### Step 3:

In the search bar on Windows users enter unikey and then **right click on Unikey** and select **Run as administrator** . Thus Unikey is restarted by Admin mode on the system.

## Step 4:

Go back to the Photoshop interface and select the font to type in Vietnamese. As a result, you will type Vietnamese text as usual.

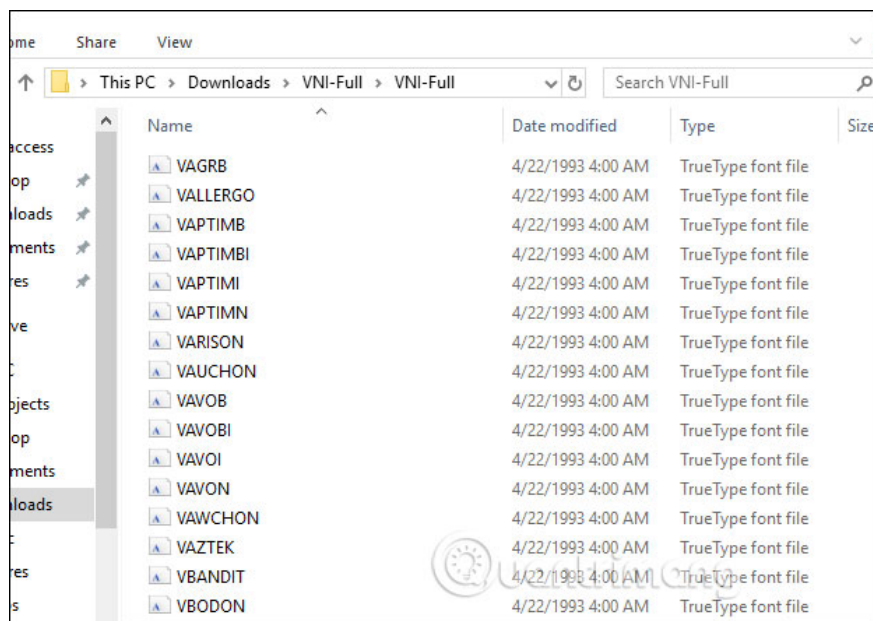

## Method 2: Type Vietnamese in Photoshop with VNI font

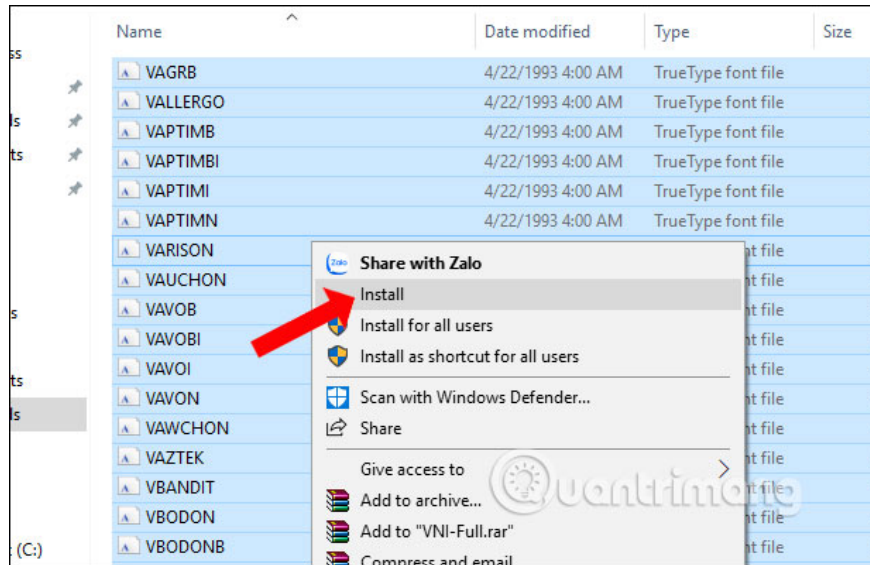

### Step 1:

First, you need to download the full VNI font to your computer without this font set.

