

# Unique new rockets can enter space in just 5 minutes

US Space Corporation ARCA has launched a new type of missile named Haas 2CA with a unique design that can fly to Earth orbit in just 5 minutes instead of 8 minutes like other normal missiles.

US Space Corporation ARCA has launched a new type of missile named Haas 2CA with a unique design that can fly to Earth orbit in just 5 minutes instead of 8 minutes like other normal missiles.

Haas 2CA missiles have only one floor to store fuel and fly up while normal missiles need 2 floors. Thanks to this unique design, the rocket becomes more compact, making it move faster and reduce the cost.

The new missile is expected to fly for the first time in 2018 and make a big change in the human conquest of the universe.

1. Russia owns a new rocket that is 6 times faster
2. How fast can a rocket fly to win gravity and escape the Earth?
