The HP ProBook is very personal, powerful by its "square-edge" design. This product is aimed at the mid-range segment of the business laptop market with an expected competitive price of VND 13.9 million (excluding VAT).

The curves are on the edges of the case on classic HP laptops, while the ProBook 4410s are redesigned, square and robust. The biggest strength of this machine is the LED backlit display technology, with the advantage of providing lower power consumption while maintaining rich colors, sharp and realistic images.

HP ProBook 4410s has a 14-inch screen size with a 16: 9 aspect ratio that fits the ratio of widescreen movies.

Another noticeable feature is that with this new ProBook series, HP has made a change using the flat and slightly submerged key design similar to the MacBook or Sony Vaio models. Therefore, users can easily clean and clean the keyboard during use.

In addition, ProBook models are equipped with HP Protect Tools technology with HP QuickLook 2, optimized usage needs, increased performance as well as productivity, allowing checking email, or appointments. Contact information without having to boot inside the operating system. HP SpareKey is another way for users to log on to a PC that is locked in case they forget their password. File Sanitizer to control data, permanently delete files to avoid the case that these files are recovered without permission.

The HP ProBook 4410s may become market-heavy competitors for Dell firms with the Vostro or Lenovo ThinkPad SL line, because of their cheaper price, particularly "outstanding" in modern design as well as Features and configurations to meet the needs of the user.