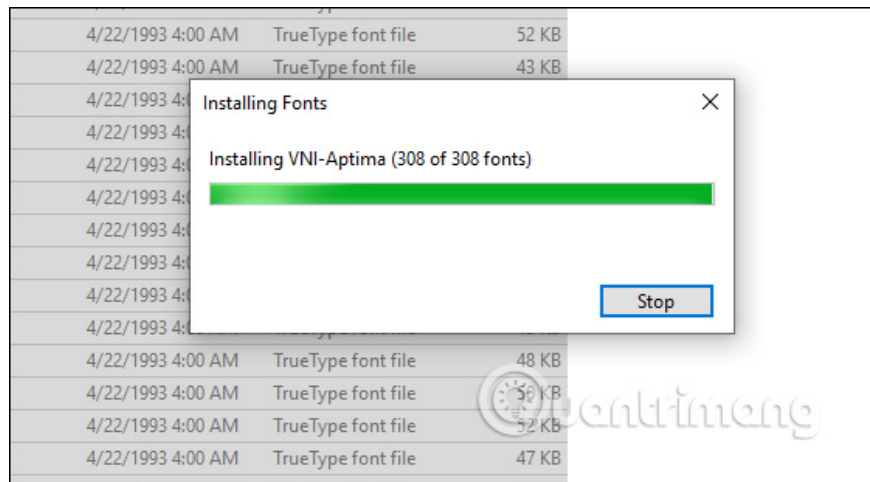

1. Download the full VNI font set

Next press Ctrl + A to select the entire font and right-click, **select Install** to install VNI font on the computer.

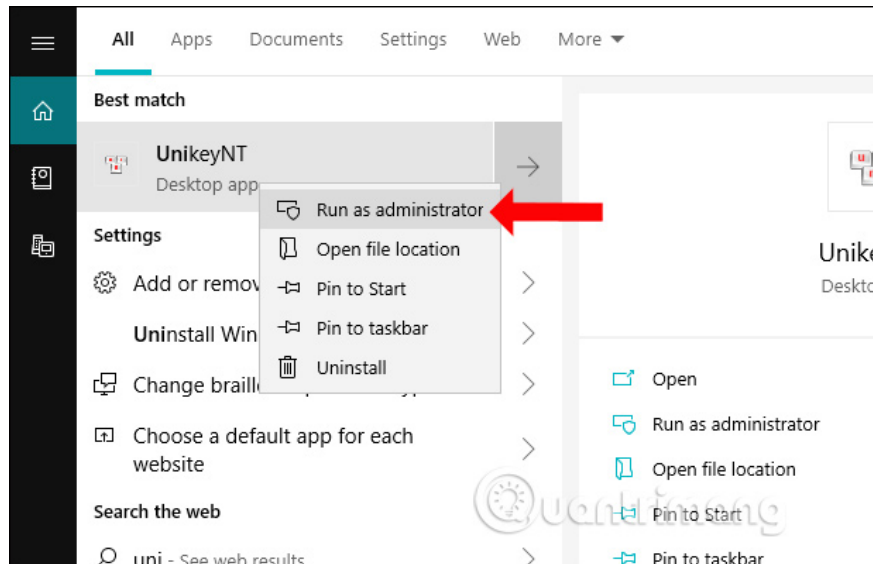

VNI font installation process takes place immediately after.

