

# Using SOVS2 to pose positively and positively

SOVS2 is a photographic application that has a unique shooting style for photographers to follow.

Photo editing and color-editing applications are now very familiar, but photo-taking applications like SOVS2 are being hunted by young people. There are many cases where you ask other people to take a photo and want them to know the exact shooting posture you take, then SOVS2 is the application we need.

SOVS2 is a Korean application, short for SomeOne Very Special. The application offers a lot of unique shooting styles, for personal shooting or group shooting. There are currently two SOVS versions, priced at \$ 0.99 for one-on-one photography, and SOVS2 for free for group photos, but still pay a fee to open many other poses. The following article will guide you how to use SOVS2 to take photos on your phone.

1. The best free photo editing software on your computer
2. 6 photo editing applications that help you catch the "hot trend" trend of young people
3. Top free photo editing application on iPhone

## Instructions for taking photos on SOVS2

NORMAL BACKGROUND

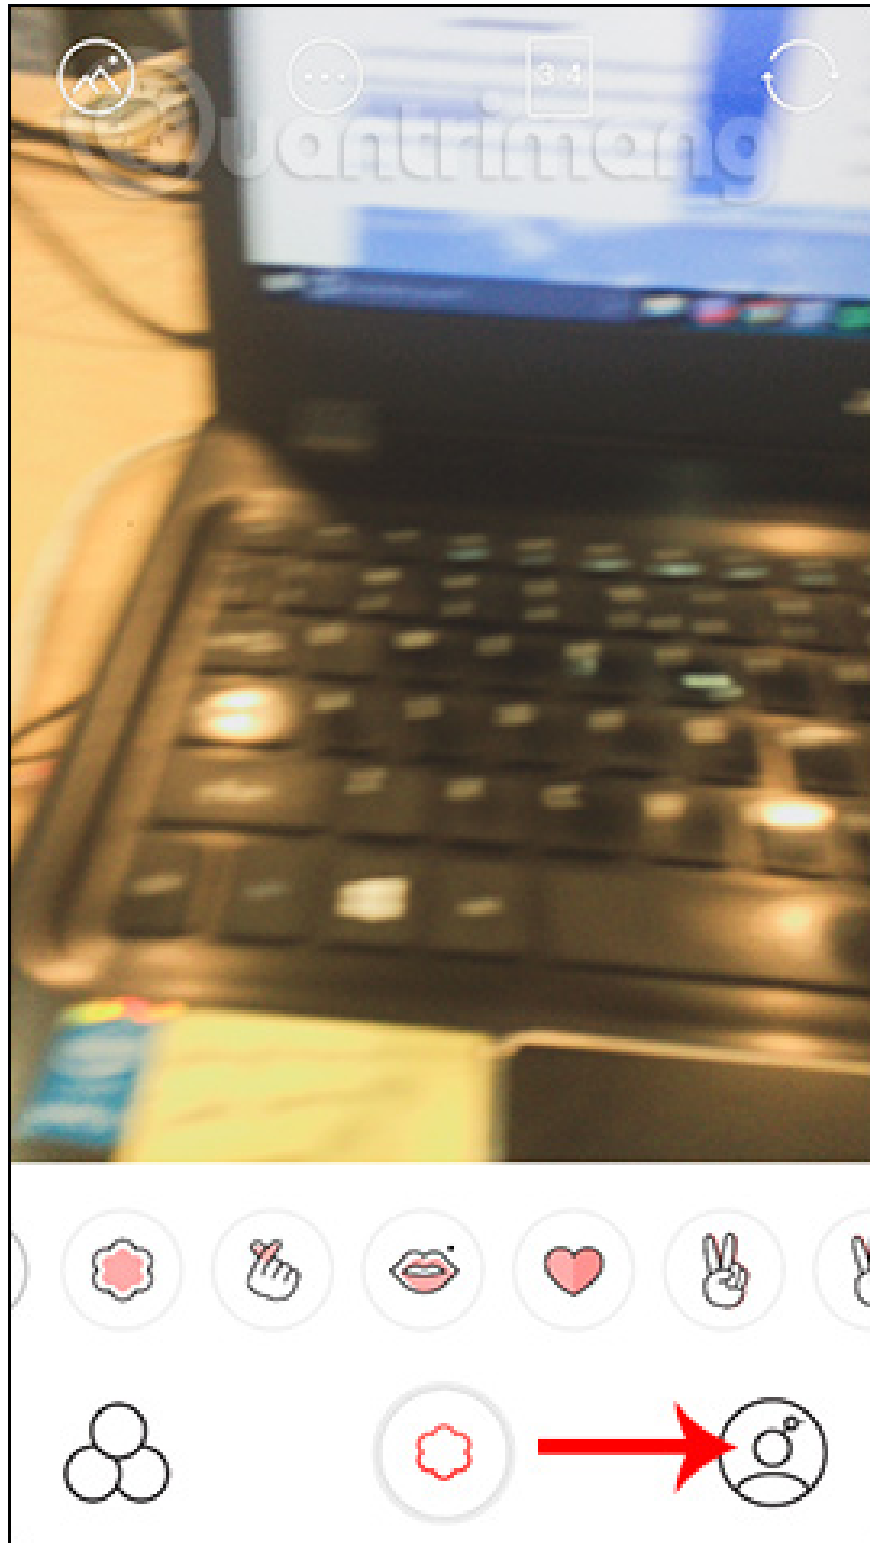

When you click **the 3 dot icon**, you will see an option to edit and adjust the shooting frame. Click the left circle icon to open the photo album on the device.

