

# Types of data hiding in Excel - Hide pictures, graphs, rows, columns

TipsMake introduce to you part 3: How to hide photos, graphs, drawings, lines, columns in Excel

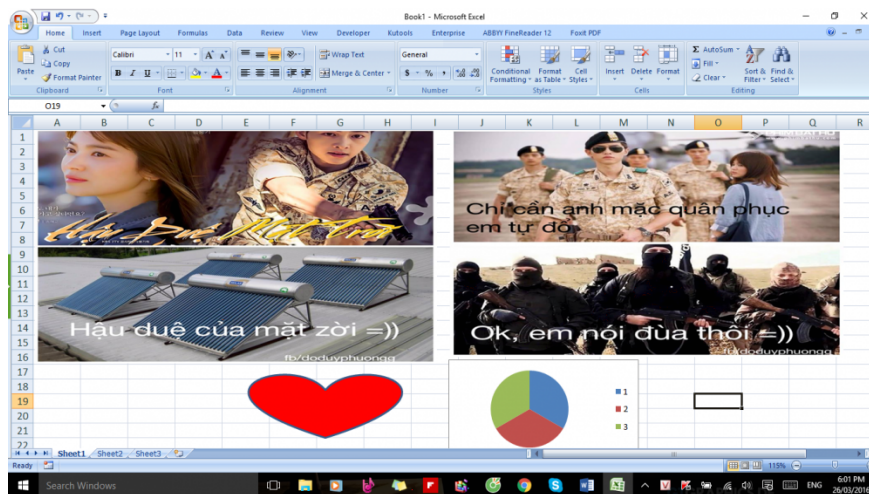

Continuing the "How to completely hide all types of data in Excel" series and received many good responses, **TipsMake** introduces you to Part 3: How to hide photos, graphs, drawings, rows and columns in Excel.

In life and work, there are always secrets that we want to keep a secret, want it to be hidden, and so is in Excel.To continue part 1 and part 2:

*TipsMake* will guide you how to hide photos, graphs, drawings, lines, columns in this part 3.

## 1. Hide pictures, graphs , drawings in Excel

**The Selection Pane** in Excel can do this, to make it easy for you to understand, *TipsMake* , for example, wants to hide some funny **images** about the movie ' *Descendants of the Sun* ' and **graphs, drawings** in a Sheet of Excel as shown below:

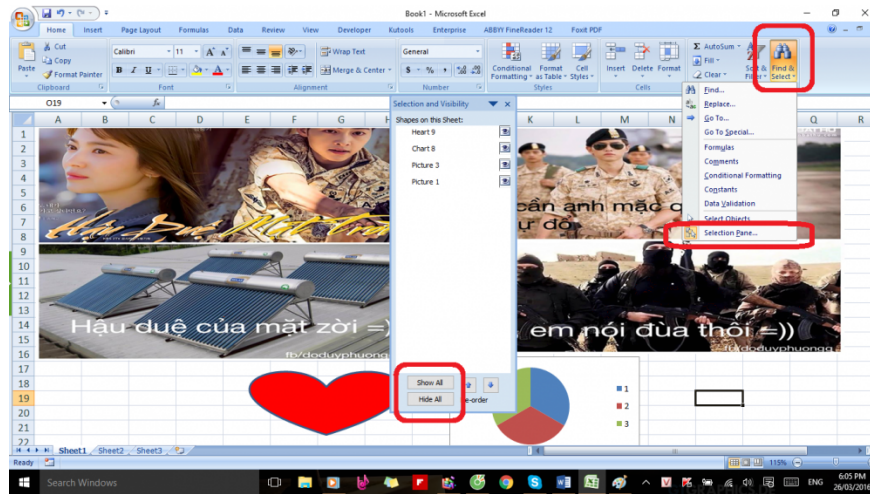

Then you follow the steps:

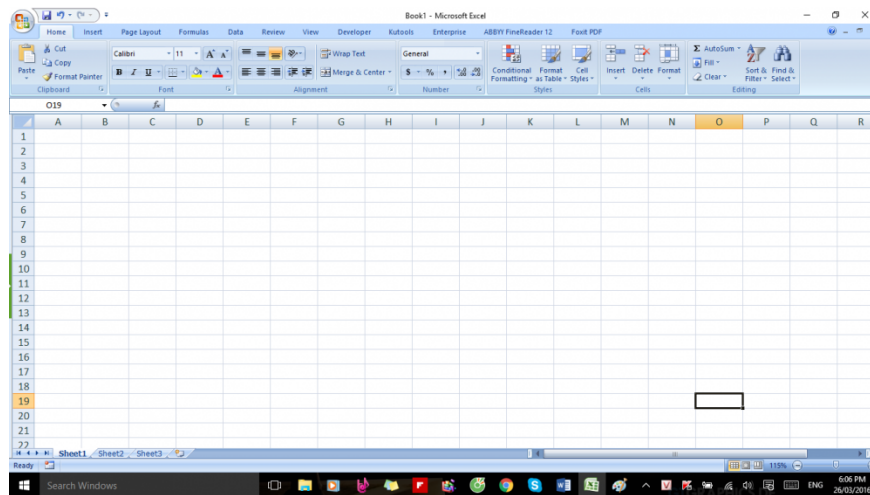

- **Step 1:** Go to the ' **Find & Select** ' (binocular icon) in the ' **Editing** ' group, in the ' **Home** ' tab of the **Ribbon**, a new menu will appear.

