Currently on the market, Sony's Vaio P is popular with 500 series (eg VGN-P530H / G), 10 (eg VGN-P15G) . However, in the US market, Sony can prepare gender. Introducing the 700 series with a series of 6 models.

According to rumors, this product line will be available in the summer, the machine is even more beautiful than the current model, especially the company will replace some of the equipment inside. The first is to upgrade the slow Atom processor, new RAM and expand the capacity of the SSD hard drive. Maybe, the new Vaio P is also installed with Windows 7 for Microsoft netbook.

Currently, Sony has not released any information. Vaio P is the ultraportable laptop 8 inch screen with high resolution, neat and long design, but the ability to run multimedia programs is not very smooth.