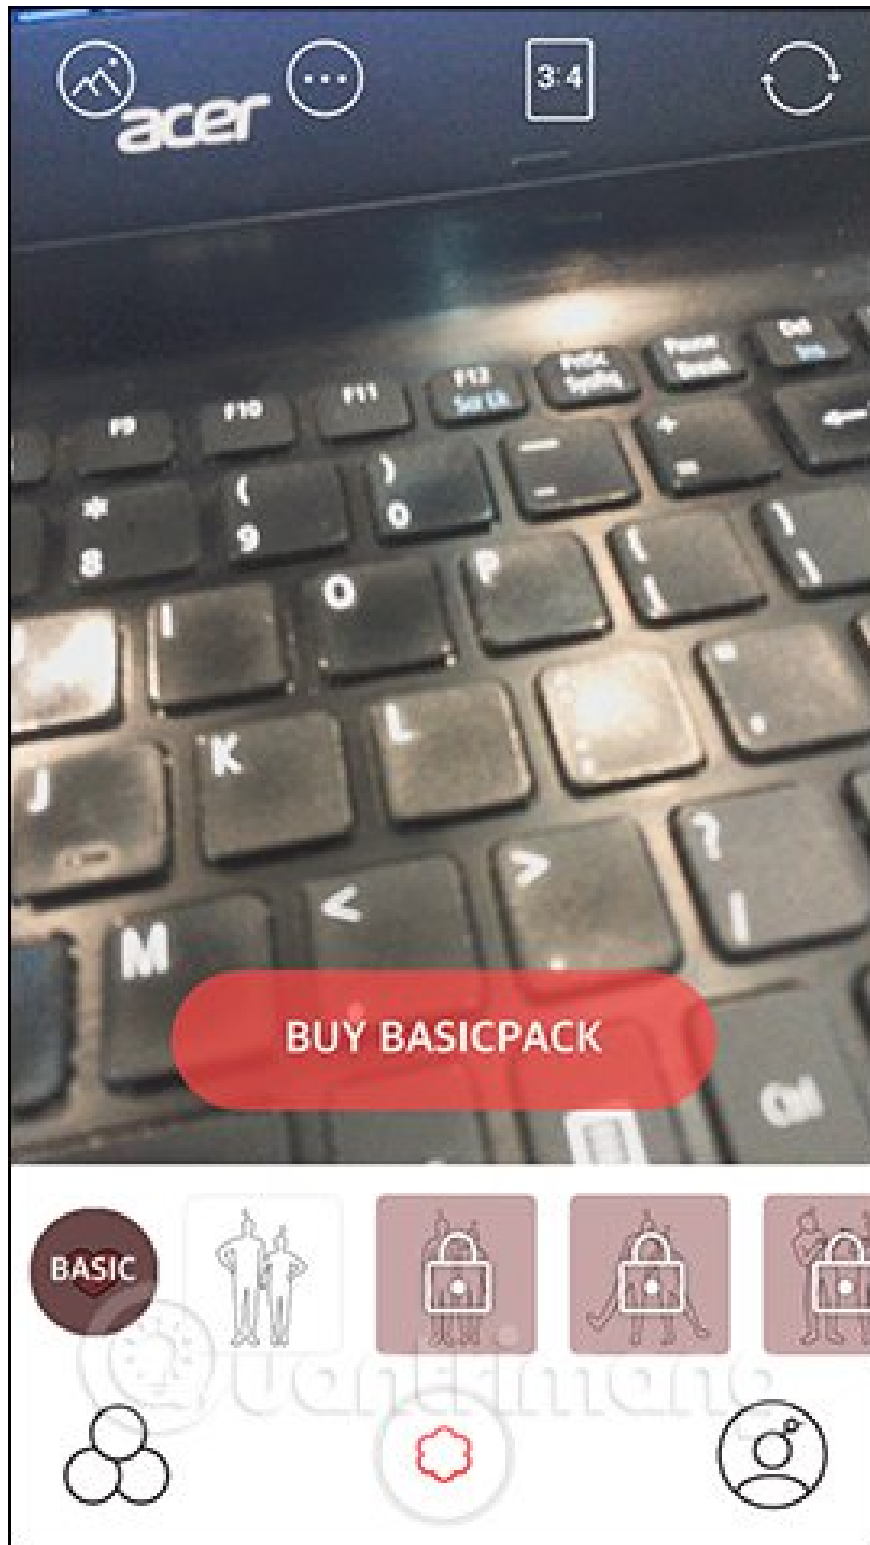

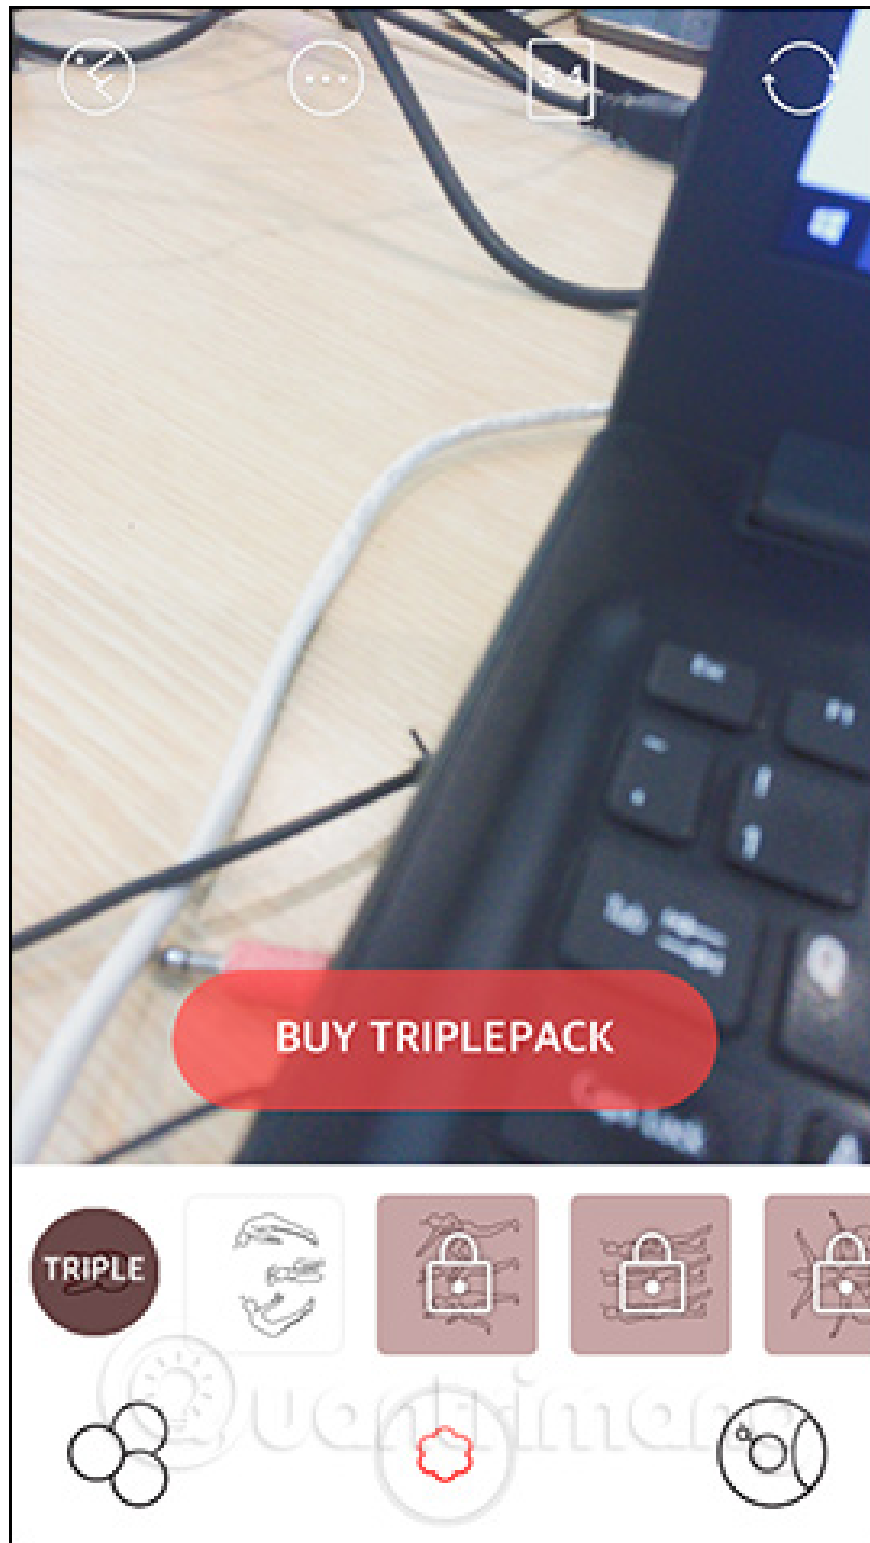

### Step 5:

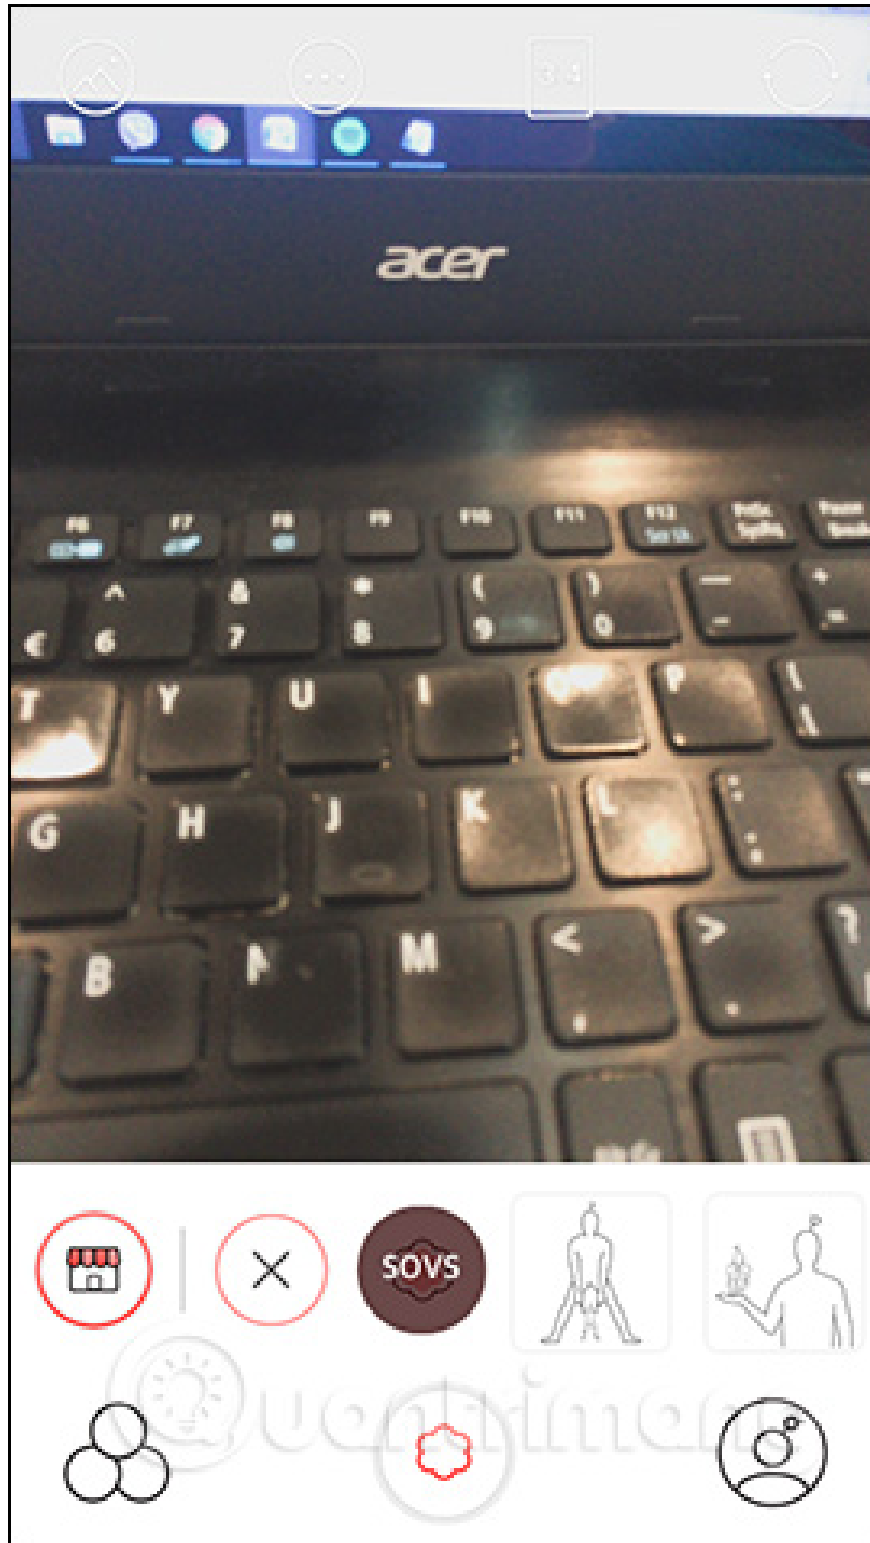

Below click on **the right humanoid icon** to display the shooting posture