1. Websites that create free online logos
2. Using DesignEvo to design online logo
3. How to design online advertising by Canva

## How to design online with DesignBold

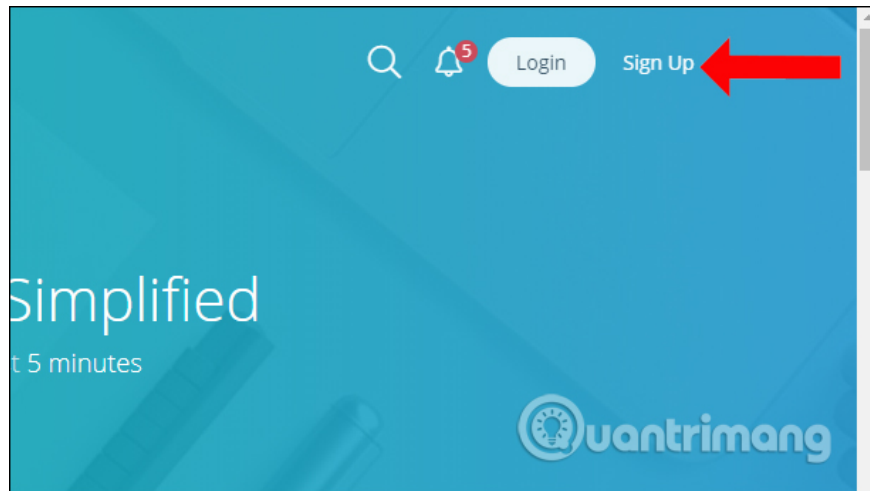

### Step 1:

Click on the link below to access the main interface of DesignBold.

