2. Take notes and lectures with Evernote

1. Download Evernote for Windows

2. Download Evernote for Mac
3. Download Evernote for iOS
4. Download Evernote for Android

To remember important events at work, you often have to make notes about those events in the notebook. In this age of technological development, computers and mobile phones are also an ideal place to store personal notes. However, it is not always possible to bring your computer or notebook with you to view the notes you have created.

Besides supporting office workers, Evernote is also very useful for students, take notes of lesson content, schedule or recipes to remember on their mobile device and then easily accessible from any device with Evernote pre-installed thanks to cloud data synchronization.

3. Scanner Pro - No need to go to a photocopy shop anymore

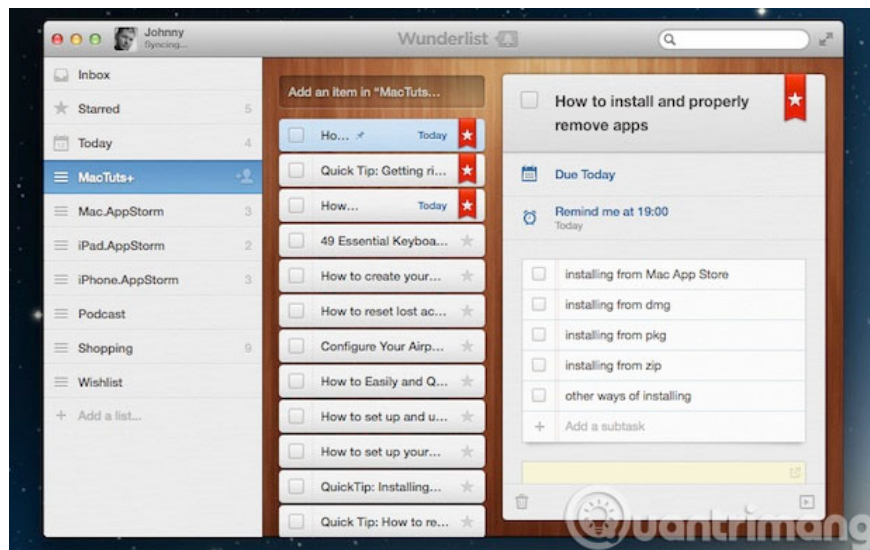

In the past, we often have a solution to re-photocopy documents for further reference at home, however, in some cases it is not a good solution because it is costly and easily crumbling, termite . for a long time.

With Scanner Pro, you will turn your phone into a mobile copier, just hold the phone and capture the document pages, this application will merge into PDF or JPEG files and store in memory or **Dropbox** and **Google Drive** .

4. Arrange work with Wunderlist

1. Download Wunderlist for Android
2. Download Wunderlist for Windows
3. Download Wunderlist for iOS

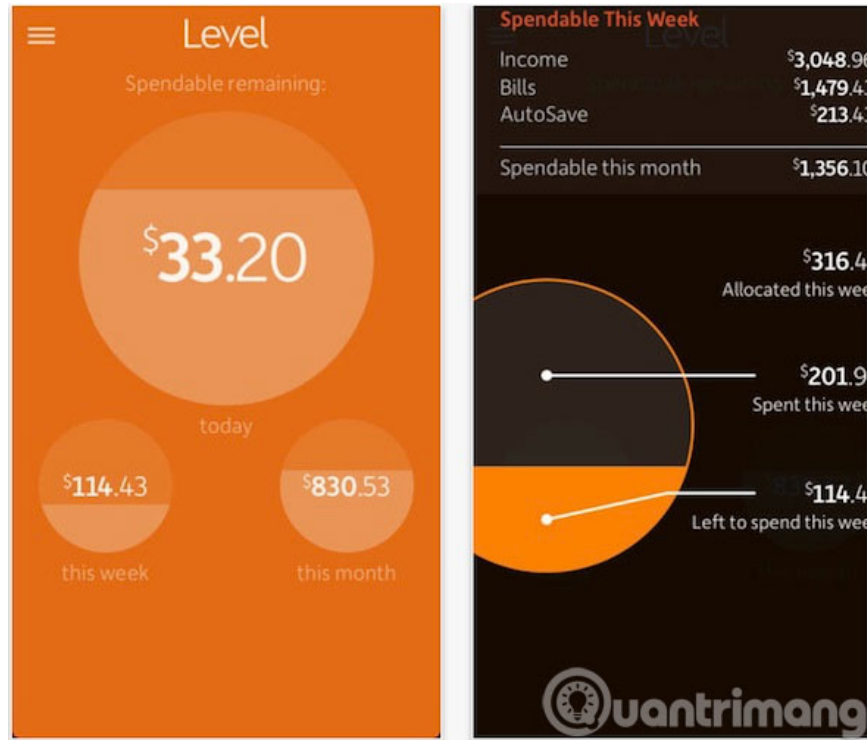

When learning too much and not knowing what to complete first, please ask for the help of Wunderlist. In addition to supporting notes on what to do, this app also helps users to share lists with friends when they need to work in teams to assign and manage workflows easily and efficiently. .

5. Financial management with Level

1. Download Level for Android
2. Download Level for iOS

Student life, especially those away from home to the city, has to pay a lot of different fees. Sometimes it is because of busy life that many people forget many small things, including daily spending. Certainly many of us have sometimes pulled out our wallets and suddenly thought about why this month I used something but there was so little money left in my wallet.

To overcome the forgetfulness and to manage personal spending more closely, users should record daily spending on books or have a more flexible and convenient method - using management application spend on mobile phones.

With Level, you can manage your finances and your money more easily as well as reduce the situation of "money shortages" suddenly causing you to eat shrimp noodles all month.

Hopefully these applications will help you a lot!
