

Ultra-thin Asus U Series, 10-hour battery

Asus U Series notebooks are equipped with standard Intel Core i5, i3 CPUs, providing power for processors to handle all tasks, regardless of work or entertainment.

Asus U Series notebooks are equipped with standard Intel Core i5, i3 CPUs, providing power for processors to handle all tasks, regardless of work or entertainment.

Asus U Series has more than 10 hours of battery life thanks to SHE and NVIDIA Optimus technology. SHE technology cuts off previously deployed energy when handling less complex tasks. Meanwhile, Optimus technology automatically converts integrated graphics GPU and designation in accordance with the intensity of the performance graphics.

Asus U35JC.

The thinnest point of the product is only 14.8 mm. At the same time, the product has a aluminum scratch alloy shell that makes it feel slimmer and lighter. The Asus U Series delivers realistic sound through SRS Premium Sound to enhance Altec Lansing speakers.

Asus U33JC.

Asus U Series notebooks are equipped with standard Intel Core i5, i3 CPUs, providing power for processors to handle all tasks, regardless of work or entertainment. When faced with highly demanding applications, Asus' special Super Hybrid Engine (SHE) technology will enable increased system performance. As a result, the system achieves maximum speed and runs smoothly.