patterns. When you click on a shooting posture you will have themed shooting styles like Triple, Basic, . These shooting modes will only unlock one type of shot, and the user must buy it if you want more. shooting style.

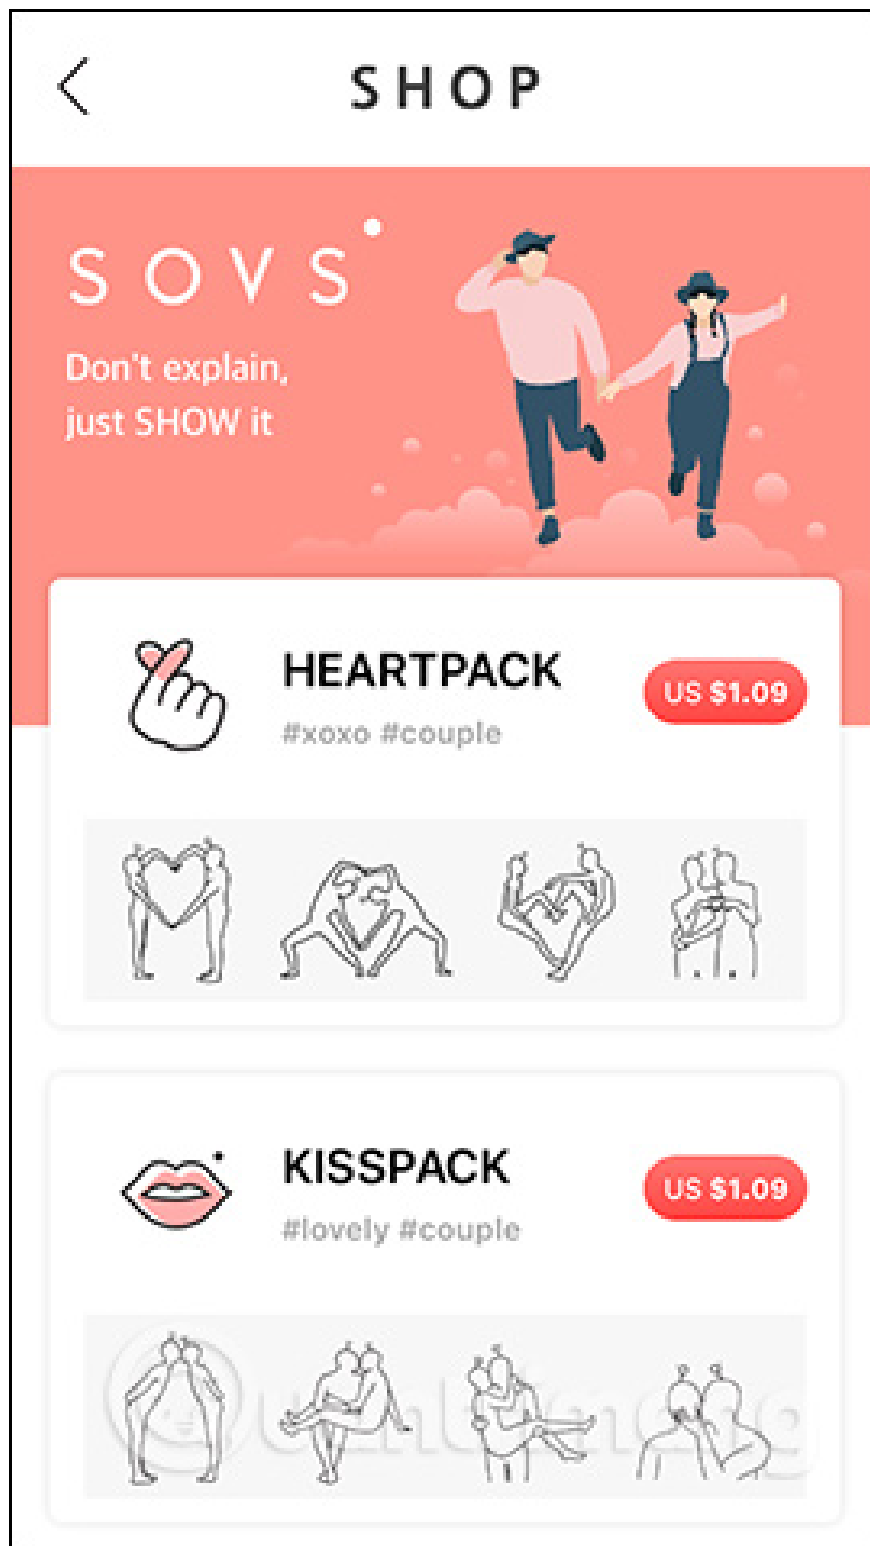

Or you can press the SOVS model to have 4 free shooting styles. If you click on **the store icon**, it will display the shooting styles to buy if you want.

