**In the previous tutorial, TipsMake.com introduced how to handle and fix infected computer with Kaspersky Rescue CD tool , and this time we continue to mention another support tool. , that is BitDefender Rescue CD . Here are some key and basic features of this application.**

First, visit [here](#) and download the latest BitDefender Rescue CD version to your computer, then use ImgBurn to burn the \* .iso file to a CD or DVD:

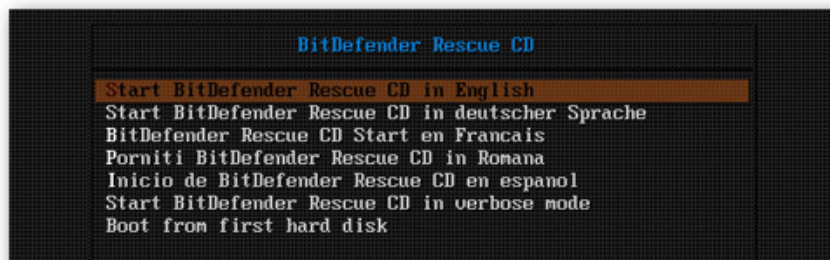

For computers without a CD / DVD drive, download the UnetBootin program and a USB drive to use:

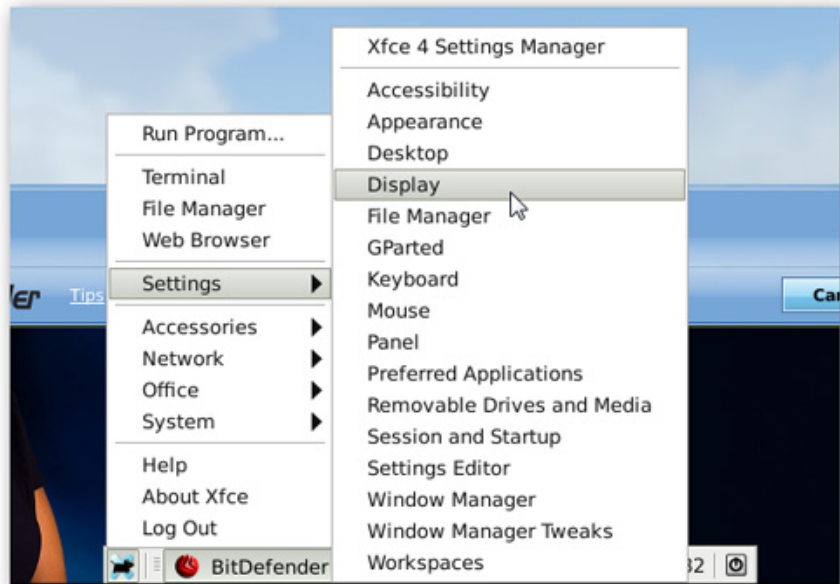

In *Diskimage* , select the ISO format and point to the downloaded BitDefender Rescue CD file, the device - Type is USB and select the correct USB drive in the system (eg E, F .) and click OK .

### **Start using:**

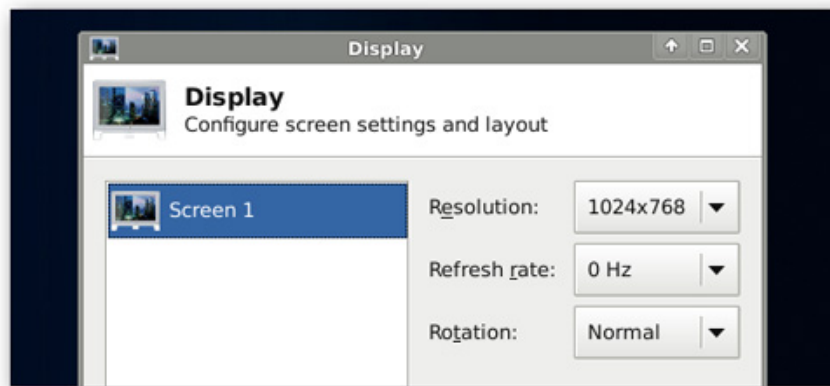

When booting the system from CD or USB, select the display language mode (usually English):

