

Uninstall and delete programs in Open With in Windows 7

The following article details how to remove programs with Open With in Windows 7.

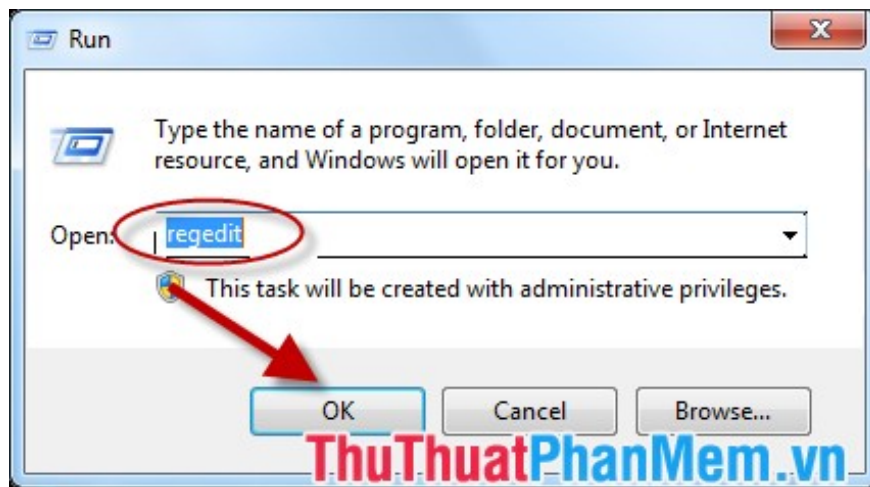

The following article details **how to remove programs with Open With in Windows 7.**

- For example, you want to open a **PDF** file when you right-click and select **Open with** there are 2 programs available on your computer that correspond to the **.pdf** format : **Adobe Acrobat Reader DC** and **Foxit Reader**:

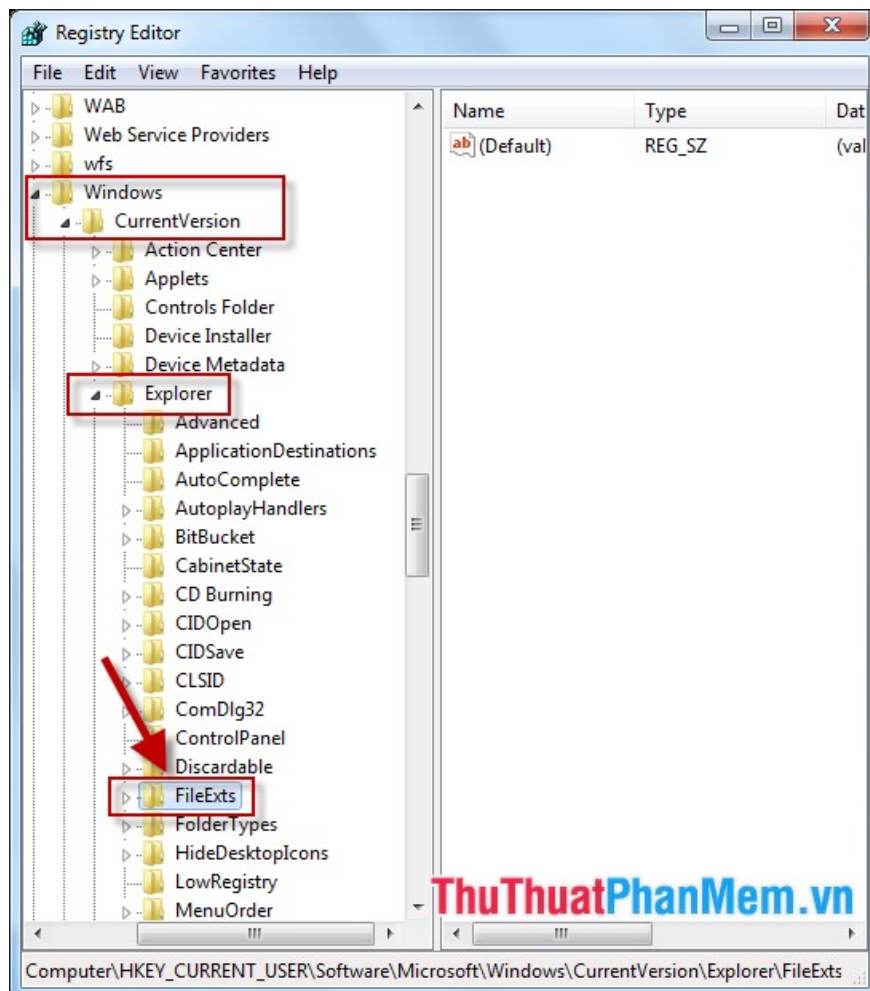

- Because there are 2 programs that support 1 format in **Open with** you want to remove 1 program, for example here, remove **Foxit Reader 5.4** follow these steps:

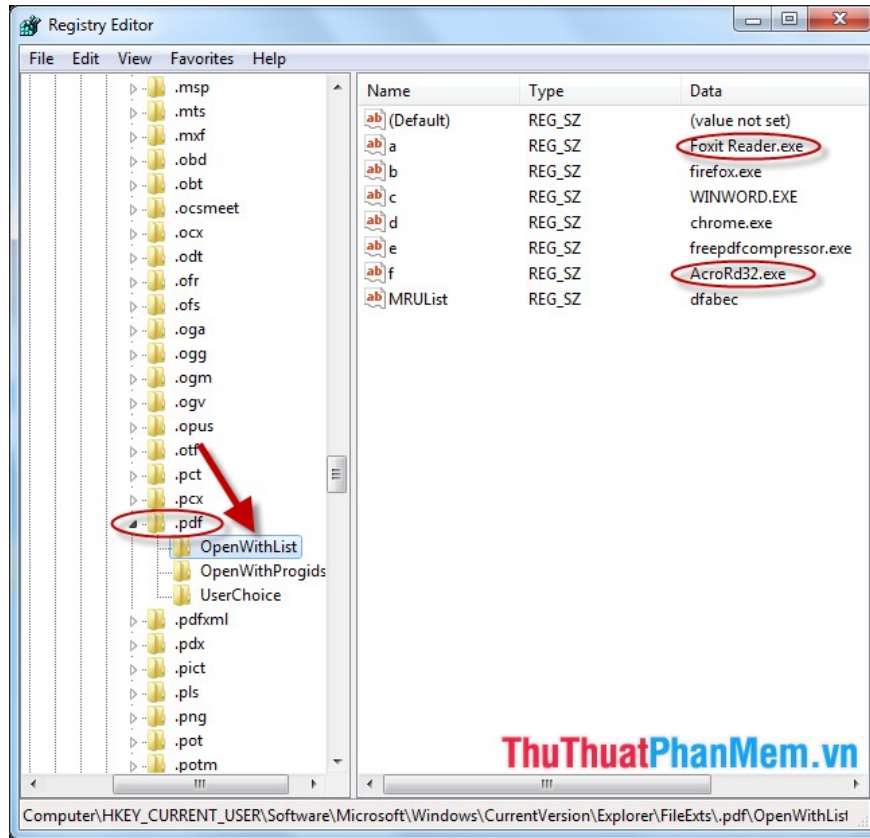

Step 1: Press **Window + R** to open the **Run** dialog box -> enter the command **regedit** -> **OK**:

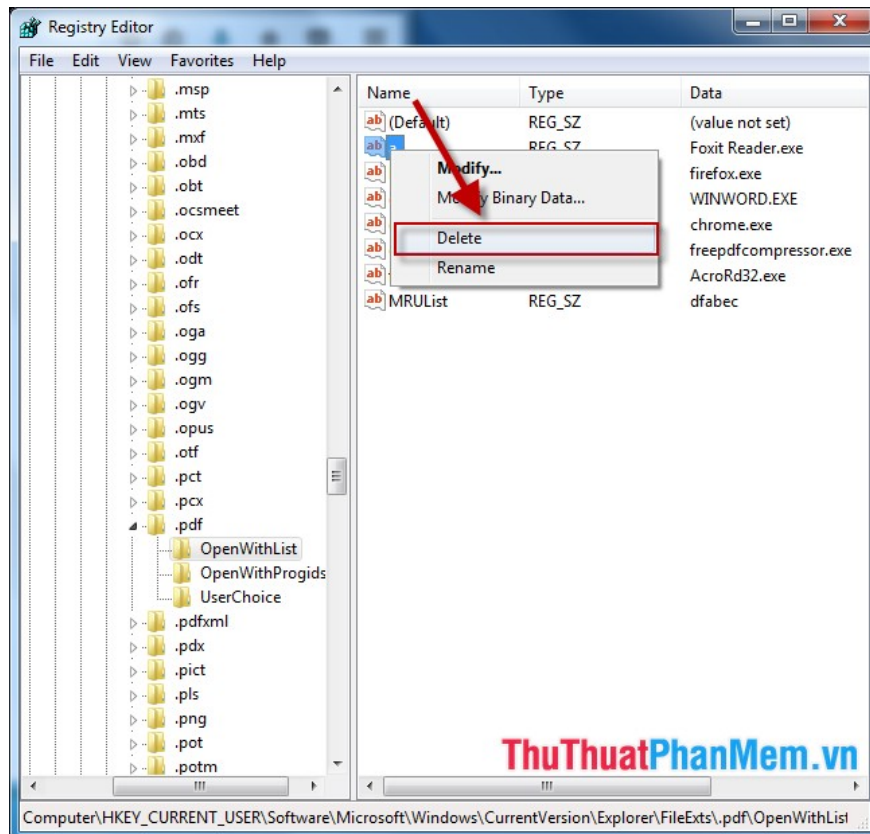

Step 2: The **Registry Editor** dialog box appears, select the path: **HKEY_CURRENT_USERSOFTWAREMicrosoftWindowsCurrentVersionExplorerFileExxts**

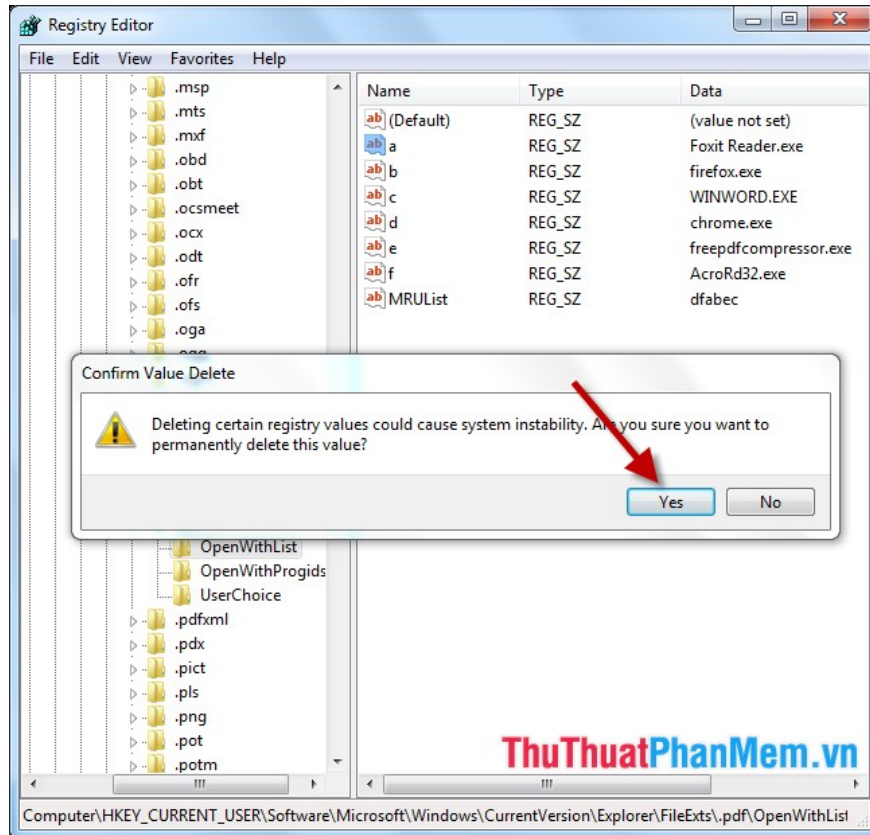

Step 3: Click **FileExts** to see all file formats displayed, select a format you want to delete the program that opens it. For example, here I want to delete the program that opens the **PDF** file and selects the folder. **pdf** -> click **OpenWithList** to display 2 programs for opening **PDF** files on **Foxit Reader** and **Adobe Acrobat Reader DC** (displayed in **Data**)