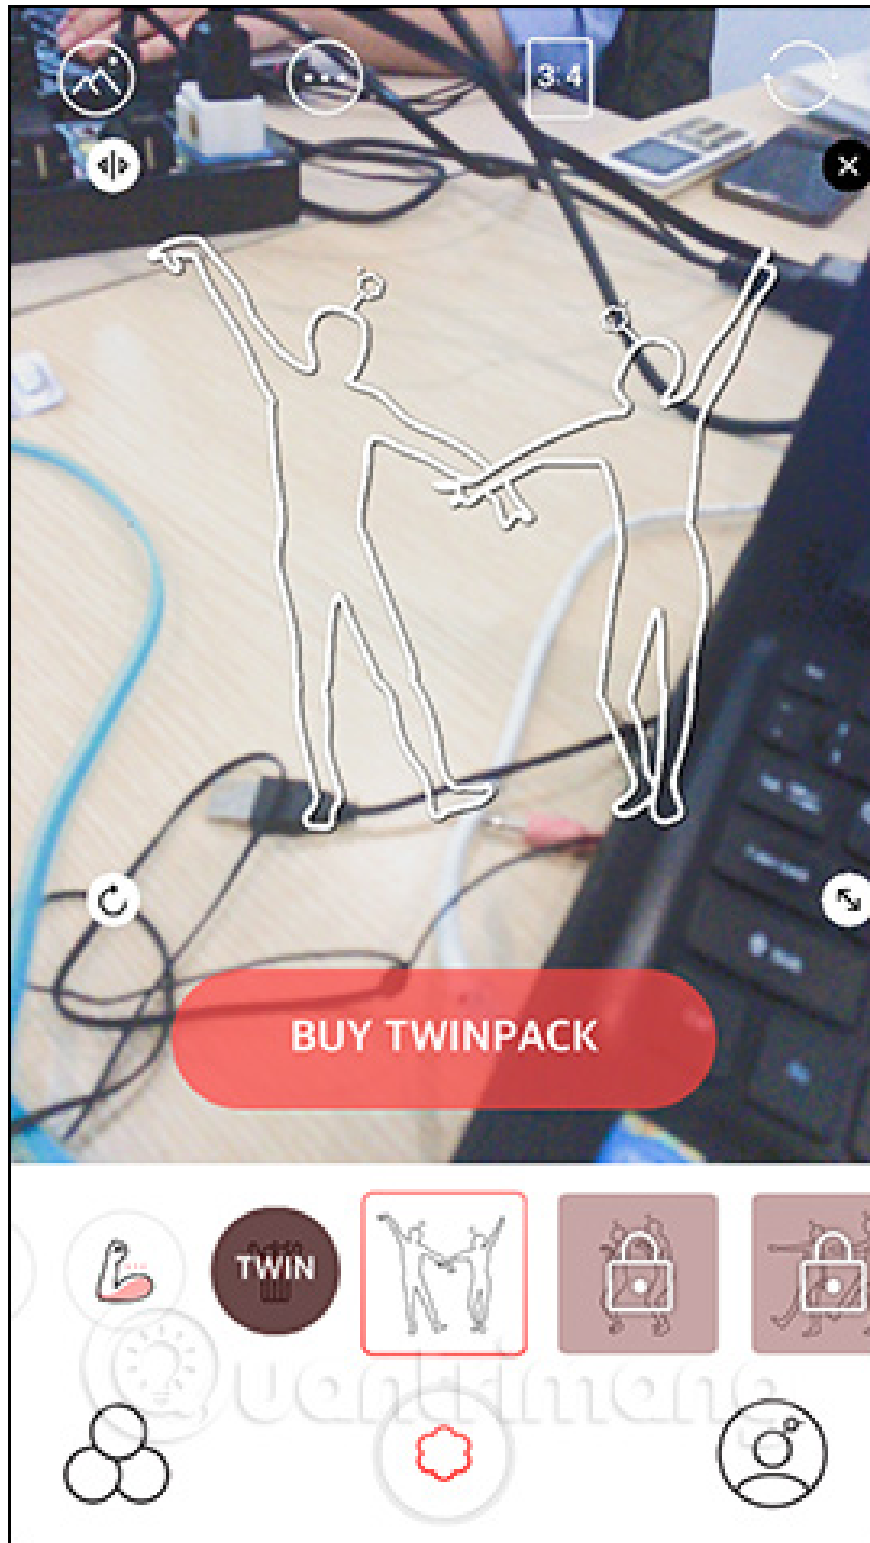

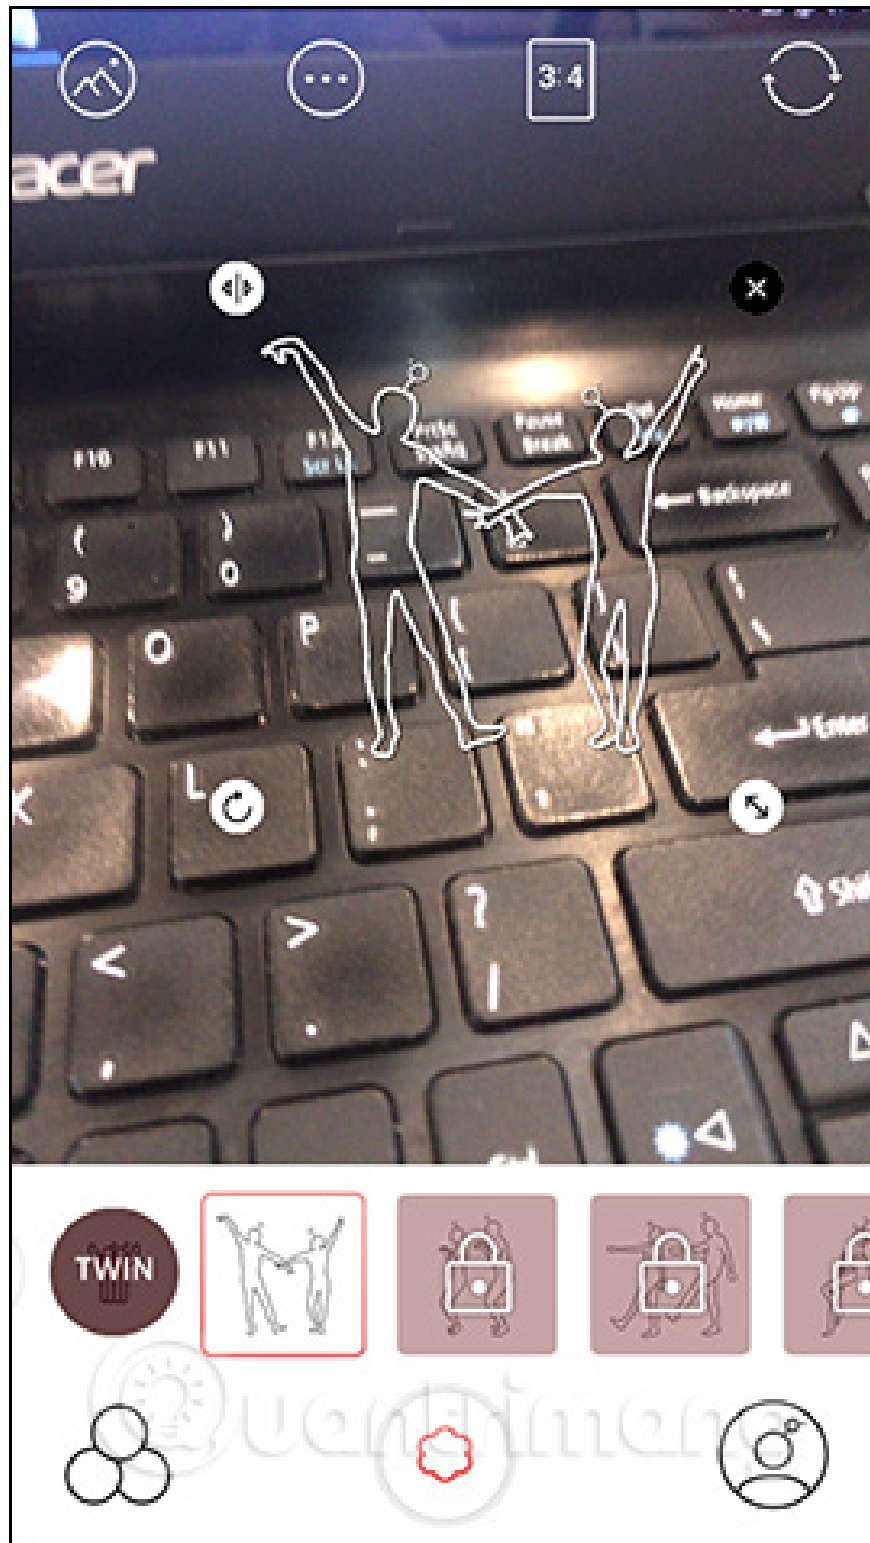

**Step 6:**

Click on a pose you want to capture and see the white contours depicting the correct shooting posture. Can zoom in or out, move the shooting simulation to any location you want.

