

Using electric saws to cut water balloons, interesting things happened

The video captures the image of a water balloon being cut by an electric saw broken by a high-speed camera that many people can enjoy.

The video captures the image of a water balloon being cut by an electric saw broken by a high-speed camera that many people can enjoy.

1. Find your heart with a slow turn when the guy jumps into 1000 mousetrap
2. Close up of a giant water ball puncture with 2m diameter at 1,000 fps

The process of breaking the water ball by electric saw only takes a second but when watching slow rotation, the unexpected happened. Check out the video below to discover this interesting thing.