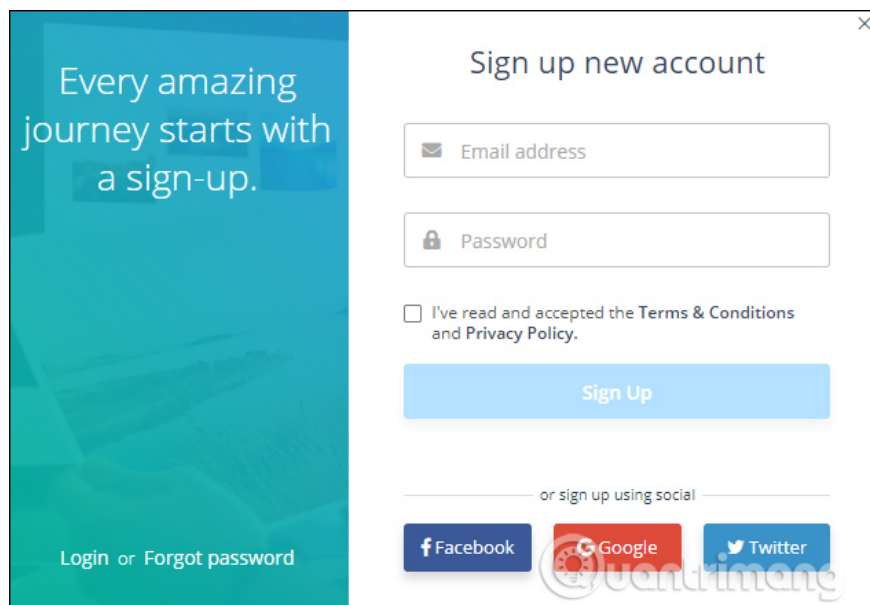

1. <https://www.designbold.com/>

### Step 2:

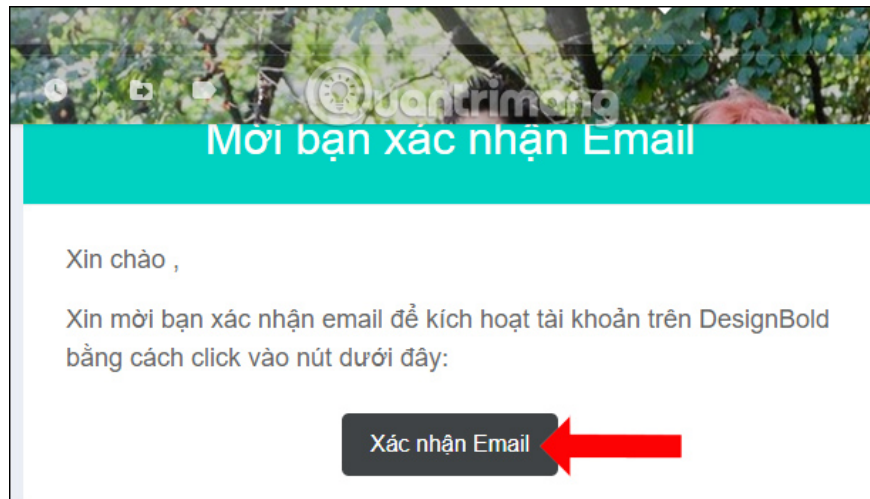

At the interface first click **the Sign Up button** to register an account using DesignBold.

Here we will choose to create a new account via email address, or use Facebook, Google or Twitter accounts.

You need to access the email address to verify your account, click **Confirm Email** .

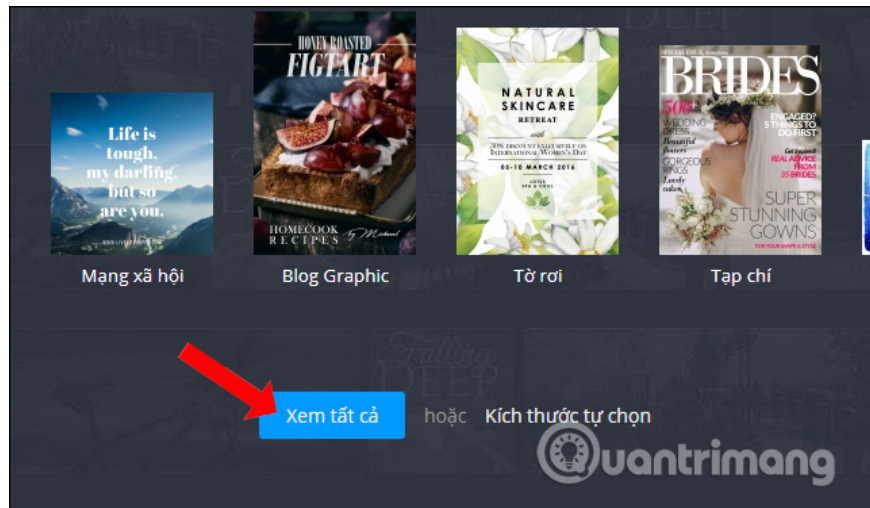

**Step 3:**

Switch to the new interface and click on the **Design** button **now** .

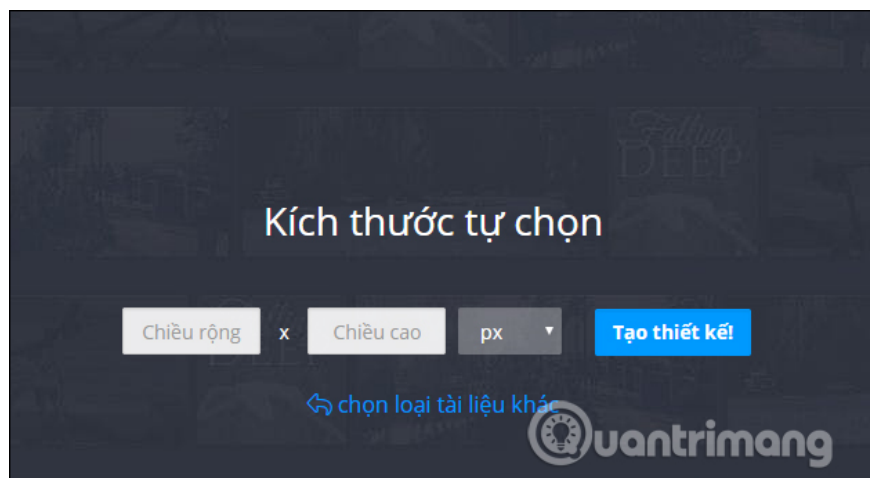

DesignBold will provide topics designed for users to choose from such as Postcards, Social Networks, Blog Graphic, Leaflets, Magazines, Cards. To select more design themes click **View all** .

