3. Not a UFO, this is the cause of the mysterious black circle in the sky of America

Russian coal miners discovered a strange flying saucer in the ground and described it as " *a crashed UFO* ".

A video posted on a popular channel on conspiracy theory on Youtube - **SecureTeam10** - shows that Russian miners unearthed a strange flying saucer.

This group of miners was a member of the mining company Kuzbassarazrezugol, who found **this alien UFO object** while mining in an area in the remote area of ??Volgograd at a depth of about 40m below. ground.

This flying saucer is about 1.2m in diameter and weighs about 200kg.

The storyteller in the video above said: " *This object is coated with tungsten metal called tungsten (a hard gray metal used to make alloy steel and fibers in electric light bulbs) . here is the metal commonly used in the military industry. "*

This UFO looks like a classic alien spacecraft.

' Tungsten is one of the materials with the highest melting point and is often used to make objects that launch into space because they can withstand extremely high temperatures when an object enters the atmosphere '.

The narrator in the video argues that the *' these objects actually contain the bodies of alien creatures'* are now spreading widely.

' Obviously, they look like human beings, all with the shape of a flying saucer . not to mention the fact that they are found very deep underground .'

This UFO has a diameter of 1.2m.

The driver of the excavator was also the one who found the object, **Boris Glazkow** said: *' It is very difficult to detect, it is very special and very large . I have never seen anything like this object, obviously made by humans, right here and nowhere. It is a real mystery . "*

A colleague of his, **Arthur Presnyakow** , added: '*There are actually two similar things, but the first one was broken when pulled out of the ground by the bucket .*' "

" *They are obviously artificial, they all have the shape of a flying saucer .* "

" *We thought that surely we saw something, because it broke into pieces, but when the second one appeared, we stopped working and carefully took it out of the bucket .* "

However, those commenting on this video claim that the evidence is not convincing.

Someone wrote: '*It looks like a stone for a mill*' .

Another person said: '*Why do some people think it's a UFO just because they have a flying saucer shape?*' "
