

Useful YouTube tips on Android and iOS

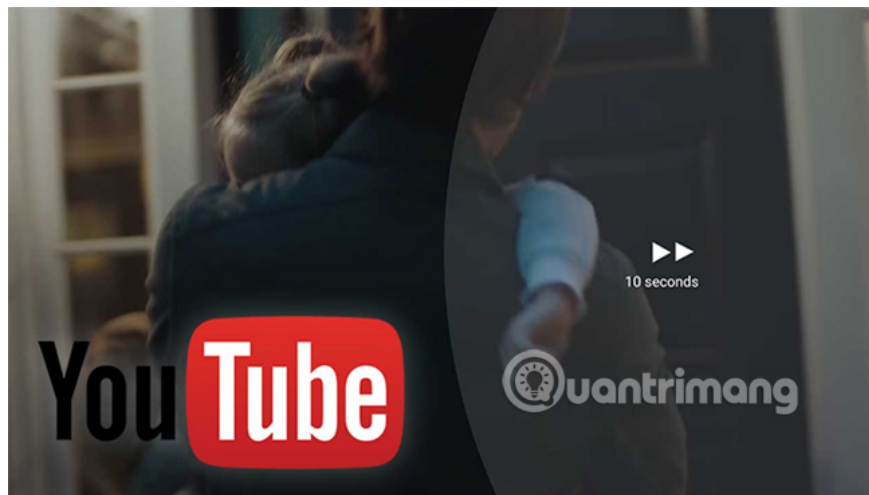

The tips for using YouTube on Android and iOS will help users to exploit many features on the application, support the process of watching Youtube videos.

Youtube application is always a search channel, watching top videos on smartphones. And in the new version, the manufacturer continuously updated some new features, serving users as well as increasing the interesting experience when watching videos on YouTube applications. In the article below, we will provide you with useful tips, frequently used when watching Youtube and Android videos.

1. Download the Android Youtube application
2. Download Youtube iOS for free

1. Adjust YouTube video rewinding time:

Youtube allows users to **touch twice to rewind** a short video, instead of having to drag the time bar as before. We just need to tap twice on the left half of the screen to rewind it to 10 seconds, or the right half of the screen to rewind the video over 10 seconds.

In case we want to adjust the video rewind time on YouTube, access by **Account (avatar image in the upper right corner)**> **Settings**> **Double click to search** . The user then selects the time to rewind the video from 5 seconds to 60 seconds.

2. Turn off search history on Youtube:

The search history section on Youtube will help users to easily search for new videos, with the same video topic previously viewed. This suggested video will appear in the Home tab on the home page and the Up Next section. However, if we want to protect our privacy on YouTube, we should delete video search history.

In the **Settings menu** interface, go to the **Privacy** or **Security History** section and navigate to the **Pause viewing history** and **Pause search history** . The user then switches to **On mode** on both items.

3. Watch Youtube videos with virtual reality glasses:

Currently YouTube also supports watching videos with virtual reality glasses. Users do not need to prepare expensive VR glasses, or videos in the form of 360. Just prepare a medium-range VR glasses like Google Cardboard.

At the video player interface, we will click on **the 3 vertical dots icon** , then click on **View Cardboard** . Then click **Continue** to switch the video to Cardboard view. **Note** , you should transfer the video to full HD quality.

Immediately after that, the screen interface will be divided into two virtual projection screens in VR space. We need to use VR glasses to watch videos only. Click on the screen to put the video in the center position.