- **Step 2:** Continue to select the ' **Selection Pane** ' item at the bottom of that menu.

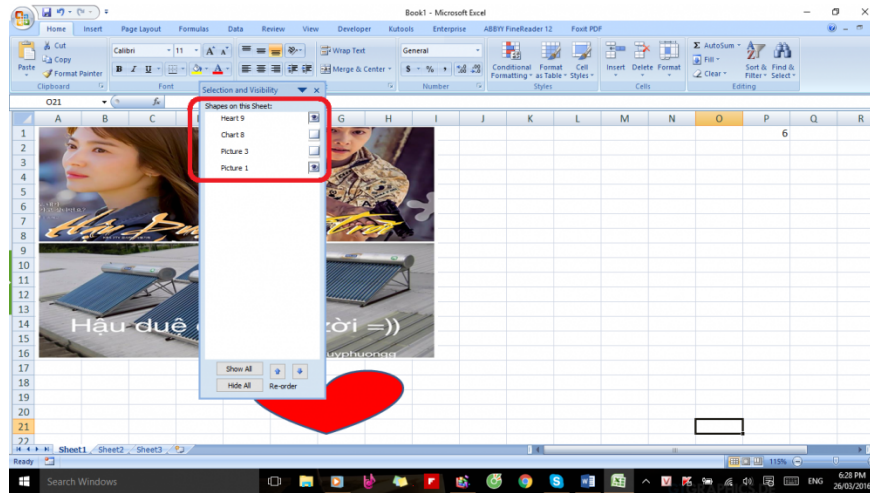

- **Step 3:** A **dialog box ( dialog box) ' Security and Visibility'** will appear. You choose '**Hide All** ' to hide everything (including 2 pictures, 1 graph and 1 heart shape) and '**Show All** 'to display it again.

And this is the result:

Or you can choose to hide each one by clicking on the eye icon in the '**Shapes on this Sheet** ' section. For example, you hide a picture on the right and for example:

Components in the above dialog box:

1. **Heart 9:** A heart shape - part of 'Shapes' - drawings
2. **Chart 8:** Chart means the graph, in this case it is the pie chart below.
3. **Picture:** Picture 3 is the right picture that you just hidden, picture 1 is the picture on the left.

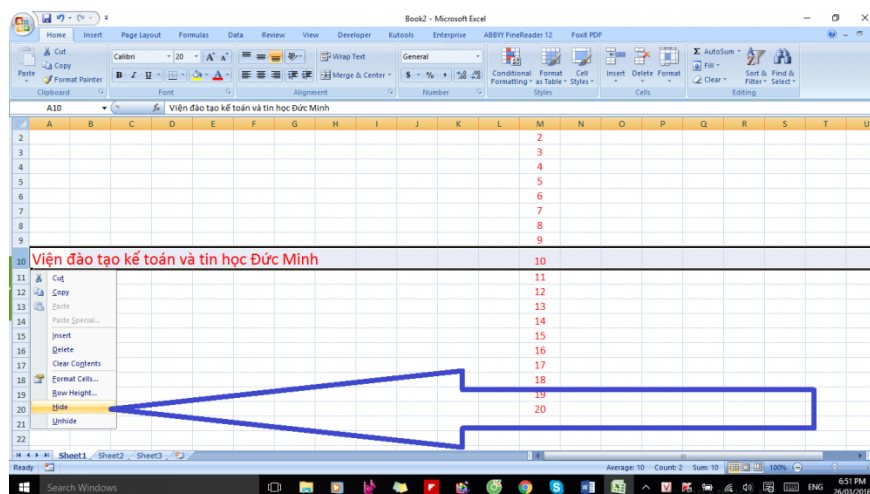

- **Attention:** You can hide everything for a **second** with a keyboard shortcut that is '**Ctrl + 6**', try to see the results!

