

Unexpected truth, women can become pregnant even though they don't have formal sex

Even if you don't really have a 'relationship', the woman can still get pregnant if she gets sperm near the 'girl' area.

Pregnancy is a zygote when sperm meets an egg. This happens when having sex (sex) without using any contraceptive methods. So, if you don't have sex, the woman can't get pregnant, is this really true?

1. The process of sperm formation and the 5 facts startle you
2. 10 interesting facts about sperm to men do not know
3. Curious: "What difficulties do sperm" you have to go through and how long does it take to meet the egg "sister"?

A healthy adult male has about 20 million sperm in 1ml of semen. Therefore, just a bit of semen coming into the vagina will have millions of sperms ready to meet eggs. Meanwhile, sperm only needs to swim along the vaginal canal and determine the position of the egg. Therefore, if only a little semen is stuck in a position close enough to the vagina, the sperm can still swim inside.

In fact, sperm can exist outside the body, although no specific time has been determined, but according to scientists, the figure may be just a few minutes. This period depends on the location of the semen fired.

In environments like swimming pools or hot springs, sperm will almost die instantly. In warm areas like the human body, sperm can live for a few minutes. If it gets into the vagina, it can survive for 5 days.

Therefore, **even if you do not really 'penetrate' the woman, she can still become pregnant if she gets sperm near the 'girl' area .**

In the case of using a hand or sex toy that has a semen on it and is accidentally inserted into the vagina, it can still happen depending on the length of time between the two processes.

In the case of clothing, even if underwear touches the sperm, the risk of pregnancy is almost impossible because the sperm is not strong enough to swim through the fabric.

Currently, the most effective method of contraception and prevention of sexual diseases is condoms, up to 97%.
