Shang-Chi 2

Expected release date: Unknown

Shang-Chi will continue his journey to explore his powers and his place in the MCU. He will face a new threat, possibly related to the Ten Rings.

Regarding the new threat, Shang-Chi may have to face Dweller-in-Darkness, or a new secret organization. In the first part, Shang-Chi defeated his own father, Wenwu, who was using the Ten Rings with ambitions of world domination.

Speaking of Dweller-in-Darkness, this is an ancient dark entity that was mentioned in the first film. This villain has been predicted to appear in the MCU for many years now, and Shang-Chi 2 could be the film where he makes his appearance.

Another potential threat could be a new, secretive organization, possibly the Ten-Rings. The Ten-Rings have been mentioned in several other MCU films, and it could become a much greater threat to Shang-Chi in particular and the other Avengers in general.

Shang-Chi is a potential character who could become a key member of either the Avengers or the Young Avengers. In the next installment, Shang-Chi may be introduced alongside other MCU superheroes.

Spiderman 4

Just hours after Spider-Man: No Way Home hit theaters, president Kevin Feige confirmed that Marvel Studios and Sony were developing a fourth Spider-Man MCU film. The ending of No Way Home clearly showed Peter Parker (Tom Holland) would have a role to play in the upcoming phases of the MCU.

Production for the film may begin sometime after mid-2024, once the writers' strike ends, in order to meet the deadline for bringing Spider-Man back to the screen after Avengers: The Kang Dynasty (2025).

The last time we saw Spider-Man in a solo film was Spider-Man: No Way Home in 2021. This was the highest-grossing film in Sony Pictures history, earning over \$1.9 billion. Later that year, producer Amy Pascal confirmed that Tom Holland's Spider-Man would still appear in the MCU.