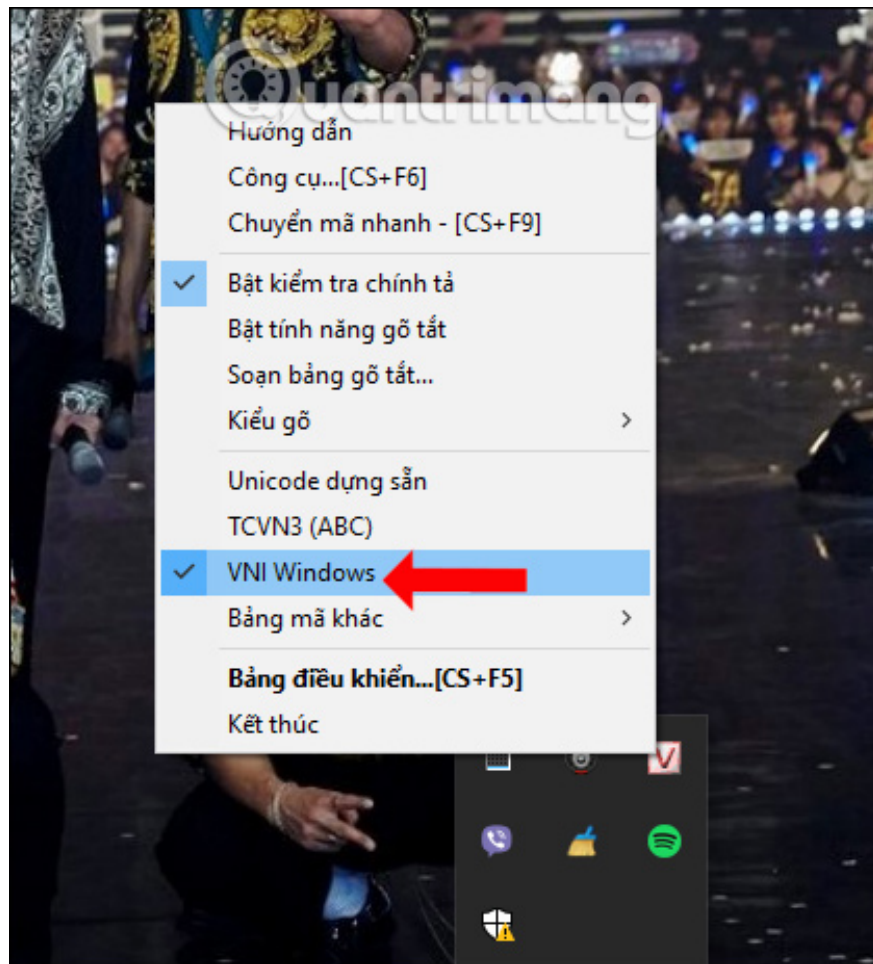

## Step 2:

Next, you also need to completely turn off Unikey in Task Manager and restart with Admin rights.