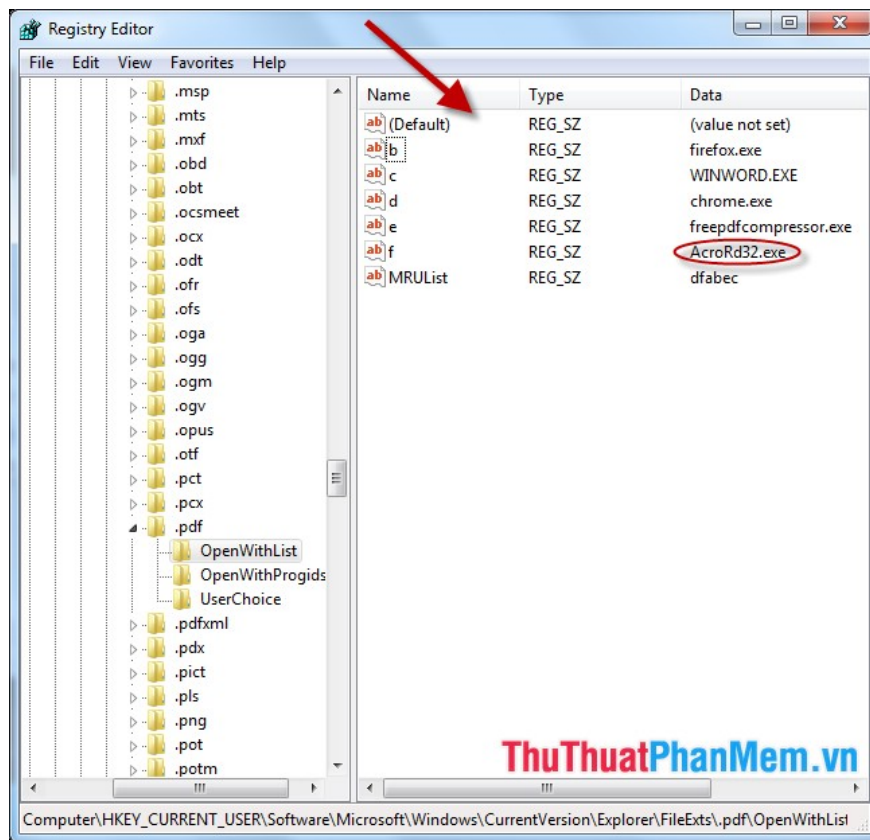

Step 4: To remove **Foxit Reader**, right-click the file corresponding to **Foxit Reader** -> select **Delete**:

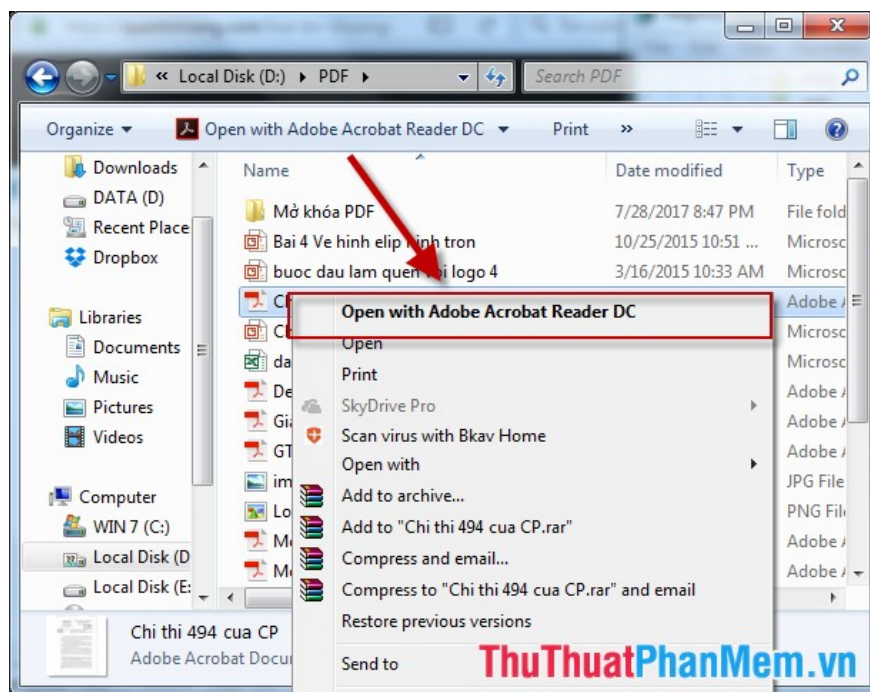

Step 5: A dialog box appears asking for confirmation -> click **Yes**:

Program **Foxit Reader** has been removed from selected **Open With**:

- Now you proceed to open the file **PDF** under **Open With** -> program **Adobe Acrobat Reader DC** prioritized and displayed on option:

Above is a detailed guide on **how to remove programs in Open With in Windows 7**. I wish you success!
