

Username, password, email, phone number ... of more than 160 million Zing ID accounts are for sale

On April 24, on a foreign forum called Raidforums, a member posted a file that was supposed to be information of VNG's 163,666,400 million Zing ID accounts.

On April 24, on a foreign forum called Raidforums, a member posted a file that was supposed to be information of VNG's 163,666,400 million Zing ID accounts. This information file has a capacity of 7.55 Gigabytes and the information includes account name, password, email, phone number, date of birth, address, ID number - passport . of the members. use Zing ID. By the evening of April 27, this file was deleted from Raidforums.

1. Instructions for changing Zing ID password and installing 2-layer password

According to VNG, more than 160 million sold Zing ID accounts are in the risk of leaked data that the company has discovered since 2015. At that time, users were asked to change their passwords. 99% of these accounts are no longer active in recent years.

Zing ID is the name of VNG's user account to use some of the company's services such as gaming, social networking .

In the leak data file, there are many overlapping lines, so the number of accounts at risk of leakage after overlapping is about 33 million Zing IDs. In addition, the leaked password is MD5 encoded although the safety level is not high, but not everyone can login to Zing ID from the information shown above.

Because users have the habit of sharing passwords for multiple accounts Zalo, email or Facebook . so security experts recommend that users with Zing ID should immediately change the password, even with other services. but share the same password of Zing ID.

VNG is currently strengthening the security system for game services and problem solving.

RaidForums is a forum for posting, buying and selling information and data leaking with more than 90,000 members and tens of thousands of users every day.
