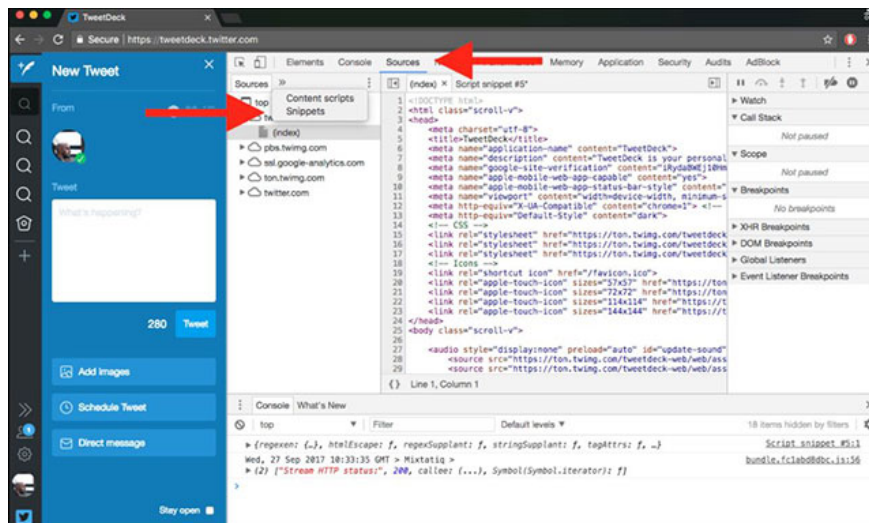

As you know, Twitter only allows writing a tweet of up to 140 characters long. But they are experimenting with double-digit numbers so you can express more.

During testing, only selected users can use this feature. But with just a few tips below, you can also write more on Twitter.

Please note that there is more than one way but this is probably the simpler and easier way, especially for Chrome users.

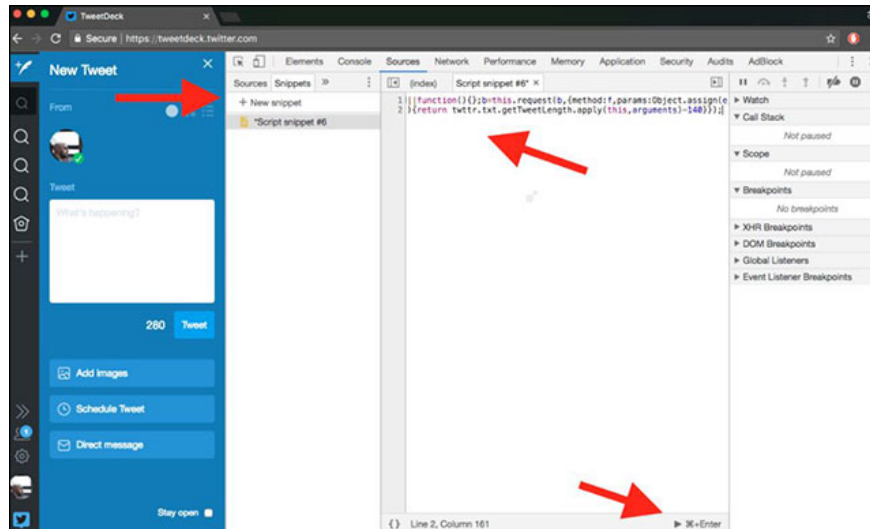

Write tweets with 280 characters by editing the snippet

1. Go to Tweetdeck at tweetdeck.twitter.com *https://tweetdeck.twitter.com/*
2. Go to the **View** section , hover over the **Developer** item on the menu and select **Developer Tools**.
3. Find the Sources and click the arrow below to select Snippets.

