

# Using Arounsound records audio on the phone

Arounsound is an audio recording and management application on your phone anywhere.

The recorder is available on the phone, but the features are still limited, almost simply recording. If you want more audio options, you can use the Arounsound application. With Arounsound, users can record audio, add notes to audio files with different tools.

In particular, we can access the recording file anywhere thanks to the account synchronization function. The following article will show you how to use Arounsound on the iPhone, with the Android version of the app you do the same.

1. Recording on computers does not need software
2. Recording software on the computer
3. The best recording app for Android