There will be many different design sizes, as well as the available design layout that DesignBold provides. In case the user wants to create their own size, click **Size self-selected**.

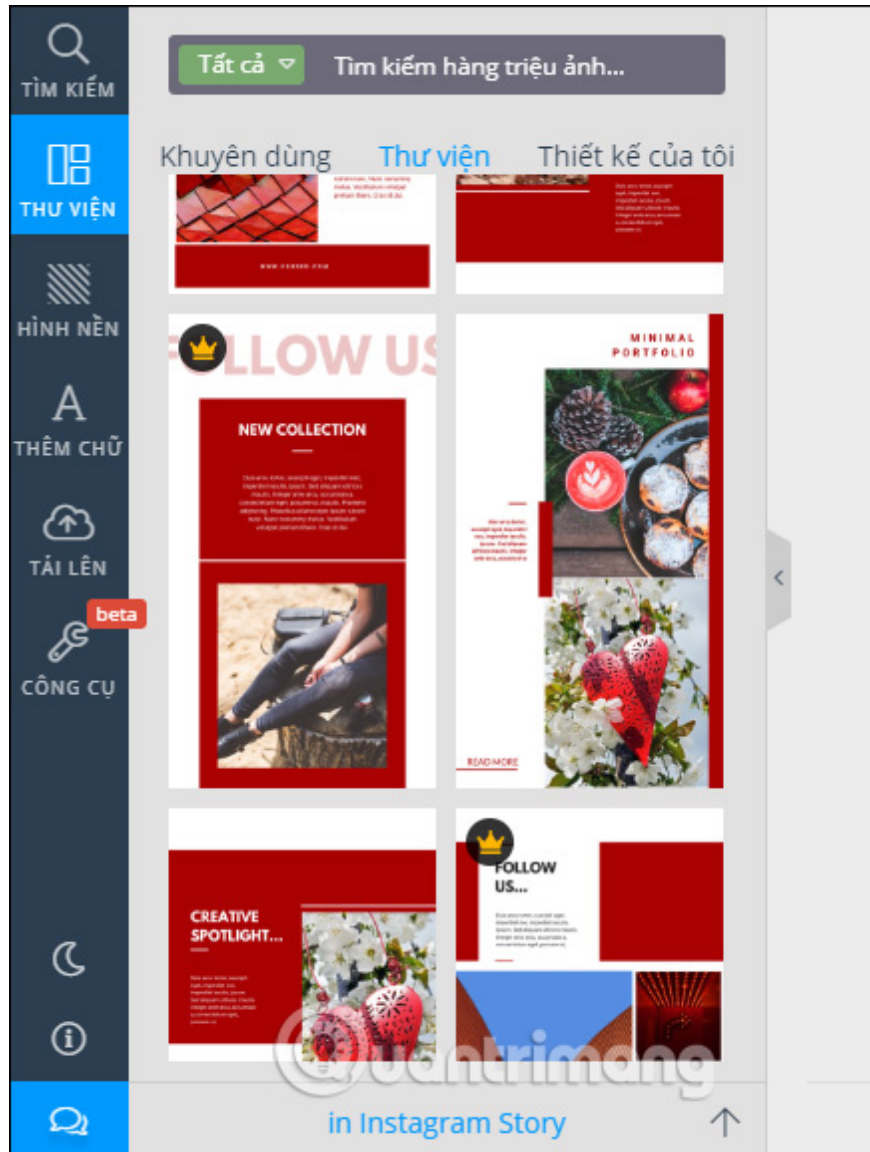

Enter the height and width dimensions and then click **Create design**.