## 2. Hide rows and columns in Excel

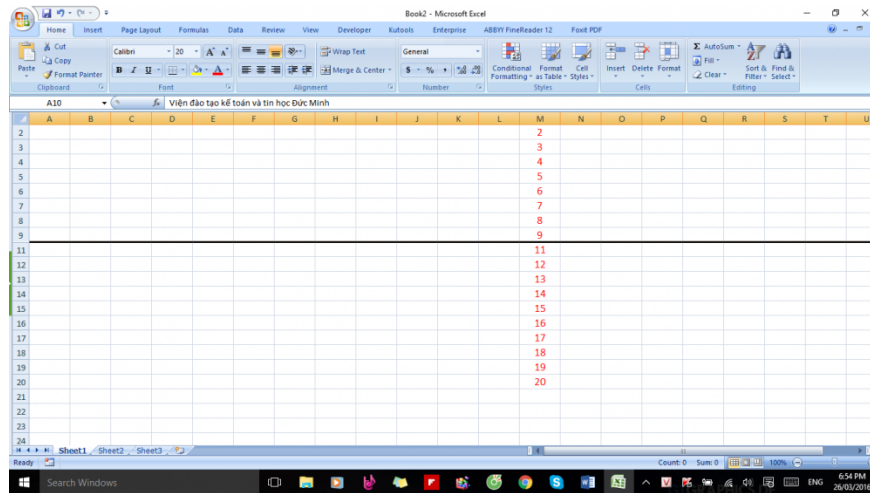

+ **To hide the line** : ??c Minh, for example, would you like to hide the words ' TipsMake ' in line 10, for example, follow these two steps:

- **Step 1** : You must select the line to be hidden by **left-clicking on the number 10** (the name of the line) or clicking on **any cell in the line 10**, then press the key combination '**Shift + Space**' (space is spacebar). You can apply multiple selections at once by dragging the mouse or the **Shift + Arrow keys up and down**.

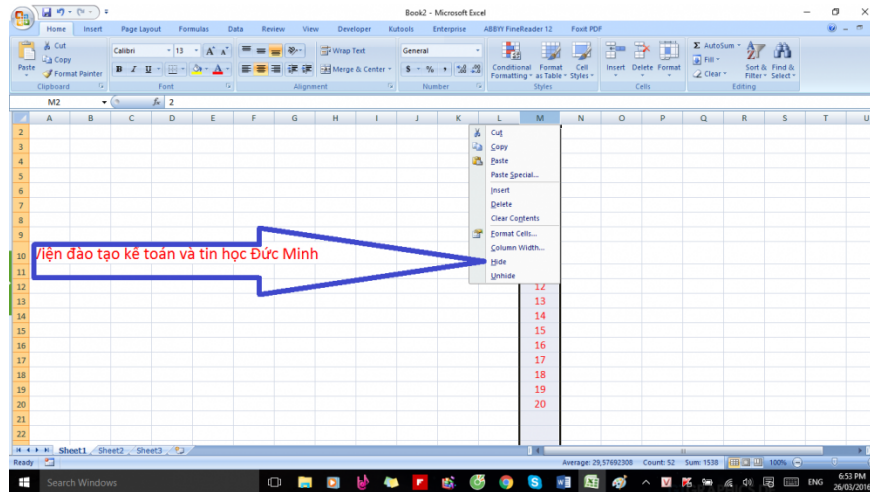

- **Step 2:** Right-click then select '**Hide**' to hide the line, '**Unhide**' to hide display again.

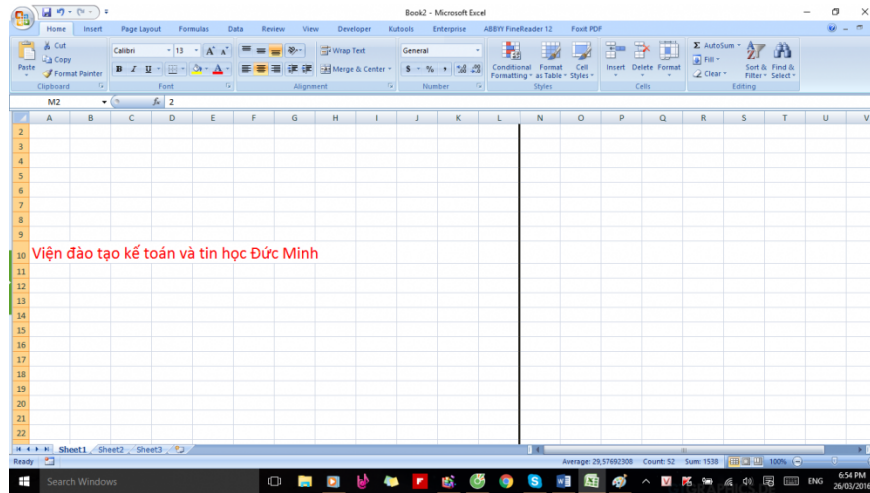

And this is the result:

+ **To hide columns:** *TipsMake*, for example, you want to **hide the column** number from 1 to 20 in column M for example, you **do the same with hiding the line**. The only difference is to select the column by **clicking on the letter M** or using the keyboard shortcut '**Ctrl + Space**'

And this is the result:

**Part 3 - How to hide pictures, graphs, drawings, lines, columns in excel** in this series of 'Very useful instructions for all hidden data types in Excel' here is the end.