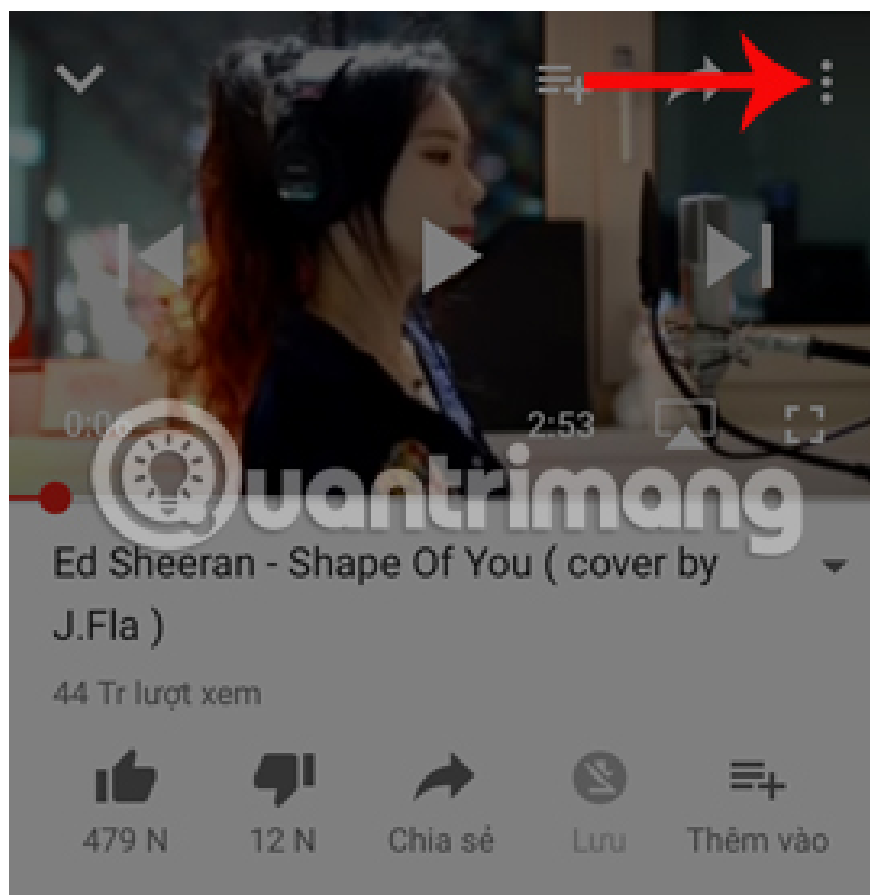

4. Watch Youtube videos with mute subtitles:

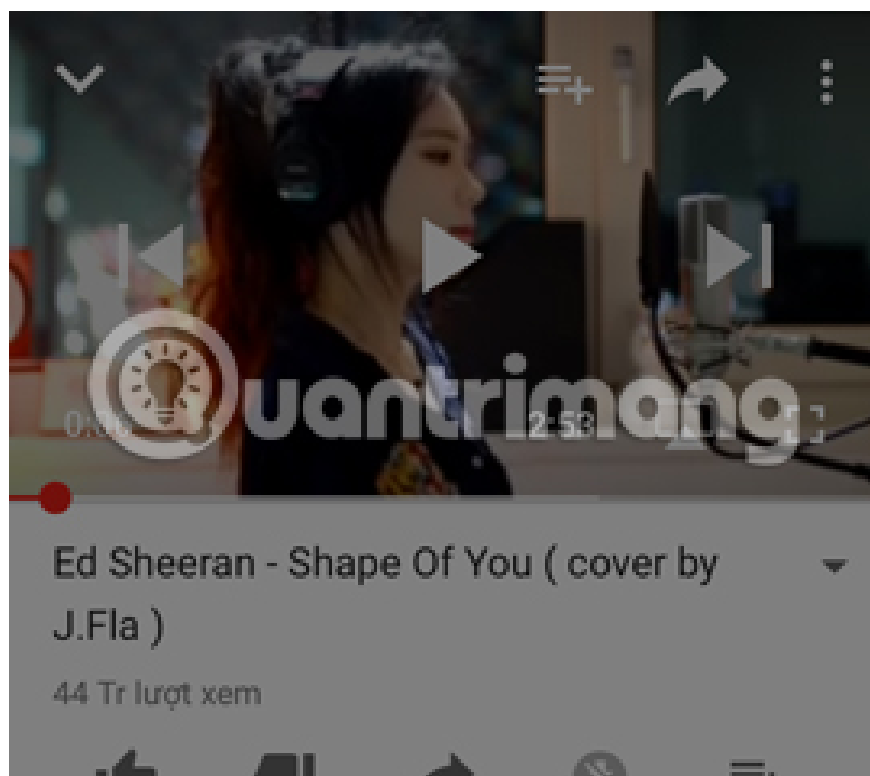

If you are in an environment where you need to be quiet, it is necessary to put Youtube videos in silent mode. And YouTube has also added automatic captioning for videos, which allows you to watch videos even when mute.

At the video playback interface, click **the 3 dot icon** and then select **Subtitle** . Then select **the language** to display.

Note to users , depending on the video, YouTube will provide subtitle mode, as well as supported subtitle language.

5. Adjust the next video auto play mode:

As mentioned, the proposed video will be based on the YouTube video search courtesy. These videos will appear below videos playing on your computer YouTube, or swipe from the bottom up in Youtube mode full screen on mobile.

And these videos will always be played automatically when the current video ends. In case you want to turn off the auto-transfer video feature, switch to **Off mode** in the horizontal bar in the **Auto play** section just below the video being watched.

The image shows a YouTube video player interface. At the top, there is a video player with a dark background and the text "Quantrimang" in white. Below the video player, there are icons for play, comments, share, save, and add to playlist, with corresponding text: "8 Tr", "397 N", "Chia sẻ", "Lưu", and "Thêm vào". Below this, the channel name "Ed Sheeran" is displayed, along with "17 Tr người đăng ký" and a red "ĐĂNG KÝ" button. Underneath, the "Tiếp theo" (Next) section is visible, featuring a toggle switch for "Tự động phát" (Autoplay) which is currently turned on. This toggle switch is highlighted with a red rectangular box. Below the toggle, three video thumbnails are shown with their titles and view counts: "Ed Sheeran - Castle On The Hill [Official...]" (182 Tr lượt xem), "Ed Sheeran - Galway Girl [Official Video]" (105 Tr lượt xem), and "Ed Sheeran - Photograph (Officia..." (351 Tr lượt xem).

6. Save Youtube videos offline:

The feature of putting videos into offline view has been switched to the Library tab by Youtube. Users just need to click **the Save icon** to download the video. Then select the **quality of the video you** want to watch in offline mode, then click **OK**.
