## Step 2:

Use the fingertips to remove the cover ( **panel** ) under the **Mac Air 2015** and set aside.

## Step 3: Remove the PIN

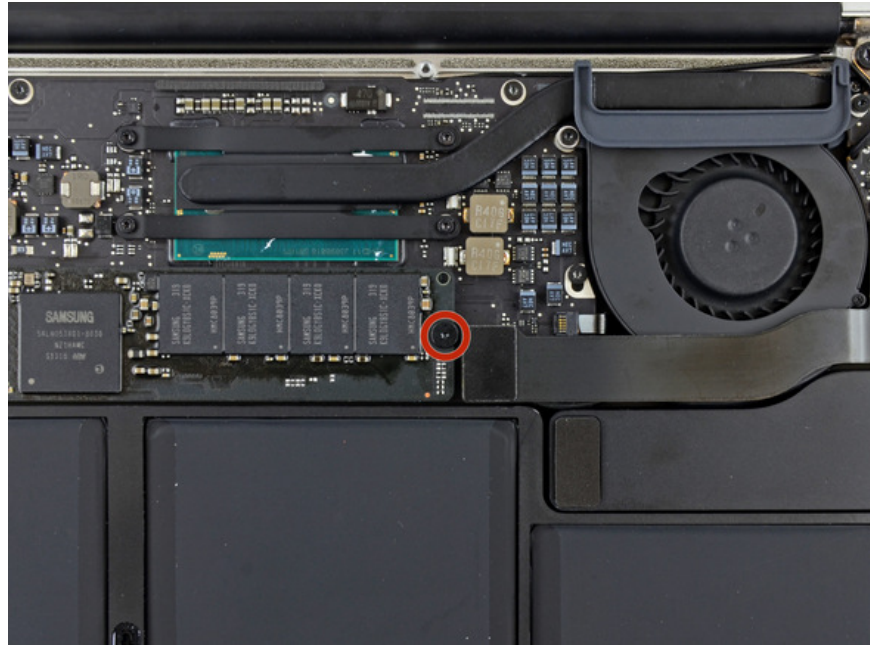

Pull and pull lightly the piece of plastic attached to the **PIN** connector .

## Note:

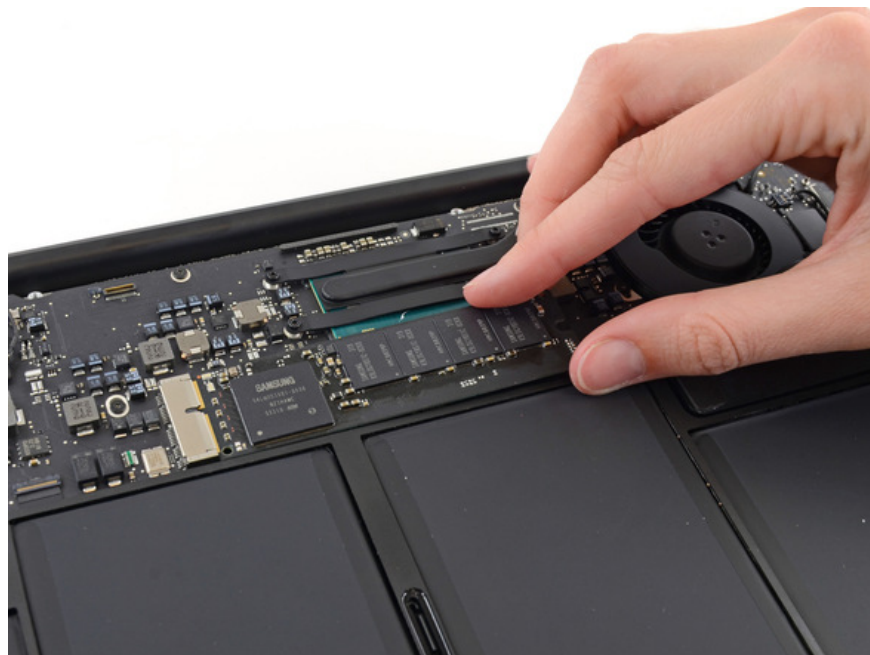

Do not remove the hand too strong or it will damage the connector.

## Step 4: SSD (Solid-State Drive)

SSD drives are fixed by a 5-sided screw. Use **T5 Torx Screwdriver** to remove this screw from **Logic Board** .

## Step 5:

Hold one end and gently pull **the SSD hard drive** out of **Logic Board's** socket.

Watch video tutorial on how to remove and upgrade **SSDs** on **Macbook Air 2015**:

### **Note:**

Do not pull it hard because doing so may damage **the SSD** or **SSD socket** on **Logic Board** .

When installing **the SSD hard drive** , install it properly and in the right place, then use a specialized tool to twist the screws.

### **Good luck!**