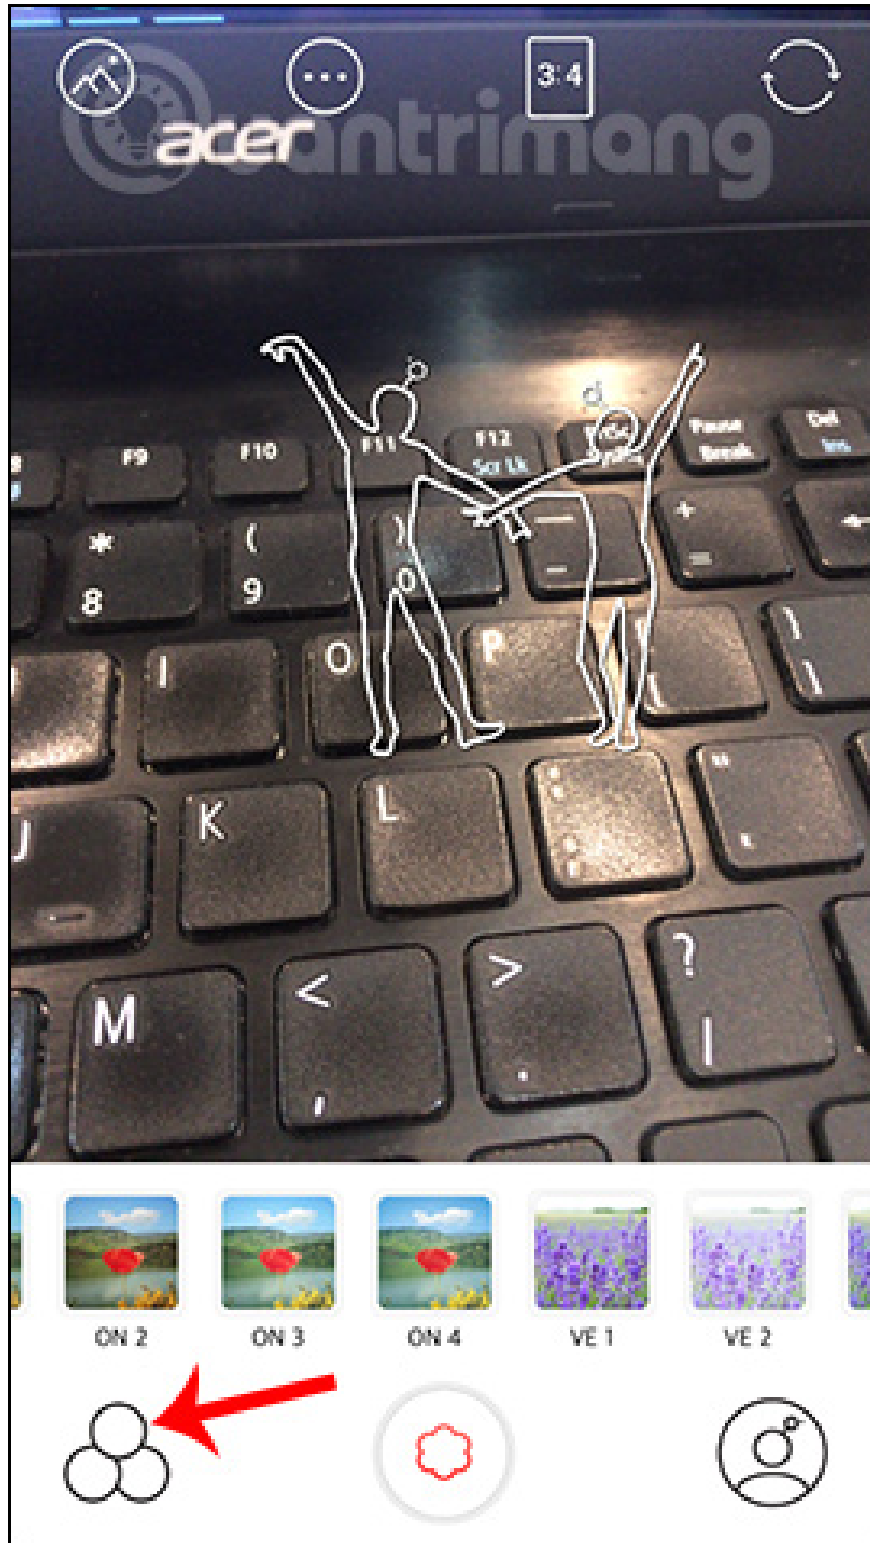

Now you just need to take the other person to take a picture and they will know the shooting posture you want. Click on **the middle button to capture** .