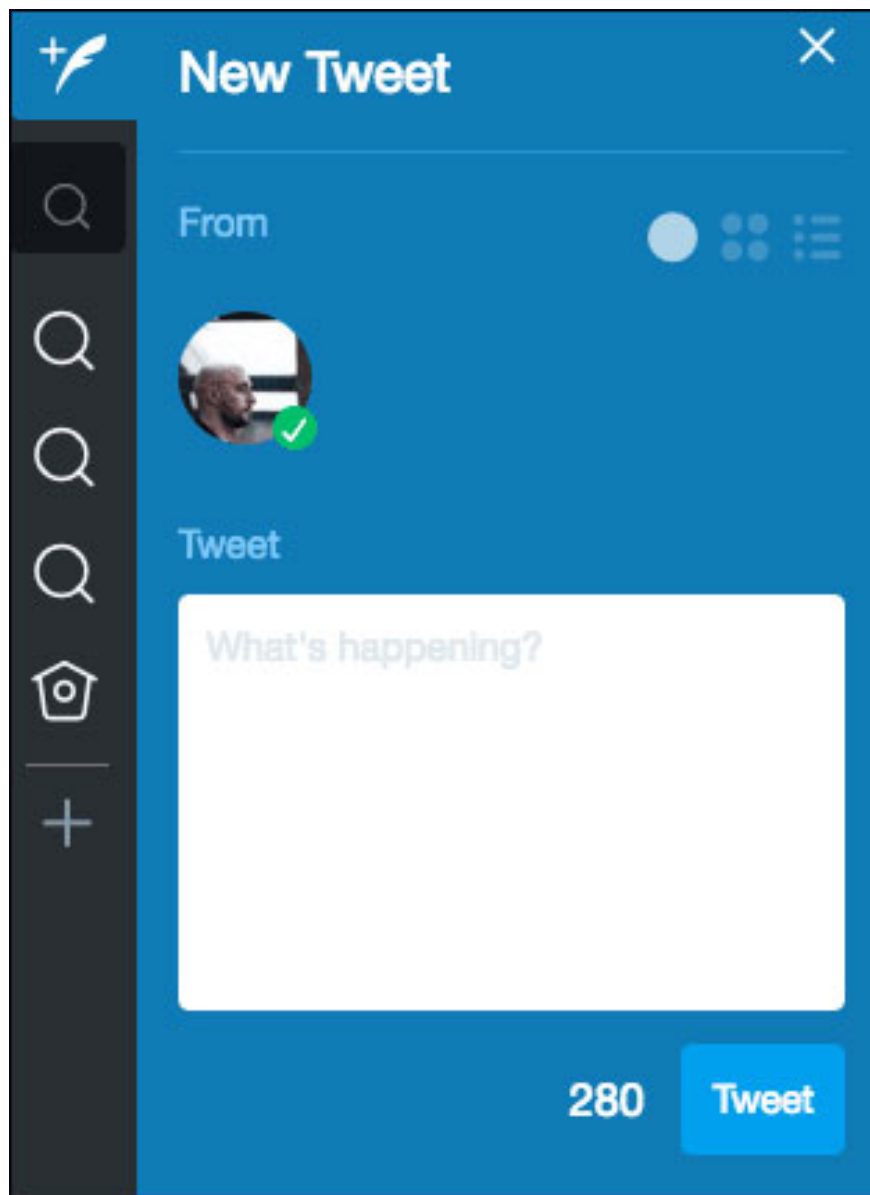

Open Twitter's snippet

1. Once you've opened Snippets, click New Snippet and paste the code below <https://gist.github.com/Zemnmez/ffb5449d873d5407c7172534b762ae46> into the empty window on the right.

Paste the code into the snippets window

1. Click the Play button below the snippet.
2. That's it, now you can comfortably tweet with 280 characters.

Small tricks to tweet with double characters

Note that this tip works only on Tweetdeck, meaning you must use Tweetdeck to post on Twitter with 280 characters.

Quick way to tweet 280 characters

This is even faster. Each step is described at this address.<https://juliette.sh/280>

1. **Step 1:** Re-mark the icon given below.
2. **Step 2:** Go to tweetdeck.twitter.com, click on bookmark and then type the tweet.
3. **Step 3:** Done. You have typed 280 characters.