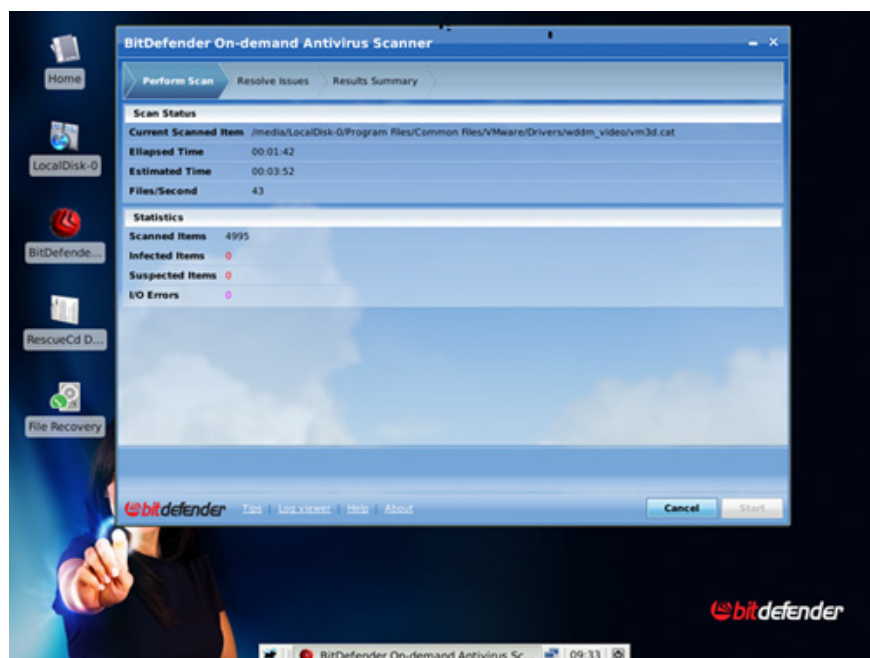

If the original resolution is too small, you can change it again via *Menu> Settings> Display:*

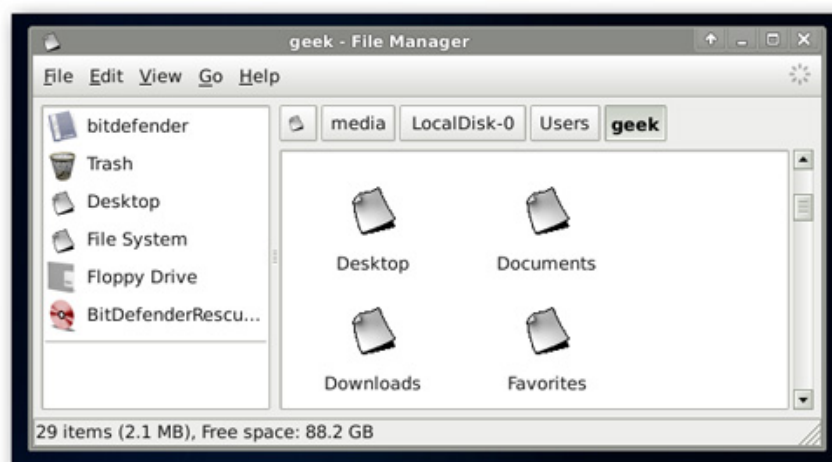

For example, here we switch to the popular  $1024 \times 768$  mode:

After accepting the terms of use agreement, the scanning process will automatically start:

If you want to access partitions on your hard drive, use *File Manager* support :

Also included is the *TestDisk* data recovery utility :

```
TestDisk 6.11.3. Data Recovery Utility, May 2009
Christophe GRENIER <grenier@cgsecurity.org>
http://www.cgsecurity.org

TestDisk is a free data recovery software designed to help recover lost
partitions and/or make non-booting disks bootable again when these symptoms
are caused by faulty software, certain types of viruses or human error.
It can also be used to repair some filesystem errors.

Information gathered during TestDisk use can be recorded for later
review. If you choose to create the text file, testdisk.log , it
will contain TestDisk options, technical information and various
outputs; including any folder/file names TestDisk was used to find and
list onscreen.

Use arrow keys to select, then press Enter key:
[ Create ] Create a new log file
[ Append ] Append information to log file
[ No Log ] Don't record anything
```