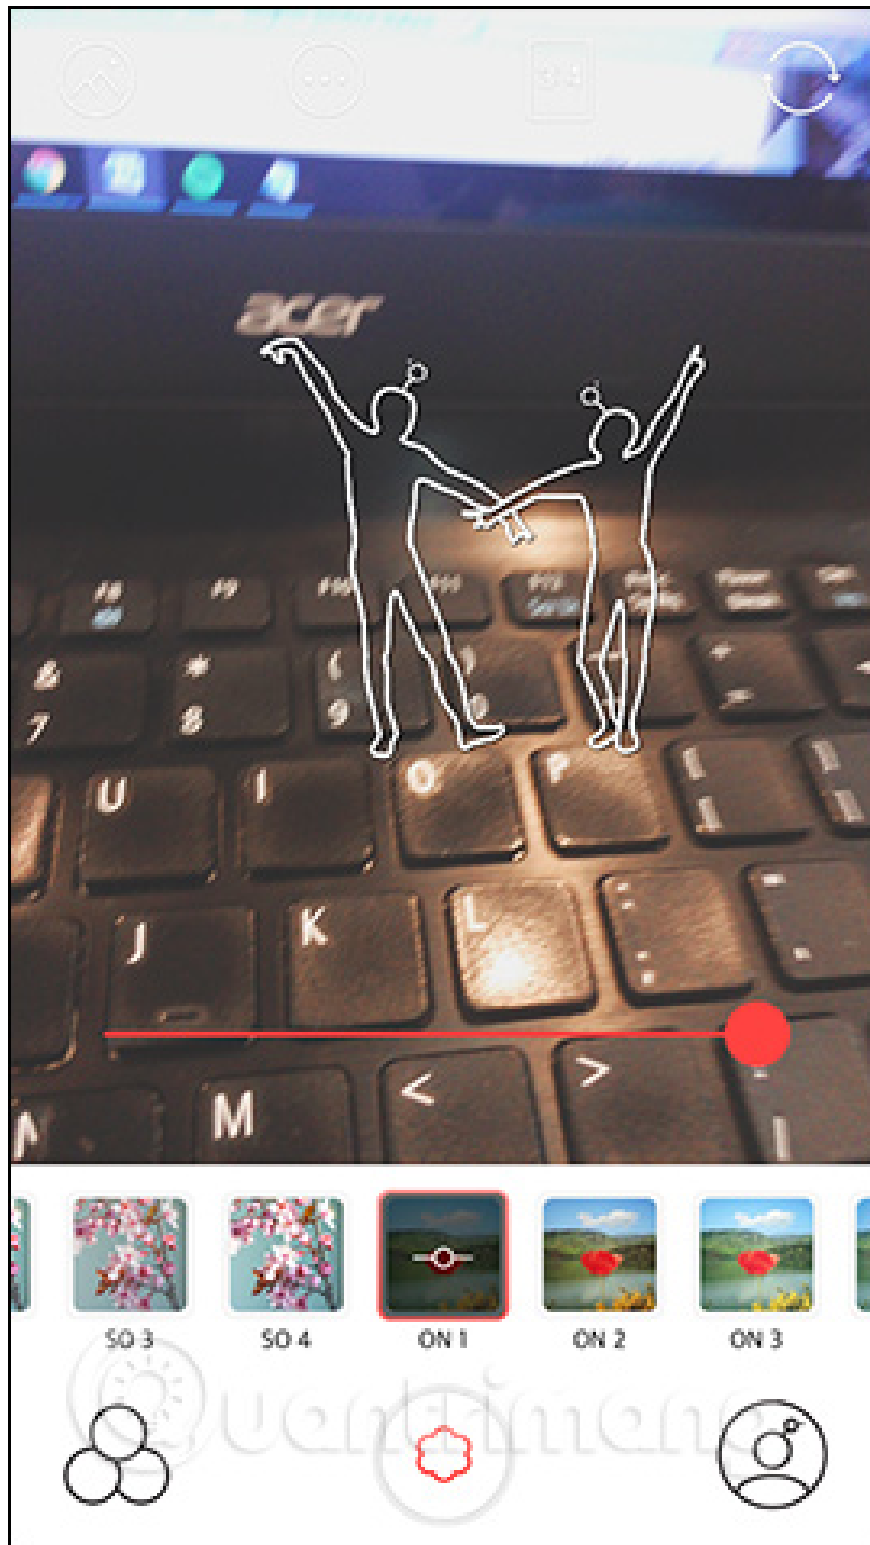

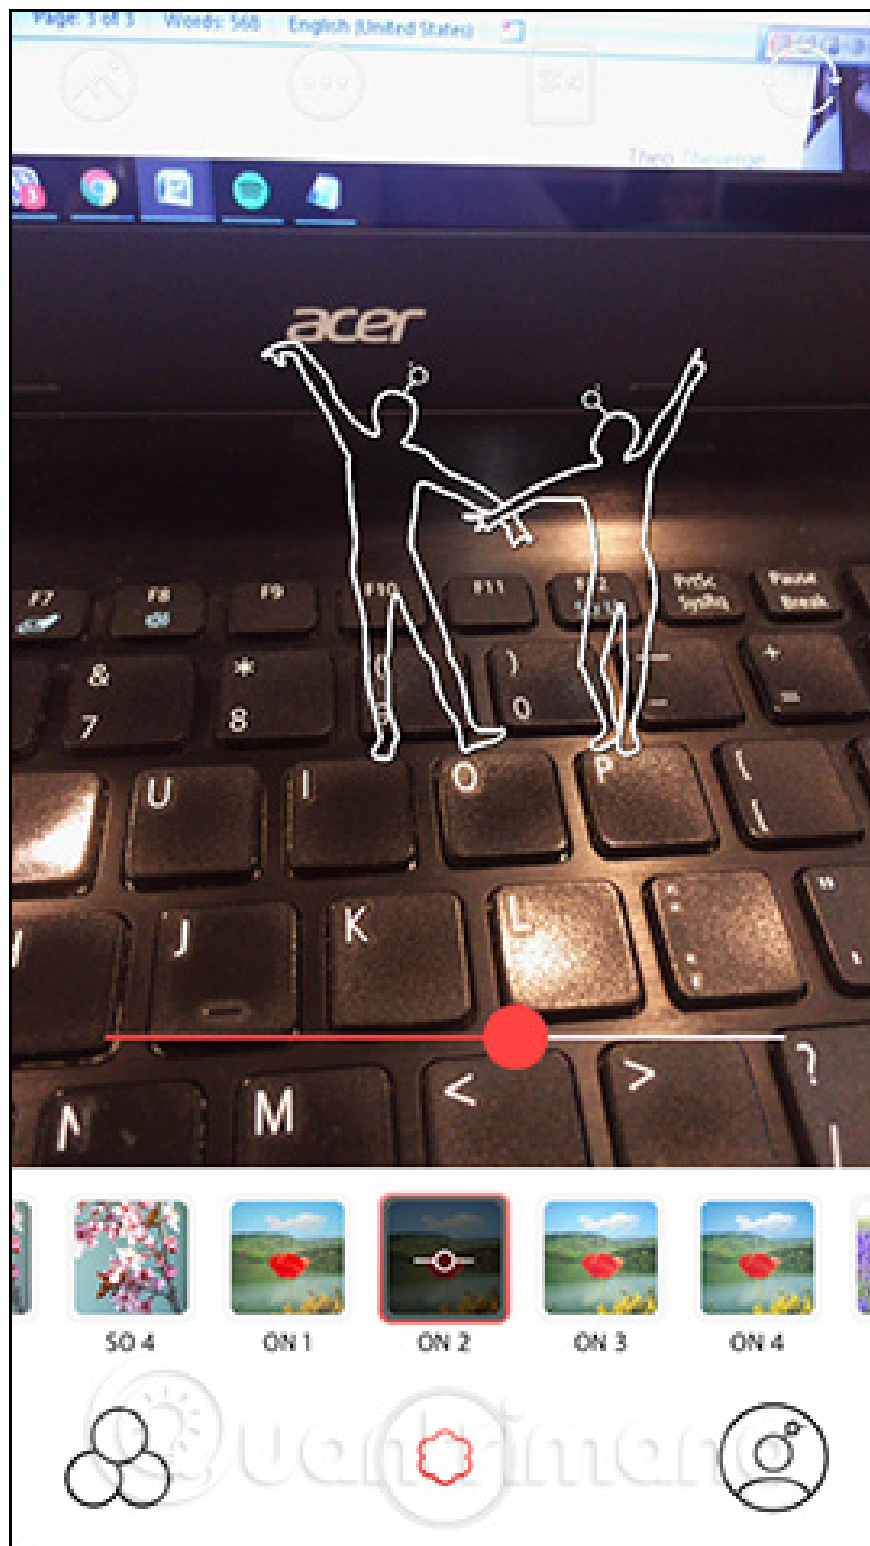

**Step 7:**

If you want to add color filters to images, click on **the 3 circle icon** on the left side of the interface. Select the color filter you want to use and adjust the color using the red horizontal bar in the interface.

Above is the basic usage of SOVS2 application, taking photos with available postures. Unlike photographic applications when there are many editing options, SOVS2 only focuses on shooting styles and adds color filters only. Try creating photos with the new shooting styles that SOVS2 offers.

I wish you all success!