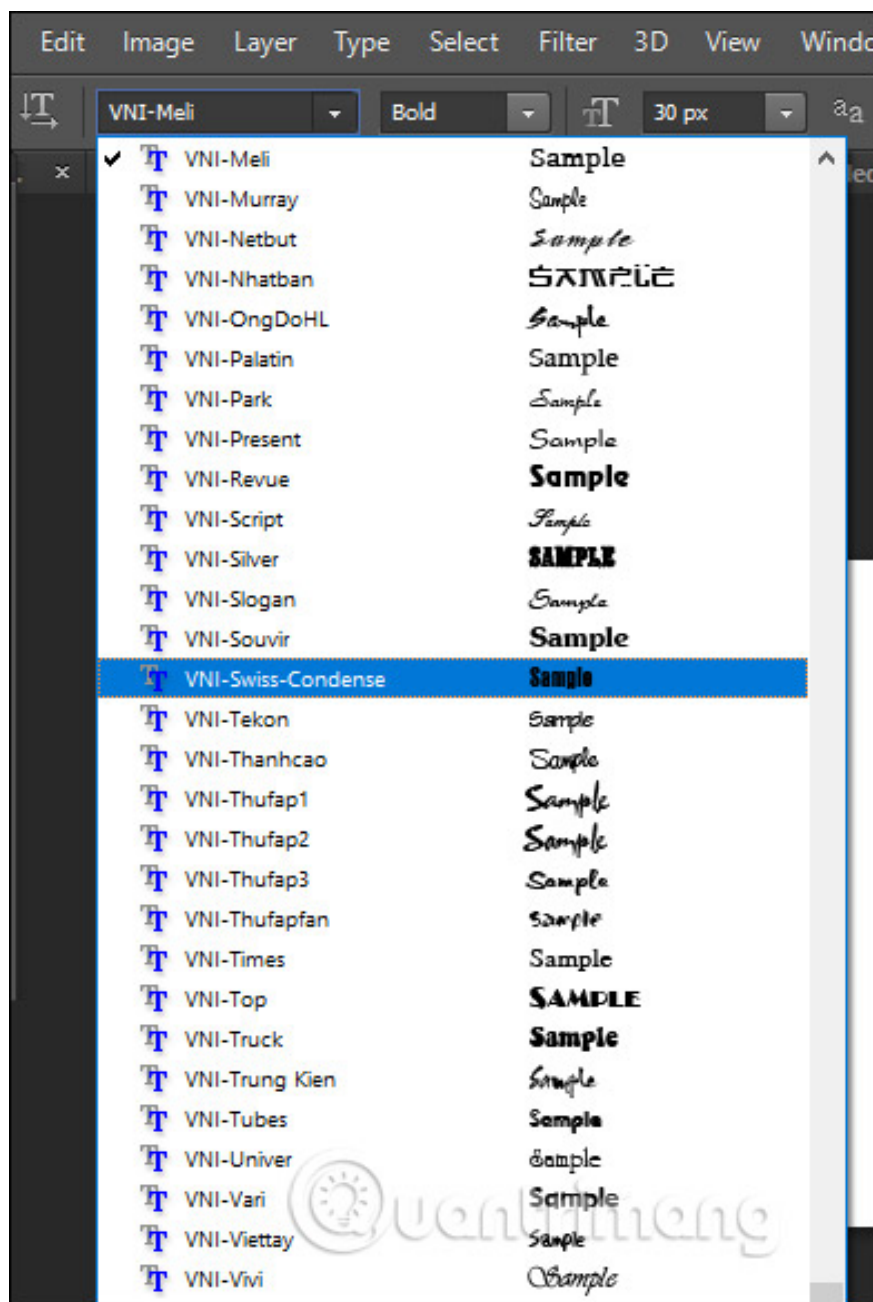

### Step 3:

Right-click on the Unikey icon in the system tray and **select the VNI Windows encoding** to use VNI font in Photoshop.

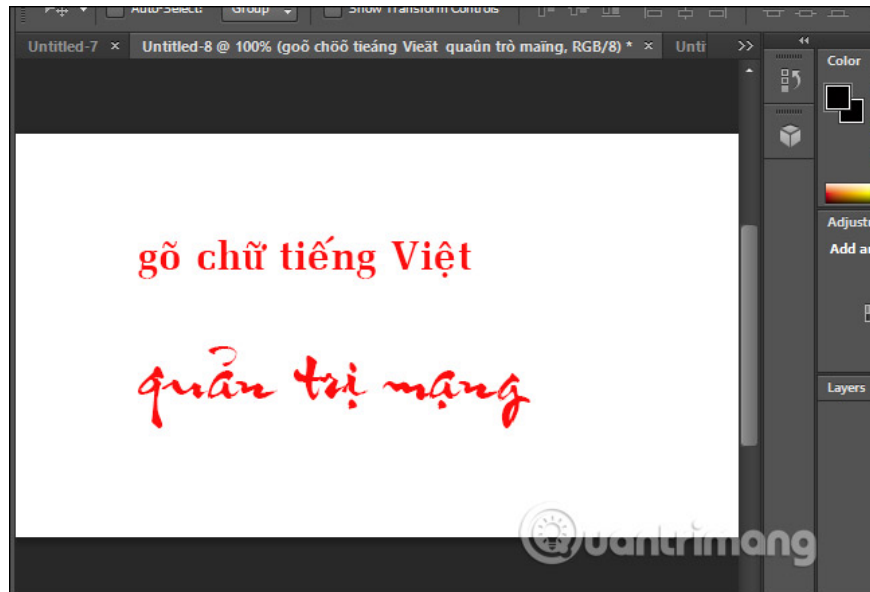

### Step 4:

You go to Photoshop and click on the font item to **select the fonts that start with VNI** as shown below. If you choose Unicode font font will error typing Vietnamese in Photoshop.

Finally you just need to enter the content to finish. There are many artistic font styles such as calligraphy font in the picture below.

Above are 2 ways to type Vietnamese in Photoshop. You can download more external fonts and install them on your computer. However, choosing the right encoding for Unikey and running Unikey in Admin rights is essential to be able to type Vietnamese words in Photoshop.

I wish you all success!