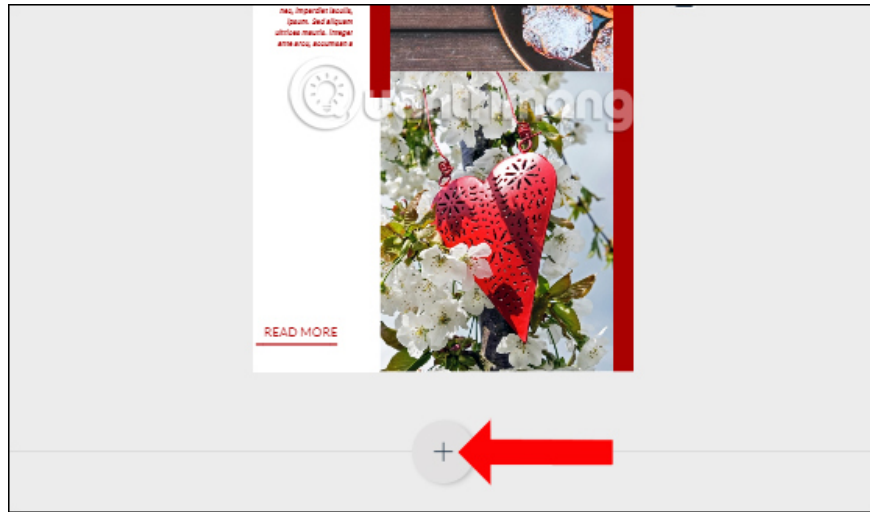

#### Step 4:

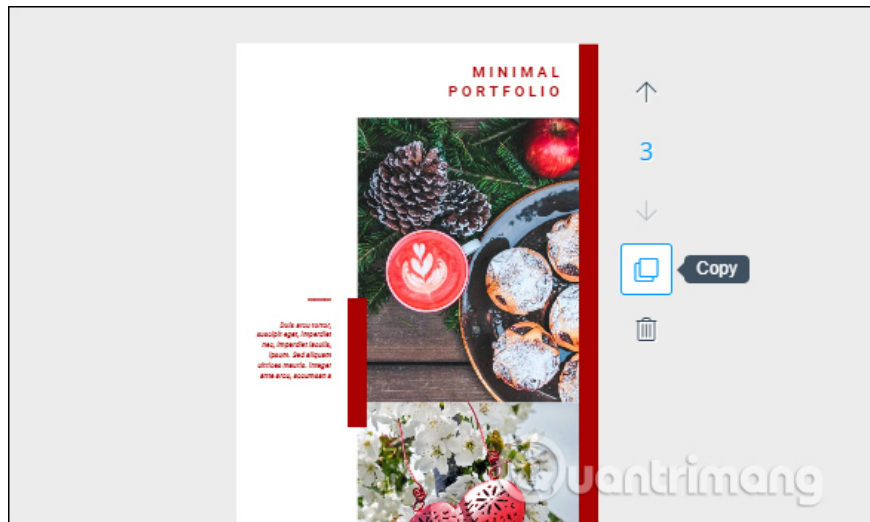

Go to design interface on DesignBold. First of all, we will see a variety of support templates with many different styles. We can click on each template to see the preview image in the template.

In case you design slides with multiple pages, just press **the plus sign** below to add a design page.

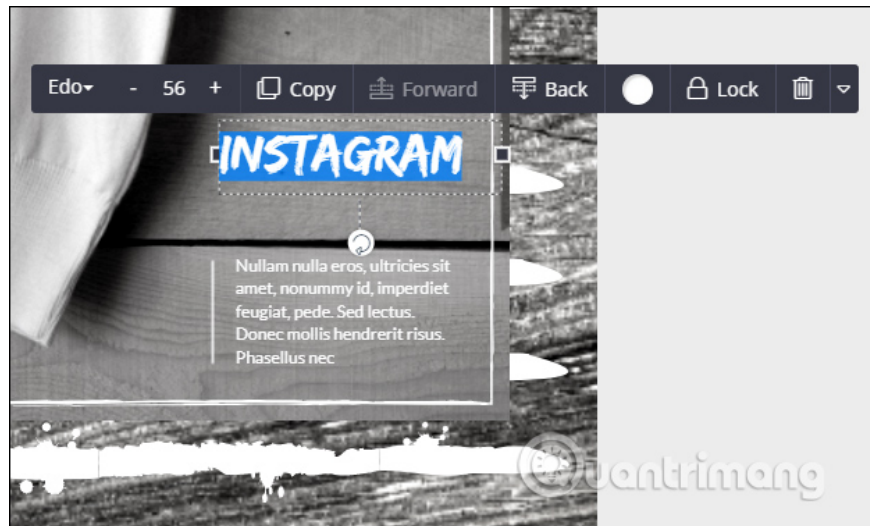

Right next to it will be the tools for use, with moving arrows if multiple design pages, Copy icon to copy design and trash icon to delete.

