

Use bullets in PowerPoint

Introducing how to number bullets in PowerPoint 2013. You can choose to prefix before or after you enter text.
Step 1: Select the content to create bullet points - Home - click on the Bullets icon - select the available templates.

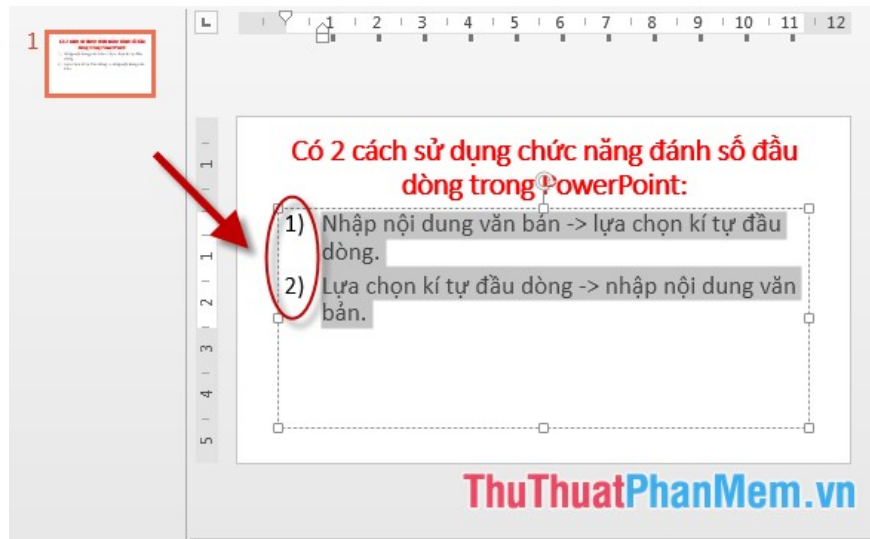

The following article introduces you in detail to use the numbering function in PowerPoint 2013.

You can choose numbering before or after you enter text.

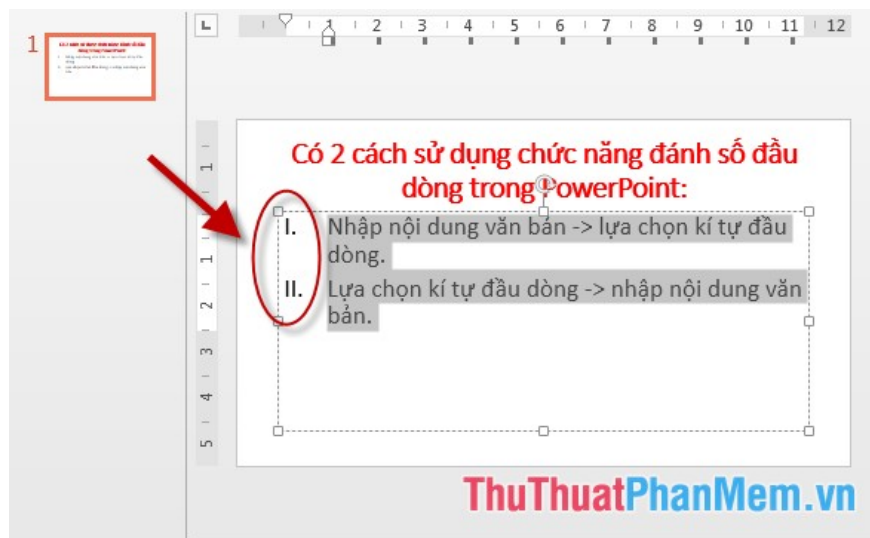

Step 1: Select the content to create bullet points -> **Home** -> click on the **Bullets** icon -> select the available templates:

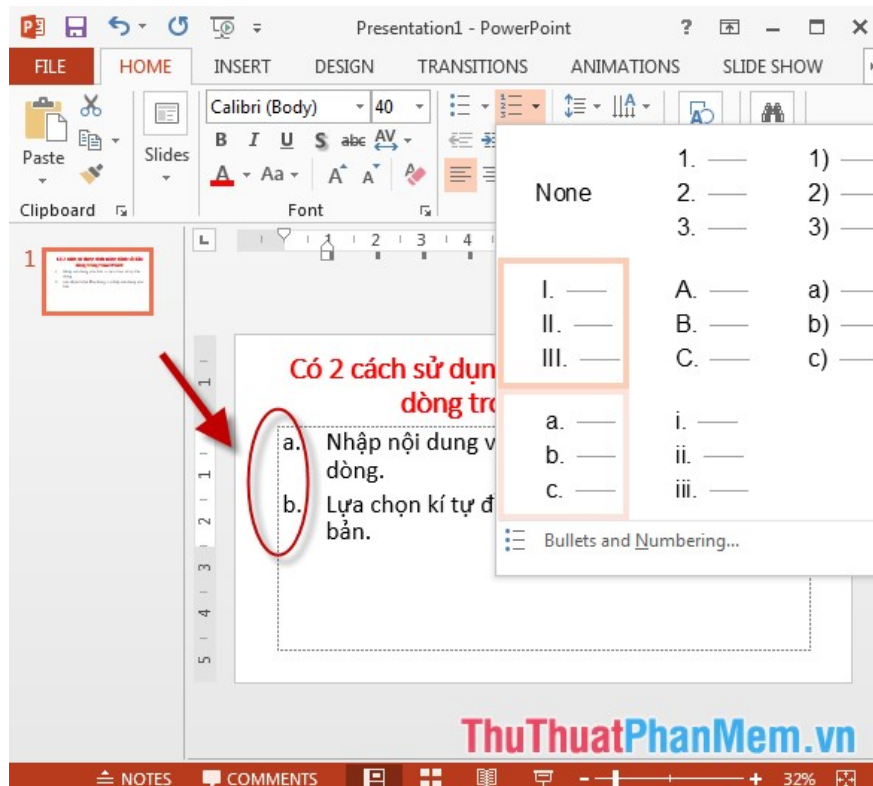

- The results have been numbered:

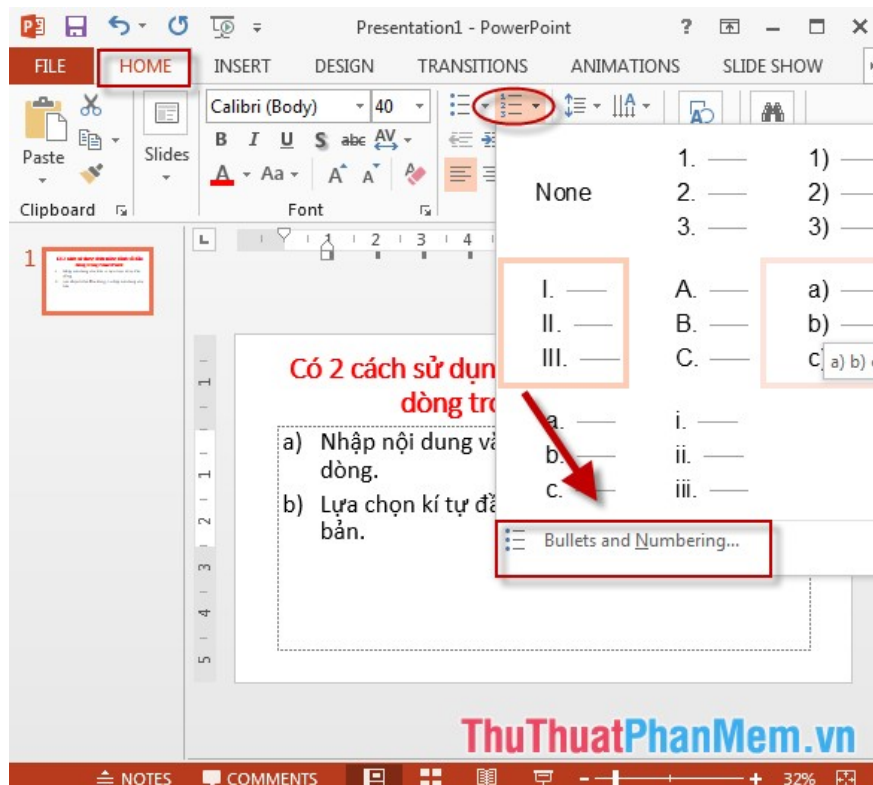

- Similar to Roman numbering:

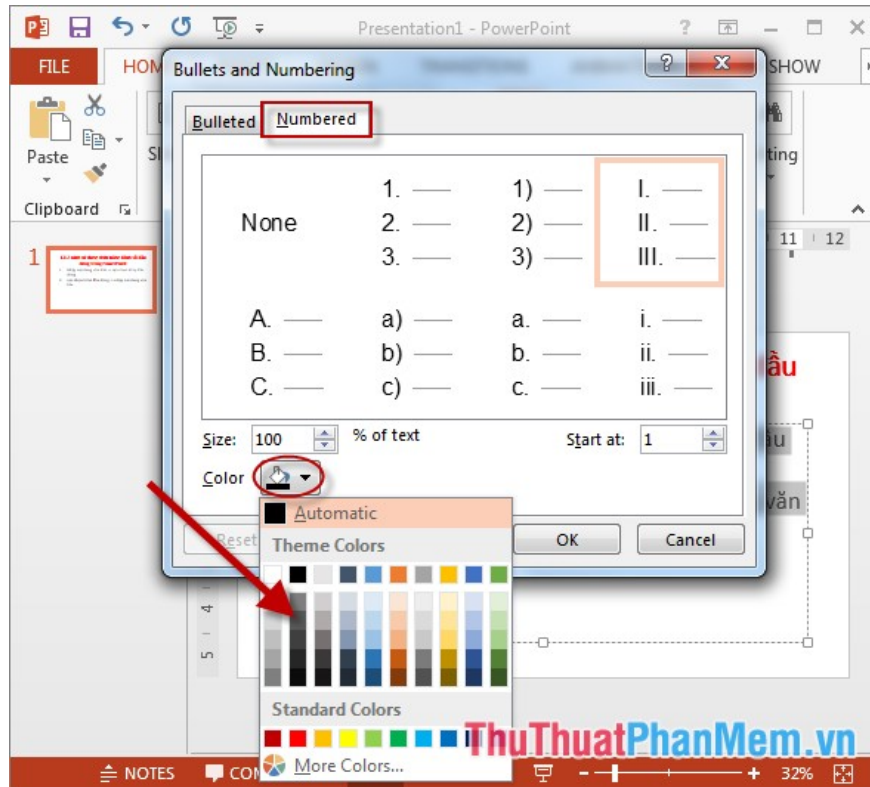

- Or numbered with letter number:

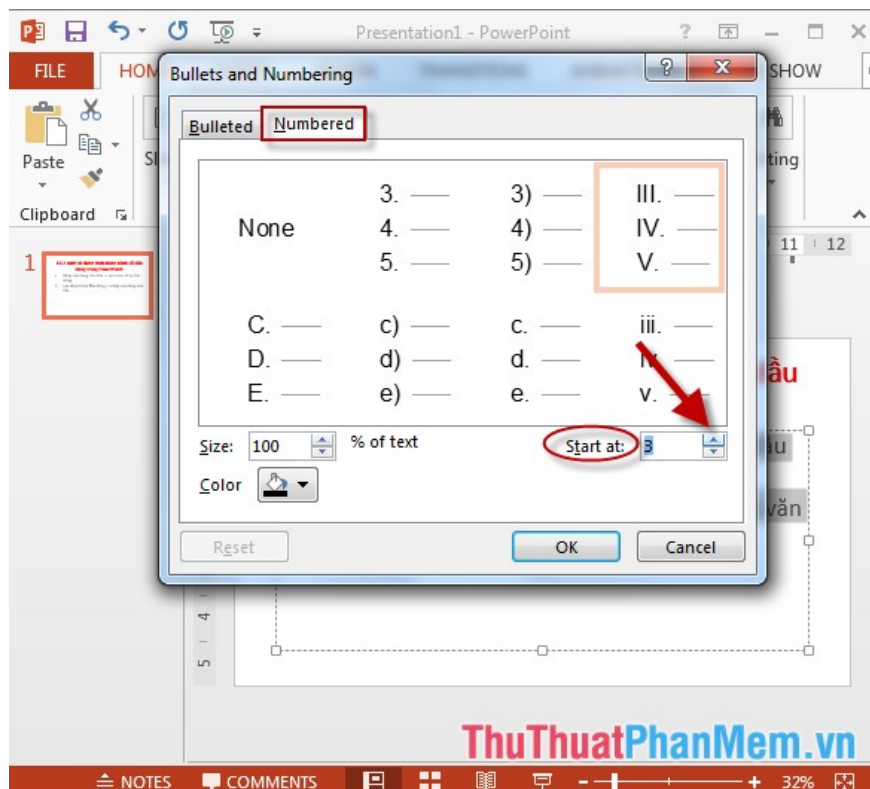

Step 2: If you want to make other customizations, click **Bullets and Numbering**:

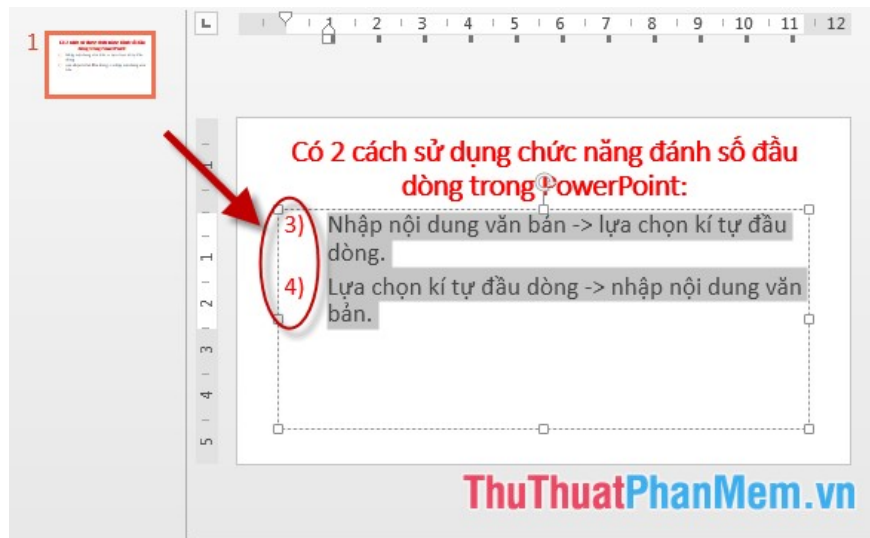

Step 3: The **Bullets and Numbering** dialog box appears -> select the color for the first number in the **Color** section :

Step 4: Click the value in **Start at** select the value to start numbering, for example here choose numbering from 3 -> click **OK** to complete:

- Results after editing and setting the numbered value:

Above is a detailed guide on how to use bulleted functions in **PowerPoint 2013**.

Good luck!
