

Variable super toxic emoticon with Bitmoji Keyboard

Bitmoji Keyboard is an application that expresses yourself through the application's virtual keyboard. Users can choose for themselves an avarta then customize their face, skin color, hair style, ... and send to their friends.

We are still familiar with full-text keyboards, more numbers are characters or higher than some emoticons. However, everything will be completely changed and refreshed with the unique Bitmoji Keyboard app for smartphones. Have you ever thought of turning yourself into an emoticon?

That's what Bitmoji Keyboard is about. Users can completely customize an existing avatar to make it look the same. After that, we can completely customize the hair style, face, skin with funny pictures attached. And finally you can send the exclusive logo that you make to your friends. There are many interesting features that Bitmoji Keyboard brings to users who will be introduced by Network Administrator in the article below.

How to use the Bitmoji Keyboard application

First of all, you need to download the Bitmoji Keyboard application for smartphone according to the link below.

1. Download Bitmoji Keyboard for iOS (requires iOS 8 or higher)
2. Download Bitmoji Keyboard for Android

Step 1:

After downloading the application, you start to use it. Application interface will look like below. Here, the application will ask you to log in with your Email or Snapchat account.

If you have not registered a Snapchat account on your phone, click **Sign up with Email** . Then enter your name, password for your email address and click **Sign up** to use Bitmoji Keyboard.