### Step 5:

Next you can edit the design content with the design content provided by DesignBold. When clicking on the image, we will have the editing bar as shown below.

You can change the text content team in the picture, choose the font you want to use, change the position of the text, select the font color, or even delete the object in the picture.

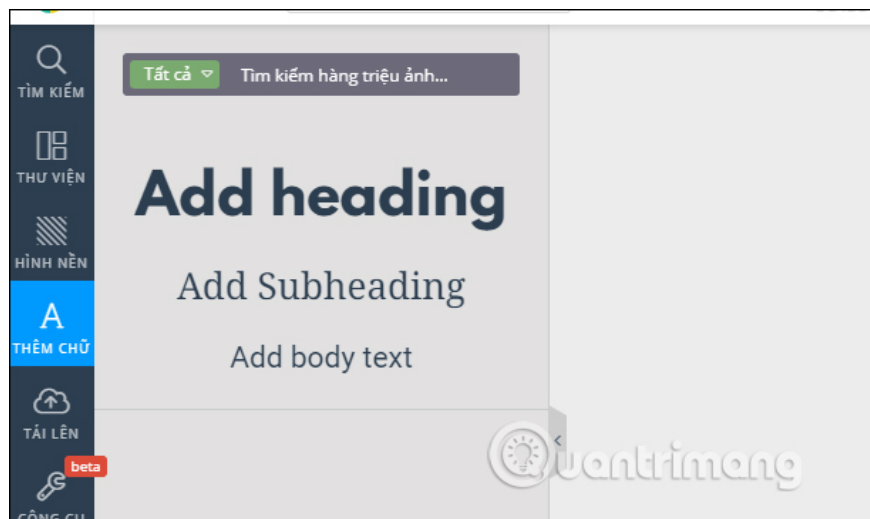

### Step 6:

With the wallpaper item you can choose the background colors available to change the design image.

### Step 7:

In case you want to add content to the design image, in the section **Add text** can insert content into the section Add heading, Add Subheading or Add body text.

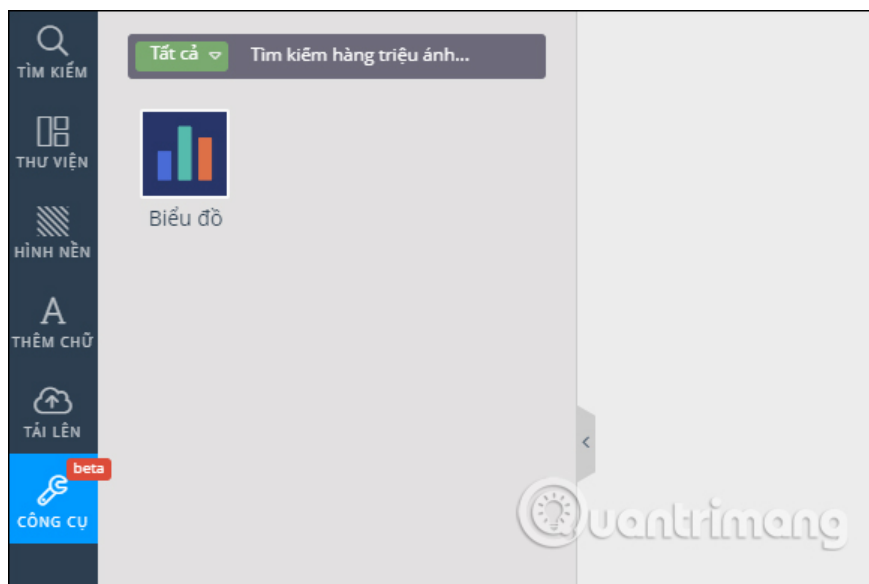

Text position and text size can be changed to suit each person's design ideas.

### Step 8:

The **Upload** section will be used to download images from your computer or on the Facebook. The **Tools** section will be a Chart, but currently this feature only uses column charts, in the process of research.

### Step 9:

After you have finished editing and designing, click the **Download** button at the top of the interface.

In the save image interface, enter a new name for the design, choose a format for the design, choose to save the design to Dropbox, or click **Save to computer** . The default download quality will be High.
